Famine In Peasant Societies:

Famine in Peasant Societies Ronald E. Seavoy, 1986-06-24 In this controversial study Seavoy offers a new approach to the problem of periodic peacetime famine based on the actual behavior of peasants. He maintains that it is possible to increase per capita food production without massive and inappropriate technological inputs. Seavoy shifts the focus from modern development economics to a cultural and historical analysis of subsistence agriculture in Western Europe, England, and Ireland, Indonesia, and India. From his survey of peasant civilization practices in these countries, he generalizes on the social values that create what he terms the subsistence compromise. In all of the ages and cultures, Seavoy finds a consistent social organization of agriculture that produces identical results: seasonal hunger in poor crop years and famine conditions in consecutive poor crop years. He argues that economic policies have failed to increase per capita food production because economists and government planners try to apply market-oriented policies to populations that are not commercially motivated. Once they understand the subsistence compromise, policy makers can take appropriate political action.

The Great Maya Droughts Richardson B. Gill, 2001-04-01 This innovative study argues that the collapse of Classic Maya civilization was driven by catastrophic drought. Between A.D. 800 and 1000, unrelenting drought killed millions of Maya people with famine and thirst and initiated a cascade of internal collapses that destroyed their civilization. Linking global, regional, and local climate change, the author explores how atmospheric processes, volcanism, ocean currents, and other natural forces combined to create the dry climate that pried apart the highly complex civilization in the tropical Maya Lowlands in the ninth and tenth centuries. Drawing on knowledge of other prehistoric and historic droughts, *The Great Maya Droughts* is a useful study of the relationship of humans to their natural and physical environment. The author tries to understand why the Classic Maya failed to adjust their behavior and culture to the climatic conditions and why civilizations in general sometimes collapse in the face of radical environmental change.

An Economic History of the United States Ronald Seavoy, 2013-10-18 An Economic

History of the United States is an accessible and informative survey designed for undergraduate courses on American economic history. The book spans from 1607 to the modern age and presents a documented history of how the American economy has propelled the nation into a position of world leadership. Noted economic historian Ronald E. Seavoy covers nearly 400 years of economic history beginning with the commercialization of agriculture in the pre colonial era through the development of banks and industrialization in the nineteenth century up to the globalization of the business economy in the present day.

The Famine of 1896-1897 in Bengal Malabika Chakrabarti, 2004. This book is a focussed treatment of a famine both as an event and a process. It is a close up of a peasant economy in the throes of a crisis which temporarily eroded the value system determining the normal pattern of entitlements. An investigation of the socio economic ecological and cultural determinants of the famine helps evolve a coherent framework. The emphasis is on the distinctive problems of the various economic regions most notably the tribal belts. Chakrabarti applies Amartya Sen's theory of exchange entitlements to a nineteenth century famine situation in Bengal and finds that a market based entitlement failure precipitating severe famine conditions even without receiving any impulse from food production has little relevance here. Though the book underlines the predicament of the subalterns the famine is not seen from the viewpoint of any specific group or community. The focus is rather on the phenomenon of famine in its totality on the agony and trauma of a peasant society thrown out of gear in an abnormal situation and the crisis of identities that ensued.

The Political Economy of African Famine R. E. Downs, Donna O. Kerner, Stephen P. Reyna, 2019-07-19. Originally published in 1991. This volume explores the combination of political and economic forces that influence different levels of food supply. The book begins with a discussion of famine theories ranging from cultural ecology to neo Marxism. Following this survey is a series of essays by anthropologists, geographers, economists and development practitioners that explores the role of Western institutions in African famine, analyzes famine in particular countries and documents the relationship between famine and gender. This book takes an unusually broad look at famine by including analyses of countries where hunger has rarely been studied and by examining African famine from both African and Western perspectives. Its concluding proposals for eradicating famine make innovative and provocative contributions to current global debates on food and nutrition.

Peasant Society and Marxist Intellectuals in China Kamal Sheel, 2014-07-14. Whereas most writing on the Communist Revolution in China has concentrated on the influence of intellectual leaders, this book examines the role of peasants in the upheaval, viewing them not as a malleable mass but as a dynamic social force interacting with the radical intelligentsia. Focusing on the Xinjiang region, Kamal Sheel traces the historical roots of the early twentieth century agrarian crisis that led to a large scale revolution in the late 1920s, one of the most successful peasant movements organized by the Chinese Communists. A fresh analysis emerges of the remarkable Marxist intellectual Fang Zhimin who used his deeply entrenched rural connections to organize the movement through a creative synthesis of traditional folk concepts with modern Marxist thought. This history begins with the impact of

the Taiping Rebellion and proceeds to document the rapid disintegration of the small peasant economy under the pressures of world economics a state in crisis and a qualitatively different landed upper class It discusses exploitation protest and rural uprisings in the context of the crisis of paternalism marked by a progressive deterioration in the social relationships in rural areas Integrating this investigation of rural upheaval with recent social science theories on peasant movements the study ultimately explores the growth of the Xinjiang revolutionary movement Originally published in 1989 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Famine and Survival Strategies Dessalegn Rahmato,1991 What do peasants do in the face of severe food crisis and ecological stress and how do they manage to survive on their own This study revolves around a case study conducted by the author in the awraja district in the Ambassel Wollo province in northeastern Ethiopia This is in the region that was hit hardest by the 1984 85 famine which Rahmato calls the worst tragedy rural Ethiopia had ever experienced The author also critically examines other literature on famine response The focus of this study is on what happens before famine comes and how the peasants prepare for it From a wealth of evidence the author concludes that the seeds of famine are sown during the years of recovery

Peasant History of Late Pre-colonial and Colonial India B. B. Chaudhuri,2008 **The Death Census of Black '47: Eyewitness Accounts of Ireland's Great Famine** Liam Kennedy,Donald M. MacRaild,Lewis Darwen,Brian Gurrin,2023-01-10 The Great Irish Famine claimed the lives of one million people mainly from the lower classes More than a million others fled the stricken land between 1845 and 1851 In recent decades its history has become the focus of considerable scholarly and popular attention but much remains to be retrieved and reconstructed particularly at the level of the rural poor This book fills that gap It is based on a large volume of reports on social conditions in the Irish localities emanating from within those localities that has never been used systematically by historians It bears the compelling title of the Death Census Most historians are simply unaware of its existence The outstanding feature of the Death Census is that it was authored by local clergymen who lived among the people they served and were intimately involved with their lives This book brings the Death Census together in composite form for the first time and provides a detailed examination of its contents The result is new understanding of the Great Famine as it was experienced on the ground

Famine in East Africa Ronald E. Seavoy,1989-09-27 Efforts to commercialize agriculture in peasant societies through investments in technology and various pricing strategies have failed to create the food surpluses needed to forestall famine and support industrialization in East Africa Seavoy explores this problem basing his study on the case of Tanzania a country that experiences recurrent peacetime famines associated with failures in subsistence agriculture Providing an analysis of East

African subsistence culture he investigates the failures of national agricultural policies and defines strategies for inducing subsistence farmers to shift to commercial production Seavoy looks at various development initiatives involving technological inputs political pressure taxation and land tenure provisions and their effects on the political economy of subsistence agriculture He presents a detailed survey of subsistence culture its agricultural and pastoral practices and such variables as labor topography rainfall and population density The shaping of the East African political economy under colonial rule is discussed together with the economic social and political legacy that has persisted to the present day Seavoy examines Tanzanian agricultural policy which has aimed at facilitating the transition to commercial agriculture He finds that the country is a long way from achieving the assured food surpluses that would enable the nation to support an urban industrial workforce Among the underlying causes he notes the continuing population explosion the farmers objections to commercialized agriculture and deficiencies in the physical infrastructure trained personnel and political institutions He argues that surpluses will not be created until political leaders use the power of national government to enforce the shift to commercial production A noteworthy and original contribution to development literature this work is relevant to studies in modern political economy Third World development agricultural economy and related disciplines *The Origins of the Modern World* Robert Marks,2006-12-07 This clearly written and engrossing book presents a global narrative of the origins of the modern world from 1400 to the present Unlike most studies which assume that the rise of the West is the story of the coming of the modern world this history drawing upon new scholarship on Asia Africa and the New World constructs a story in which those parts of the world play major roles Robert B Marks defines the modern world as one marked by industry the nation state interstate warfare a large and growing gap between the wealthiest and poorest parts of the world and an escape from the biological old regime He explains its origins by emphasizing contingencies such as the conquest of the New World the broad comparability of the most advanced regions in China India and Europe the reasons why England was able to escape from common ecological constraints facing all of those regions by the 18th century and a conjuncture of human and natural forces that solidified a gap between the industrialized and non industrialized parts of the world Now in a new edition that brings the saga of the modern world to the present the book considers how and why the United States emerged as a world power in the twentieth century and became the sole superpower by the twenty first century Once again arguing that the rise of the United States to global hegemon was contingent not inevitable Marks also points to the resurgence of Asia and the vastly changed relationship of humans to the environment that may in the long run overshadow any political and economic milestones of the past hundred years E mail textbooks rowman com for a username and password to access the instructor site *Late Victorian Holocausts* Mike Davis,2001 Examining a series of El Nino induced droughts and the famines that they spawned around the globe Davis shows how the ruling elites helped produce some of the worst tragedies in human history 15 photos 8 maps [Agriculture in the Middle Ages](#) Del Sweeney,2016-11-11 Explores the cultural

The Origins of the Modern World Robert B. Marks,2006-07-27 This clearly written and engrossing book presents a global narrative of the origins of the modern world from 1400 to the present Unlike most studies which assume that the rise of the West is the story of the coming of the modern world this history drawing upon new scholarship on Asia Africa and the New World constructs a story in which those parts of the world play major roles Robert B Marks defines the modern world as one marked by industry the nation state interstate warfare a large and growing gap between the wealthiest and poorest parts of the world and an escape from the biological old regime He explains its origins by emphasizing contingencies such as the conquest of the New World the broad comparability of the most advanced regions in China India and Europe the reasons why England was able to escape from common ecological constraints facing all of those regions by the 18th century and a conjuncture of human and natural forces that solidified a gap between the industrialized and non industrialized parts of the world Now in a new edition that brings the saga of the modern world to the present the book considers how and why the United States emerged as a world power in the twentieth century and became the sole superpower by the twenty first century Once again arguing that the rise of the United States to global hegemon was contingent not inevitable Marks also points to the resurgence of Asia and the vastly changed relationship of humans to the environment that may in the long run overshadow any political and economic milestones of the past hundred years *Small Differences* Donald Harman

Akenson,1988 Argues that there are fundamental social and economic similarities between the two groups but that taboos against intermarriage segregated schools and the nature of Protestant and Catholic religious beliefs keep the Irish at loggerheads *Florence Nightingale on Health in India* Florence Nightingale,Lynn McDonald,Gérard Vallée,2006-11-27

Florence Nightingale is famous as the lady with the lamp in the Crimean War 1854 56 There is a massive amount of literature on this work but as editor Lynn McDonald shows it is often erroneous and films and press reporting on it have been even less accurate The Crimean War reports on Nightingale s correspondence from the war hospitals and on the staggering amount of work she did post war to ensure that the appalling death rate from disease higher than that from bullets did not recur This volume contains much on Nightingale s efforts to achieve real reforms He **Kelly Outbreak 1878-1880** John

McQuilton,2016-10-18 This book examines the Kelly Outbreak against its geographical and social background Failure to unlock the land through selection had created a class of struggling selectors who felt that the established authority of squatters and police denied them justice Their sympathy and support helped Ned come and go as he pleased despite the price on his head McQuilton s exciting narrative maintains suspense and his unobtrusive scholarship fills in the details and corrects many errors which the Kelly myth has accumulated over the years **A Theory of Catastrophe** Bryan S.

Turner,2023-05-08 Sociology has developed theories of social change in the fields of evolution conflict and modernization

viewing modern society as essentially unstable and conflict driven However it has not seriously studied catastrophe A Theory of Catastrophe develops a sociology of catastrophes comparing natural social and political causes and consequences and the social theories that might offer explanations A catastrophe is a general and systematic breakdown of social and political institutions resulting among other things in what we could call a catastrophe consciousness The Greek catastrophe formed the conclusion to a dramatic sequence of strophes The catastrophe was the final act of a drama namely its denouement Catastrophic denouements are without hope genocides military occupations plagues famines and earthquakes A Theory of Catastrophe analyzes Pompeii the Black Death colonial genocide in North America WWI and the Spanish Flu and Nazi Germany and finally this century terrorism new wars climate change and pandemics As a study of sociological theory Bryan Turner discusses Spengler's Decline of the West Marxism as a theory of catastrophic capitalism messianic movements Weber on modernity and risk society He concludes by comparing optimism and pessimism and the idea of inter generational justice
