Emotions And Fieldwork:

Emotions and Fieldwork Sherryl Kleinman, Martha A. Copp, 1993 What is the place of emotions in fieldwork Do emotions hinder research or do they help the researcher to understand better those they are studying Qualitative researchers have mixed feelings about emotions and the effects on their research Consequently many fieldworkers allow themselves to have particular feelings such as closeness with participants and try to deny or get rid of emotions deemed inappropriate within the fieldwork community The significant costs associated with ignoring feelings are taken up in this volume as Kleinman and Copp explore links between emotions and analysis The authors examine how fieldworkers feelings about their professional identity their work and the people they study inform analyses The conclusion offers an extended example from one of the author s field studies to highlight how fieldworkers emotions can add power to qualitative analyses An appendix demonstrates how to weave emotions into fieldnotes and into preliminary analyses Of the many recent methodological contributions Sherryl Kleinman and Martha Copp s *Emotions and Fieldwork* offers a unique and important perspective one that should be taken seriously by quantitative and qualitative researchers alike No matter what variety of research one conducts Kleinman and Copp s methodological critique provides an important way of thinking about the research process Theory and Methods Kleinman and Copp move qualitative research into a new domain of discussion by focusing on the role of emotion in fieldwork Well written and tightly organized *Emotions and Fieldwork* is a groundbreaking contribution to the literature on ethnography and fieldwork New Ethnographies This is a valuable research monograph for practitioners and students of qualitative methods and stands in bold contrast to books that advocate leaving emotions at home when one goes to the field Kleinman and Copp understand the emotional complexities of fieldwork and the empowerment that may result from exploring feelings thoroughly Reading this book might ameliorate some of the culture shock that can occur for the novice who expects it all to work like following recipes in a cookbook Qualitative Sociology

Emotions in Fieldwork James Peter Davies, Thomas Stodulka, 2020 The history of anthropological and sociological engagement with researchers emotions in fieldwork can be broadly divided into two substreams of enquiry the first being classified as traditional empiricism and the second as radical empiricism Each of these traditions has approached the researcher s emotions and subjectivity in the field in distinct ways which are elaborated through the two sections of this entry The first section defines traditional empiricism and how its guiding principles have sought to approximate fieldwork as closely as possible to the more positivistic position on the researcher s subjectivity broadly seeing the researcher s emotional reactions to the conditions of fieldwork as a potential threat to the data gathering process and thus as something to be controlled and restrained The entry then covers the methodological impact of **Emotions in the Field** James Davies, Dimitrina Spencer, 2010-03-08 This book investigates how anthropologists can make use of the emotions fieldwork generates within them to deepen their understanding of the communities they study *Affective Dimensions of Fieldwork*

Our Studies, Ourselves Barry Glassner, Rosanna Hertz, 2003-08-21 What motivates a lifelong scholarly pursuit and how do one's studies inform life outside the academy Sociologists who live in families but also study families who go to work but also study work who participate in communities but also try to understand communities have an especially intimate relation to their research Growing up poor struggling as a woman in a male dominated profession participating in protests against the Vietnam War facts of life influence research agendas individual understandings of the world and ultimately the shape of the discipline as a whole Barry Glassner and Rosanna Hertz asked twenty two of America's most prominent sociologists to reflect upon how their personal lives influenced their research and vice versa how their research has influenced their lives In this volume the authors reveal with candor and discernment how world events political commitments and unanticipated constraints influenced the course of their careers They disclose how race class and gender proved to be pivotal elements in the course of their individual lives and in how they carry out their research Faced with academic institutions that did not hire or promote persons of their gender race sexual orientation or physical disability they invented new routes to success within their fields Faced with disappointments in political organizations to which they were devoted they found ways to integrate their disillusionment into their research agendas While some of the contributors radically changed their political commitments and others saw more stability none stood still An intimate look at biography and craft these snapshots provide a fascinating glimpse of the sociological life for colleagues other academics and aspiring young sociologists The collection demonstrates how inequalities and injustices can be made into motors for scholarly research which in turn have the power to change individual life courses and entire societies

Researching Values with Qualitative Methods Antje Bednarek-Gilland, 2016-03-03 In several branches of social science interest in values and moral evaluations has increased in recent years with group values taking centre stage yet a satisfactory theoretical account of the

concept of values and their role in social life remains lacking Engaging with theories of value formation and the role of values in everyday life found in ethics classical sociology and contemporary social theory and their implications for empirical work Researching Values with Qualitative Methods argues for a pragmatist approach both to understanding values and the manner in which they are formed as well as exploring the ways in which they can be studied empirically using qualitative research methods In this way this book promises to resolve many of the practical problems involved in fieldwork with political groups including the prominent question of how to account for the researcher s own values Illustrated with examples from published as well as new research this book provides the foundation for the theoretical understanding of values and their empirical investigation thus strengthening the connection between social theory and the development of research methods As such it will be of interest to sociologists anthropologists and geographers with interests in values social theory and research methodology

Methods of Exploring Emotions Helena Flam,Jochen Kleres,2015-03-24 Gathering scholars from different disciplines this book is the first on how to study emotions using sociological historical linguistic anthropological psychological cultural and mixed approaches Bringing together the emerging lines of inquiry it lays foundations for an overdue methodological debate The volume offers entrancing short essays richly illustrated with examples and anecdotes that provide basic knowledge about how to pursue emotions in texts interviews observations spoken language visuals historical documents and surveys The contributors are respectful of those being researched and are mindful of the effects of their own feelings on the conclusions The book thus touches upon the ethics of research in vivid first person accounts Methods are notoriously difficult to teach this collection fills the gap between dry methods books and students need to know more about the actual research practice
