Tandon's Textbook of Cardiology Dorairaj Prabhakaran,Raman Krishna Kumar,Nitish Naik,2019-01-17 An authoritative comprehensive and accessible cardiology textbook that caters to the needs of trainees and practicing cardiologists Cardiovascular disease is now the largest contributor to global mortality Low and middle income countries Lmics presently bear the brunt of this global epidemic accounting for over three quarters of cardiovascular deaths and 90% of these deaths under 70 years of age The experience and expertise of health professionals in these countries will therefore be the principal determinant of global success in countering and curbing the global cardiovascular epidemic in the coming decades This book covers the fundamentals of cardiology in depth to provide conceptual clarity and delves into specific cardiovascular disorders with detailed descriptions that range from aetiology and pathophysiology to evidence informed approaches to diagnosis and management It does all of this by blending contextual relevance with uncompromising academic rigor

XIII Mediterranean Conference on Medical and Biological Engineering and Computing 2013 Laura M. Roa Romero,2013-10-01 The general theme of MEDICON 2013 is Research and Development of Technology for Sustainable Healthcare This decade is being characterized by the appearance and use of emergent technologies under development This situation has produced a tremendous impact on Medicine and Biology from which it is expected an unparalleled evolution in these disciplines towards novel concept and practices The consequence will be a significant improvement in health care and well fare i e the shift from a reactive medicine to a preventive medicine This shift implies that the citizen will play an important role in the healthcare delivery process what requires a comprehensive and personalized assistance In this context society will meet emerging media incorporated to all objects capable of providing a seamless adaptive anticipatory unobtrusive and pervasive assistance The challenge will be to remove current barriers related to the lack of knowledge required to produce new opportunities for all the society while new paradigms are created for this inclusive society to be socially and economically sustainable and respectful with the environment In this way these proceedings focus on the convergence of biomedical engineering topics ranging from formalized theory through experimental science and technological development to practical clinical applications

Integrative Cardiology Massimo Fioranelli,2017-02-10 This book is a detailed guide to a new integrative approach to the prevention and treatment of various cardiac disorders and risk factors including coronary artery disease congestive heart failure arrhythmias dyslipidemia and hypertension This approach combines various strategies including metabolic cardiology low dose medicine exercise programs stress management programs evaluation for inherited risk factors and various other healing modalities Metabolic cardiology focuses on the

prevention management and treatment of cardiovascular disease at the cellular level through biochemical interventions with nutritional supplements that can promote energy production in the heart Low dose medicine on the other hand interprets pathological phenomena as an imbalance in intercellular signaling that may be corrected through the administration of low physiological doses of messenger molecules Therapies outside of mainstream medicine may also be deployed in integrative cardiology for example acupuncture herbal medicine and homeopathy Integrative Cardiology will be of interest to all practitioners wishing to learn about an approach that incorporates the incredible advances in medication and technology with a focus on nutrition lifestyle and mind body influences *Bibliografia nazionale italiana* ,2006 Bioactive Food as Dietary Interventions for Cardiovascular Disease Ronald Ross Watson,Victor R Preedy,2012-10-22 One major example of the synergy of bioactive foods and extracts is their role as an antioxidant and the related remediation of cardiovascular disease There is compelling evidence to suggest that oxidative stress is implicated in the physiology of several major cardiovascular diseases including heart failure and increased free radical formation and reduced antioxidant defences Studies indicate bioactive foods reduce the incidence of these conditions suggestive of a potential cardioprotective role of antioxidant nutrients Bioactive Food as Dietary Interventions for Cardiovascular Disease investigates the role of foods herbs and novel extracts in moderating the pathology leading to cardiovascular disease It reviews existing literature and presents new hypotheses and conclusions on the effects of different bioactive components of the diet Addresses the most positive results from dietary interventions using bioactive foods to impact cardiovascular disease Documents foods that can affect metabolic syndrome and other related conditions Convenient efficient and effective source that allows readers to identify potential uses of compounds or indicate those compounds whose use may be of little or no health benefit Associated information can be used to understand other diseases that share common etiological pathways **Cardiovascular Risk Factors** Armen Yuri Gasparyan,2012-03-14 Cardiovascular risk factors contribute to the development of cardiovascular disease from early life It is thus crucial to implement preventive strategies addressing the burden of cardiovascular disease as early as possible A multidisciplinary approach to the risk estimation and prevention of vascular events should be adopted at each level of health care starting from the setting of perinatology Recent decades have been marked with major advances in this field with the emergence of a variety of new inflammatory and immune mediated markers of heightened cardiovascular risk in particular The current book reflects some of the emerging concepts in cardiovascular pathophysiology and the shifting paradigm of cardiovascular risk estimation It comprehensively covers primary and secondary preventive measures targeted at different age and gender groups Attention is paid to inflammatory and metabolic markers of vascular damage and to the assessment of vascular function by noninvasive standardized ultrasound techniques This is a must read book for all health professionals and researchers tackling the issue of cardiovascular burden at individual and community level It can also serve as a didactic source for postgraduate medical students **International Congress Calendar** ,2004 Preventive Cardiology Jo Anne
