Emerging Monoculture Assimilation And The Model Minority:

The Emerging Monoculture Eric Kramer, 2003-02-28 Kramer brings together experts from a variety of minority backgrounds and from around the world to give their perspectives on the most pervasive ideology today globalism The basic premise is that a developed country is different from a developed community They need not be mutually exclusive but neither is it assumed that they are necessarily consonant The various essays offer answers to such vital questions as What does it mean to become a global citizen and What does it mean to be a model minority in a global economy The process of becoming a mainstream person involves being first marginalized with the implication that something is inadequate about one's self The process of assimilationism is manifested as various forms of enforced and or rewarded acculturation With the vast human migration currently underway the notion of assimilation has become a global phenomenon What is occurring Kramer and his colleagues demonstrate is a worldwide shift from the village milieu to the city lifestyle This migration is seen as a polycentric and global phenomenon whereby the promised land is nowhere in particular but instead a way of life and mindset an urban lifestyle This process is far more than a simple change in geography Moving from the village to the cityscape involves a mutation in worldview and self identity Additional questions asked throughout the collection are What set of persuasive assumptions are leading the world in this direction and What might be lost in the process A provocative collection for scholars students and other researchers involved with development studies multiculturalism and urbanization

Critical Perspectives on Black Education Noelle Witherspoon-Arnold, Melanie C. Brooks, Bruce Makoto Arnold, 2014-06-01 While nation engages in debates concerning central issues of religion and religious diversity in education the historic saliency of religion and spirituality in the Black community and in the education of its children continues to be largely ignored Historically religion and spirituality were foundational to the development and understanding of social justice issues including but not limited to issues of protest community uplift notions of care and anti oppression Taking into account the historical significance of religion and spirituality in the Black community it is essential for education scholars to cultivate these long standing connections as a means for advancing contemporary struggles for social justice religiosity in education and counter hegemonic praxis The purpose of this book is to expand our understanding of spirituality and religion as related to the schooling of Black students Educational scholarship continues to explore the workings of social justice to ameliorate inequities for those who have not been well served in schools Although the concept of social justice remains a somewhat inchoate term in educational literature this book seeks to explore the historicity of religion and spirituality while offering a scaffold that links ordinary everyday acts of justice religion and spirituality in education to a culture that systematically and institutionally assaults the worth of Black students It is important to note that this book is grounded in a broad concept of religion and spirituality and the editors seek to be inclusive of all types styles and traditions of religiosity and spirituality

The Symbolism of Globalization, Development, and Aging Steven L. Arxer, John W. Murphy, 2012-09-14 This book looks at the symbolic side of globalization development and aging Many of the dimensions that are discussed represent updates of past debates but some are entirely new In particular globalization is accompanied by subtle social imagery that profoundly shapes the way institutions and identities are imagined The process of aging and persons sense of identity is no exception The underlying assumptions that pervade globalization inform how critical dimensions of aging are discussed and institutionalized The application of marketplace imagery for example may impact attempts for holism in how aging is studied and the prospects for human agency during the aging process This book offers a special look into how temporality technology normativity and empiricism structure the symbolic side of globalization and influence dominant images of the aging process Current debates about globalization and aging are expanded by helping readers see the social imagery that is both subtly behind globalization and at the forefront of shaping the aging experience

Coarseness in U.S. Public Communication Philip Dalton, Eric Mark Kramer, 2012-08-31 Public expression in the United States has become increasingly coarse Whether it s stupid rude base or anti intellectual talk it surrounds us Popular television film music art and even some elements of religion have become as coarse we argue as our often disparaged political dialogue This book s contention is that the U S semantic environment is governed by tactics not tact We craft messages that work that perform their desired function We are instrumental strategic communicators As such entertainment and journalism that draw an audience for instance are good This follows the logic that the marketplace an aggregate of hedonically motivated individuals decides what s good Market logic when unencumbered by what some characterize as quaint human sentimentalities liberates us to cynically communicate whatever and however we want Whatever improves ratings web traffic ticket sales concession sales repeat purchases and earnings is good Embracing this communicative paradigm more fully necessitates the culture s abandonment of collective notions of both taste and veracity thus weakening the forces that keep individual desires in check Our present communication environment is one that invites the hypertrophic expression of the ego enabling elites to erode public communication standards and repeal laws and regulations resulting in immeasurable individual fortunes Meanwhile perpetual plutocratic rule is made even more certain by the cacophonous public noise the rest of us are busy making leaving us incapable disinterested and unwilling to listen to one another

Killing the Model Minority Stereotype

Nicholas Daniel Hartlep, Brad J. Porfilio, 2015-06-01 *Killing the Model Minority Stereotype* comprehensively explores the complex permutations of the Asian model minority myth exposing the ways in which stereotypes of Asian Americans operate in the service of racism. Chapters include counter narratives, critical analyses and transnational perspectives. This volume connects to overarching projects of decolonization which social justice educators and practitioners will find useful for understanding how the model minority myth functions to uphold white supremacy and how complicity has a damaging impact in its perpetuation. The book adds a timely contribution to the model minority discourse. The contributors to this book demonstrate that the insidious model minority stereotype is alive and well. At the same time the chapters carefully and powerfully examine ways to deconstruct and speak back to these misconceptions of Asian Americans. Hartlep and Porfilio pull together an important volume for anyone interested in how racial and ethnic stereotypes play out in the lives of people of color across various contexts. Vichet Chhuon, University of Minnesota Twin Cities. This volume presents valuable additions to the model minority literature exploring narratives challenging stereotypes in a wide range of settings and providing helpful considerations for research and practice. David W Chih, University of Illinois at Urbana Champaign. Asian Pacific Islander adolescents and young adults are especially impacted by the model minority stereotype and this volume details the real life consequences for them and for all communities of color. The contributors provide a wide ranging critique and deconstruction of the stereotype by uncovering many of its manifestations and they also take the additional step of outlining clear strategies to undo the stereotype and prevent its deleterious effects on API youth. *Killing the Model Minority Stereotype: Asian American Counterstories and Complicity* is an essential read for human service professionals, educators, therapists and all allies of communities of color. Neoliberalism and National Culture Cory Blad, 2011-09-20 Neoliberal globalization is understood to have a corrosive effect on the state Reductions in economic regulatory capacities combined with an ideological attack on the public necessity of social spending has left many with the impression that the state is a weakened institution at best This book argues that despite popular claims to the contrary global capitalism requires state institutional authority but the legitimation of this authority is increasingly tied to cultural rather than economic means Canada and Quebec are presented in historical comparative context as examples of how neoliberal states achieve global

political economic integration while relying on cultural legitimation to maintain social policies working to mitigate social changes resulting from increased global integration
