## **Empire Of The Air:**

**Empire of the Air** Tom Lewis, 2021-09-15 *Empire of the Air* tells the story of three American visionaries Lee de Forest Edwin Howard Armstrong and David Sarnoff whose imagination and dreams turned a hobbyist's toy into radio launching the modern communications age Tom Lewis weaves the story of these men and their achievements into a richly detailed and moving narrative that spans the first half of the twentieth century a time when the American romance with science and technology was at its peak *Empire of the Air* is a tale of pioneers on the frontier of a new technology of American entrepreneurial spirit and of the tragic collision between inventor and corporation *Empire of the Air* Thomas S. W. Lewis, 1993

**Empire in the Air** Chandra D. Bhimull, 2017-12-12 Honorable Mention 2019 Victor Turner Prize in Ethnographic Writing given by the Society for Humanistic Anthropology Honorable Mention 2019 Sharon Stephens Prize given by the American Ethnological Society Examines the role that race played in the inception of the airline industry *Empire in the Air* is at once a history of aviation and an examination of how air travel changed lives along the transatlantic corridor of the African diaspora Focusing on Britain and its Caribbean colonies Chandra Bhimull reveals how the black West Indies shaped the development of British Airways Bhimull offers a unique analysis of early airline travel illuminating the links among empire aviation and diaspora and in doing so provides insights into how racially oppressed people experienced air travel The emergence of artificial flight revolutionized the movement of people and power and Bhimull makes the connection between airplanes and the other vessels that have helped make and maintain the African diaspora the slave ships of the Middle Passage the tracks of the Underground Railroad and Marcus Garvey's black owned ocean liner As a new technology airline travel retained the racist ideas and practices that were embedded in British imperialism and these ideas shaped every aspect of how commercial aviation developed from how airline routes were set to who could travel easily and who could not The author concludes with a look at airline travel today suggesting that racism is still enmeshed in the banalities of contemporary flight

**Empire of the Air** Jenifer Van Vleck, 2013-11-01 Jenifer Van Vleck's *Empire of the Air* reveals the central role commercial aviation played in the U S ascent to global preeminence in the twentieth century as the federal government partnered with the aviation industry to deliver American power across the globe and sell the idea of the American Century to the public at home and abroad

**Empire of the Air. The Advent of the Air Age, 1922-1929. [With a Portrait.]** Samuel John Gurney Hoare (Viscount Templewood.), 1957 *Empires of the Sky* Alexander Rose, 2021-05-25 The Golden Age of Aviation is brought to life in this story of the giant Zeppelin airships that once roamed the sky a story that ended with the fiery destruction of the Hindenburg *Genius* a definitive tale of an incredible time when mere mortals learned to fly Keith O'Brien The New York Times At the dawn of the twentieth century when human flight was still considered an impossibility Germany's Count Ferdinand von Zeppelin vied with the Wright Brothers to build the world's first successful flying machine As the Wrights labored to invent the airplane Zeppelin fathered the remarkable airship

sparking a bitter rivalry between the two types of aircraft and their innovators that would last for decades in the quest to control one of humanity's most inspiring achievements. And it was the airship, not the airplane, that led the way. In the glittery 1920s, the count's brilliant protégé Hugo Eckener achieved undreamed-of feats of daring and skill, including the extraordinary Round the World voyage of the Graf Zeppelin. At a time when America's airplanes, rickety deathtraps held together by glue screws and luck, could barely make it from New York to Washington D.C., Eckener's airships serenely traversed oceans without a single crash, fatality, or injury. What Charles Lindbergh almost died doing crossing the Atlantic in 1927, Eckener had effortlessly accomplished three years before. The Spirit of St. Louis even took off. Even as the Nazis sought to exploit Zeppelins for their own nefarious purposes, Eckener built his masterwork, the behemoth Hindenburg, a marvel of design and engineering. Determined to forge an airline empire under the new flag, Eckener met his match in Juan Trippe, the ruthlessly ambitious king of Pan American Airways, who believed his fleet of next-generation planes would vanquish Eckener's coming airship armada. It was a fight only one man and one technology could win. Countering each other's moves on the global chessboard, each seeking to wrest the advantage from his rival, the struggle for mastery of the air was a clash not only of technologies but of business, diplomacy, politics, personalities, and the two men's vastly different dreams of the future. Empires of the Sky is the sweeping, untold tale of the duel that transfixed the world and helped create our modern age. **Ken Burns' America** Ken Burns, 2005

*Palestine in the Air* Chin-chin Yap, 2025-01-23 As the first cultural history of Palestinian aviation, *Palestine in the Air* reveals civil aviation's role in the question of Palestine over the past century. How do Palestinians, as individuals, communities, and as a nascent state, engage with the air? How does their systemic exclusion from aerial agency inform dominant and counter narratives of culture and modernity? International civil aviation is a powerful tool for the disenfranchisement of Palestinian statehood, connectivity, and mobility. Yet Palestinians have constantly sought to harness aviation as a legitimate component of modern state building. They have also creatively appropriated aviation technologies, including balloons, kites, and drones, as instruments of resistance, exploiting flight's symbolic qualities of escape and liberation to highlight the injustices of occupation. Using an interdisciplinary approach that draws on media studies, cultural studies, critical theory, diplomacy, and history, *Palestine in the Air* examines civil aviation's political, social, and cultural impact upon the Palestinian quest for sovereignty. The book makes use of an unprecedented range of aviation-related sources, spanning unpublished memoirs, print and image archives, interviews, art, film, literature, poetry, and stand-up comedy. **To Conquer the Air** James Tobin, 2012-06-12 James Tobin, award-winning author of *Ernie Pyle's War* and *The Man He Became*, has penned the definitive account of the inspiring and impassioned race between the Wright brothers and their primary rival, Samuel Langley, across ten years and two continents to conquer the air. For years, Wilbur Wright and his younger brother, Orville, experimented in obscurity, supported only by their exceptional family. Meanwhile, the world watched as Samuel Langley, armed with a contract from the US War Department and all the resources of the Smithsonian Institution, sought to create the

first manned flying machine But while Langley saw flight as a problem of power the Wrights saw a problem of balance Thus their machines took two very different paths Langley's toward oblivion the Wrights toward the heavens though not before facing countless other obstacles With a historian's accuracy and a novelist's eye Tobin has captured an extraordinary moment in history To Conquer the Air is itself a heroic achievement **The Outlaws of the Air** George Griffith,2014-10-10 George Griffith writes an imaginative futuristic tale about aerial warfare and a new Utopian Colony in the Pacific *The War in the Air* Herbert George Wells,2025-08-31 Reproduction of the original The Antigonos publishing house specialises in the publication of reprints of historical books We make sure that these works are made available to the public in good condition in order to preserve their cultural heritage *Ken Burns's America* G.
