boost The journey starts with Fakers who use lies illusions and deceit to get ahead in life instead of an honest exchange They earned the spotlight because they intentionally spread large amounts of false information The theories presented reveal the root cause of their actions as well as how to spot and deal with them The casual writing style and everyday examples ensure easy understanding of these seemingly involved subjects Prior education in the related fields is not required It s no fun to be exploited or betrayed Life is much more fun when we can avoid such potential trouble In addition the introduced theories methods and practices can assist in solving persistent problems related to study business science and more Learning new skills can be time consuming and challenging even without the presence of false information The increased ability to spot the fake and the false can positively affect our progress in life **Amelia's Summer Survival Guide** Marissa Moss,2011-05-03
