Empowering Teachers And Parents School Restructuring Through The Eyes Of Anthropologists:

Empowering Teachers and Parents G Alfred Hess, 1992-07-13 A much needed examination of the impact on teachers and parents of the effort to improve our schools through restructuring this book looks at professionalization and parent empowerment programs from the ground level rather than from the large scale policy level The editor active in both policy setting and monitoring implementation approaches the subject with an overarching view that weaves together a set of diverse case studies that examine some of the most notable efforts in this area of school reform The first section demonstrates the tremendous difficulties involved in attempting to reshape the culture of public school teaching noting both institutional resistance to change and the personal resistance of the professionals who are in theory being empowered through this approach The second section details the problems of launching parent empowerment opportunities in a large urban setting and a contrasting case examines the choice of enrollment option Here too these studies examine the effectiveness of these programs The conclusion reflects on the opportunities such innovations provide for researchers and assesses the importance of such research in shaping the innovations themselves through evaluations while they are in process

Rethinking Intelligence Joe L. Kincheloe, Shirley R. Steinberg, Leila Villaverde, 2013-08-21 Arguing that a comprehensive theoretical overhaul of mainstream educational psychology is long overdue *Rethinking Intelligence* suggests criteria upon which new models can be developed The contributors reconceptualize educational psychology through a democratic vision of inclusivity that takes into account the culturally inscribed nature of research They offer a theoretical and historical critique of how intelligence is measured in ways that exclude or ignore other criteria By doing so they hope to encourage educators and researchers to imagine new forms of intelligence education and life

Funds of Knowledge Norma Gonzalez, Luis C. Moll, Cathy Amanti, 2006-04-21 The concept of funds of knowledge is based on a simple premise people are competent and have knowledge and their life experiences have given them that knowledge The claim in this book is that first hand research experiences with families allow one to document this competence and knowledge and that such engagement provides many possibilities for positive pedagogical actions Drawing from both Vygotskian and neo sociocultural perspectives in designing a methodology that views the everyday practices of language and action as constructing knowledge the funds of knowledge approach facilitates a systematic and powerful way to represent communities in terms of the resources they possess and how to harness them for

classroom teaching This book accomplishes three objectives It gives readers the basic methodology and techniques followed in the contributors funds of knowledge research it extends the boundaries of what these researchers have done and it explores the applications to classroom practice that can result from teachers knowing the communities in which they work In a time when national educational discourses focus on system reform and wholesale replicability across school sites this book offers a counter perspective stating that instruction must be linked to students lives and that details of effective pedagogy should be linked to local histories and community contexts This approach should not be confused with parent participation programs although that is often a fortuitous consequence of the work described It is also not an attempt to teach parents how to do school although that could certainly be an outcome if the parents so desired Instead the funds of knowledge approach attempts to accomplish something that may be even more challenging to alter the perceptions of working class or poor communities by viewing their households primarily in terms of their strengths and resources their defining pedagogical characteristics Funds of Knowledge Theorizing Practices in Households Communities and Classrooms is a critically important volume for all teachers and teachers to be and for researchers and graduate students of language culture and education

Handler,1996-04-01 Throughout the world politicians are dismantling state enterprises and heaping praise on private markets while in the United States a new rhetoric of citizen empowerment links a widespread distrust of government to decentralization and privatization Here Joel Handler asks whether this restructuring of authority really allows ordinary citizens to take more control of the things that matter in their roles as parents and children teachers and students tenants and owners producers and consumers Looking at citizens as stakeholders in the modern social welfare state created by the New Deal he traces the surprising ideological shifts of empowerment from its beginning as a cornerstone of the war on poverty in the 1960s to its central place in conservative market based voucher schemes for school reform in the 1990s Handler shows that in the past the gains from decentralization

have proved to be more symbol than substance some disadvantaged members of society will find new opportunities in the changes of the 1990s but others will simply experience powerlessness under another name He carefully distinguishes empowerment by invitation in special education worker safety home health care public housing tenancy and neighborhood organizations from the empowerment by conflict exemplified by the radical decentralization of the Chicago public schools What emerges is a map of the major pitfalls and possible successes in the current journey away from a discredited regulatory state Resources in Education ,1998-04 **Gender, Equity, and Schooling** Barbara J.
