Family Treasures John DeFrain, Kathleen Lodl, University of Nebraska-Lincoln Extension, 2007-09. Families are one of society's oldest and most resilient institutions. From the beginning of human life, people have grouped themselves into families to find emotional, physical, and collective support. Although in recent years, social commentators have predicted the demise of both marriage and the family, they not only survive but continue to change and evolve. *Family Treasures* is a tool for all different types of individuals and families to better understand the qualities of strong families: appreciation and affection, commitment, positive communication, successful management of stress and crisis, spiritual well-being, and enjoyable time together. Written in conversational style, *Family*

Treasures empowers families to assess their own strengths and to develop a plan for building upon their successes Within each chapter are family inventories and a variety of family tested activities that can be used to enhance the quality of the family Family Treasures is one of those great resources that has strong research at its base and can be used by a variety of disciplines The assessment tools and activities can be readily used by professionals and families to strengthen family relationships Linda Skogrand Ph D Assistant Professor Extension Specialist Utah State University

Jacobs, 2017-10-24 The diverse composition of American families and changing ways of raising our children have become subjects of intense scrutiny by researchers and policymakers in recent years Shifting demographics and work patterns growing numbers of women in the work force teenage pregnancy single parent families and the deinstitutionalization of the elderly disabled and mentally ill all these trends have significantly affected family life Evaluating Family Programs effectively bridges the gap between researchers and practitioners in order to bring practical understandable advice to providers of family programs and to program funders and policymakers Heather B Weiss and Francine H Jacobs have collected in this volume works which move outside the traditional approaches of their disciplines to create new models for delivering and evaluating services This sets a mood of genuine inquiry and excitement about successful aspects of programs while maintaining openness about the limitations of both research and practice By expanding the research model this work is an attempt to understand reciprocal influences of extended family culture community and social institutions It urges those who advocate program accountability to understand that not all types of evaluations are appropriate for all programs and it notes that limitations in current evaluation technologies make it difficult to evaluate outcomes Evaluating Family Programs reminds the reader that in order to develop sound family policy we must look at children and families in context Beacuse

policymakers program administrators and informed citizens have come to rely more upon the results of evaluation research we must improve our methods while not losing sight of its limitations It is a thought provoking contribution to the efforts of those who seek to support the American family with compassion understanding and realism *Methods of Family Research: Clinical populations* Irving E.
