Empire Of The Eye:

The Empire of the Eye Angela L. Miller, 1993 The great nineteenth century American landscape paintings panoramic visions of natural design have long been interpreted as expressions of the very spirit of national expansionism Surveying American landscape art in light of its political institutional and cultural history from the 1820s through the post Civil War era Angela Miller profoundly alters our understanding of the genre In this richly illustrated volume she shows how landscape paintings beyond reflecting the beauty and the power of nature served as a medium through which disquieting questions concerning the future of the new republic could be raised symbolically Making use of a wide array of sources including diaries letters travel writings criticism and essays Miller illuminates the meaning of landscape images for nineteenth century viewers She reassesses the ideological influence of Thomas Cole on successive generations of artists and reinterprets the new types of national landscape that emerged among New York based painters beginning in the 1840s Miller offers fresh analyses of such key works as Cole s View from Mount Holyoke Northampton Massachusetts The Oxbow 1836 Asher B Durand s Progress 1853 John Frederick Kensett s White Mountains Mount Washington 1851 Frederic Church s New England Scenery 1851 and Sanford Gifford s Kauterskill Clove 1862 The cultural identity expressed by nationalist landscape painting she asserts was marked by competing commitments to region and nation by uncertainties over gender relations and by the paradox of a nature simultaneously invested with spiritual values and used to underwrite an ideology of progress Enhanced by eight color plates and sixty four black and white reproductions The Empire of the Eye represents a major contribution to American cultural studies and the history of landscape art BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *Deception: An Interdisciplinary Exploration* Emma Williams, Iman Sheeha, 2019-01-04

This volume was first published by Inter Disciplinary Press in 2015 The topic of deception is an area of study that has fascinated researchers and readers alike for generations From infamous tales of espionage and conspiracy to the targeted deception of illusionists and magicians and notorious examples of deceptive statements and actions in public life the concept of deception is widely recognised by the general public The pervasive nature of deception and deceit permeating all facets of life from the annals of history to the present day means that it is an area of research that benefits substantially from an approach that crosses conventional academic and research boundaries This collection represents an interdisciplinary exploration of the concept of deception expanding the readers awareness and understanding of a range of areas including the portrayal of deception in literature and spy fiction the existence and success of literary hoaxes deception and illusion in visual art and the use of deception in both strategic and interpersonal contexts **Passions for Nature** Rochelle Johnson, 2009 Nineteenth century Americans celebrated nature through many artistic forms including natural history writing landscape painting landscape design theory and transcendental philosophy Although we tend to associate these movements with the nation s dawning environmental consciousness Passions for Nature demonstrates that they instead alienated

Americans from the physical environment even as they seemed to draw people to it Rather than see these expressions of passion for nature as initiating environmental awareness this study reveals how they contributed to a culture that remains startlingly ignorant of the details of the material world Using as a touchstone the writings of nineteenth century philanthropist Susan Fenimore Cooper the daughter of famed author James Fenimore Cooper *Passions for Nature* reveals that while a generalized passion for nature was intense and widespread in her era cultural attention to the real physical world was quite limited Popular artistic forms represented the natural world through specific metaphors for the American experience cultivating a national tradition of valuing nature in terms of humanity Johnson crosses disciplinary boundaries to demonstrate that anthropocentric understandings of the natural world result not only from the growing gulf between science and imagination that C P Snow located in the early twentieth century but also and surprisingly from cultural productions traditionally viewed as positive engagements with the environment By uncovering the roots of a cultural alienation from nature *Passions for Nature* explains how the United States came to be a nation that simultaneously reveres the natural world and yet remains dangerously distant from it

Dragon's Eyes: Volume 1 , **The Stratified Leadership Model of the First-Century Christian Church** Barton S. Garratt Edsall, 2025-07-29 This research work aims to present a solution to the problem of withering Christian congregations present in modern Christian churches by way of expounding the doctrine that Jesus or his apostles promoted as displayed in the four canonical Gospels the Acts of the Apostles or the New Testament epistles This study presents factual information showing that the doctrine and arrangement of leaders that developed within the first century church may have been overlooked and lost by the wayside of history in favor of established traditions Paul declared his purpose for visiting the church believers in Rome was not to collect money or

build houses of worship but so that their lives might manifest spiritual fruit Following that example improving the spiritual quality of their people's lives should be the primary goal of all Christian ministers The majority of this work will conduct a careful exegesis of selected passages from the New Testament which focus on the leadership model utilized by the first century church This study presents in detail the stratified leadership model of the early times in such a fashion that any modern church might replicate its design

Empire's Workshop Greg Grandin, 2006-05-02 An eye opening examination of Latin America's role as proving ground for U S imperial strategies and tactics In recent years one book after another has sought to take the measure of the Bush administration's aggressive foreign policy In their search for precedents they invoke the Roman and British empires as well as postwar reconstructions of Germany and Japan Yet they consistently ignore the one place where the United States had its most formative imperial experience Latin America A brilliant excavation of a long obscured history *Empire's Workshop* is the first book to show how Latin America has functioned as a laboratory for American extraterritorial rule Historian Greg Grandin follows the United States imperial operations from Thomas Jefferson's aspirations for an empire of liberty in Cuba and Spanish Florida to Ronald Reagan's support for brutally oppressive but U S friendly regimes in Central America He traces the origins of Bush's policies to Latin America where many of the administration's leading lights John Negroponte Elliott Abrams Otto Reich first embraced the deployment of military power to advance free market economics and first enlisted the evangelical movement in support of their ventures With much of Latin America now in open rebellion against U S domination Grandin concludes with a vital question If Washington has failed to bring prosperity and democracy to Latin America its own backyard workshop what are the chances it will do so for the world

Tax Law, Religion, and Justice Allen Calhoun, 2021-03-08 This book asks why tax policy is both attracted to and repelled by the idea of justice Accepting the invitation of economist Henry Simons to acknowledge that tax justice is a theological concept the work explores theological doctrines of taxation to answer the presenting question The overall message of the book is that taxation is an instrument of justice but only when taxes take into account multiple goods in society the requirements of the government the property rights of society's members and the material needs of the poor It is argued that this answer to the presenting question is a theological and ethical answer in that it derives from the insistence of Christian thinkers that tax policy take into account material human need *necessitas* Without the *necessitas* component of the tax balance tax systems end up honoring only one of the three components of the tax

equation and cease to reflect a coherent idea of justice The book will be of interest to academics and researchers working in the areas of tax law economics theology and history **The Encyclopaedia Britannica** Hugh Chisholm,1911 This eleventh edition was developed during the encyclopaedia's transition from a British to an American publication Some of its articles were written by the best known scholars of the time and it is considered to be a landmark encyclopaedia for scholarship and literary style *The Encyclopaedia Britannica* ,1911 **New York Magazine** ,1981-08-17 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea The Encyclopædia Britannica Hugh Chisholm,1911
