Family Matters Tracing Your Family Tree:

Family Matters Michael Sharpe, 2011-12-13 Family history is one of Britain's most popular pastimes. Around six million people in Britain are researching their family trees and genealogy is one of the top categories for online searches. The opening up of public records, the growth of family history societies and the introduction of computers and the internet have made the subject accessible to everyone. Yet while there is no shortage of books on how to do family history, few writers have attempted to put the field itself into a historical and social context and no popular history of the subject has been published in Britain in the last 50 years. That is why Michael Sharpe's new history is so significant. He traces the rise of genealogy from an esoteric interest of gentlemen and scholars to a mainstream hobby enjoyed by millions. He describes in vivid detail the landmark events and the personalities behind them, telling the story of the evolution of family history through the eyes of those involved. His original and highly readable work offers a fresh perspective on an activity that is not just a fast-growing leisure pursuit but also a rapidly expanding business sector and an important field for public policy.

Tracing Your Ancestors Through Letters & Personal Writings Ruth A. Symes, 2016-11-30 Could your ancestors write their own names or did they mark official documents with a cross? Why did great grandfather write so cryptically on a postcard home during the First World War? Why did great grandmother copy all the letters she wrote into letter books? How unusual was it that great uncle sat down and wrote a poem or a memoir? *Researching Family History Through Ancestors' Personal Writings* looks at the kinds of mainly unpublished writing that could turn up amongst family papers from the Victorian period onwards, a time during which writing became crucial for holding families together and managing their collective affairs. With industrialization, improved education and far more geographical mobility, British people of all classes were writing for new purposes, with new implements, in new styles, using new modes of expression and new methods of communication, e.g. telegrams and postcards. Our ancestors had an itch for scribbling, from the most basic marks, initials, signatures and graffiti on objects as varied as trees, rafters and window ledges, through more emotionally charged kinds of writing such as letters and diaries, to more creative works such as poetry and even fiction. This book shows family historians how to get the most out of documents written by their ancestors and therefore how better to understand the people behind the words.
