**Collaborative Practice** Connie Healy, 2017-09-19 Collaborative practice is a new method of dispute resolution used mainly in family law matters. By taking a non-adversarial approach, it challenges the strictly positivist view of the lawyer as zealous advocate for the client. As such, it has received much criticism from the established Bar and legal profession. This book provides a doctrinal and empirical analysis of collaborative practice with a view to assessing its place within the dispute resolution continuum and addressing whether this criticism has been justified. It begins by establishing the theoretical underpinnings of conflict and differing approaches to conflict resolution, the impact of the comprehensive law movement and therapeutic jurisprudence. The origins and development of the collaborative process and the framework it provides for a multidisciplinary approach to conflict resolution is outlined. The book addresses the examination of the process undertaken in the lead up to the enactment of the Uniform Collaborative Law Act in 2010, now regarded as a model of best practice. Finally, through an examination of empirical research undertaken in the US, Canada and in England and Wales, and in presenting the results of the first known empirical research into the process in an Irish family law context, the book concludes with an evidenced-based analysis of the process from the perspective of couples who chose to use the collaborative model to resolve the issues surrounding their relationship breakdown, collaborative lawyers and lawyers who do not advocate a non-adversarial approach. As such, this book provides a valuable insight into the process which will be of interest to academics, practising lawyers, members of the judiciary, researchers in the fields of conflict resolution and family law, and for students studying alternative dispute resolution (ADR).

**Divorce, Families and Emotion** Elena Moore, 2017-01-20 This book is a carefully researched, clearly written, very important contribution to our understanding of divorce. Arlie Hochschild, University of California, USA. This rich, evidence-informed narrative provides a frank, up-close and personal portrait of the aftermath of marriage dissolution. Mary Corcoran, Maynooth University, Ireland. Moore throws a welcome light on the moral identities and gendered inequalities of parenting after separation. Rosalind Edwards, University of Southampton, UK. This book focuses on parental commitment to family life after divorce, in contrast to its common perception as an irrevocable breaking up of the family unit, which is often perpetuated by representations from

popular culture and the media In the first detailed review of emotions and emotion work undertaken by divorced parents the author sheds light on how parents manage feelings of guilt fear on going anger and everyday unhappiness in the course of family life post divorce Moore demonstrates how the emotional dimension of divorce is shaped by societal and structural factors and requires parents to undertake considerable emotion work in the creation of new moral identities The book points to the often gendered responsibilities for sustaining family lives post separation and how these reflect extensive inequalities in family practices The author concludes that divorce is not dangerous for society it is not a social evil or a demonstration of the rise of selfish individualism and that divorcees remain committed to former partners and children long after divorce This book will be of interest to scholars and students in the areas of Sociology Psychology Family Studies Social Policy Social Work and Law
