dwindling while nineteenth century missionaries and explorers had found riverbeds seashells and other evidence of a verdant past deep in the Kalahari Desert Government experts insisted however that the rains weren't disappearing the land long susceptible to periodic drought had been further degraded by settler farmers agricultural practices an explanation that white South Africans rejected So when the geologist Ernest Schwarz blamed the land itself the farmers listened Schwarz held that erosion and topography had created arid conditions that rainfall was declining and that agriculture was not to blame As a solution he proposed diverting two rivers to the Kalahari's basins creating a lush country where white South Africans could thrive This plan which became known as the Kalahari Thirstland Redemption Scheme was rejected by most scientists But it found support among white South Africans who worried that struggling farmers undermined an image of racial superiority *Green Lands for White Men* explores how white agriculturalists in southern Africa grappled with a parched and changing terrain as they sought to consolidate control over a Black population Meredith McKittrick's timely history of the Redemption Scheme reveals the environment to have been central to South African understandings of race While Schwarz's plan was never implemented it enjoyed sufficient support to prompt government research into its feasibility and years of debate McKittrick shows how white farmers rallied around a plan that represented their interests over those of the South African state and delves into the reasons behind this schism between expert opinion and public perception This backlash against the predominant scientific view McKittrick argues displayed the depth of popular mistrust in an expanding scientific elite A detailed look at the intersection of a settler society climate change white nationalism and expert credibility *Green Lands for White Men* examines the reverberations of a scheme that ultimately failed but influenced ideas about race and the environment in South Africa for decades to come

Rethinking Empowerment Jane L. Parpart, Shirin M. Rai, Kathleen A. Staudt, 2003-08-29 *Rethinking Empowerment* looks at the changing role of women in developing countries and calls for a new approach to empowerment An approach that adopts a more nuanced feminist interpretation of power and empowerment recognises that local empowerment is always embedded in regional national and global contexts pays attention to institutional structures and politics and acknowledges that empowerment is both a process and an outcome Moreover the book warns that an obsession with measurement rather than process can undermine efforts to foster transformative and empowering outcomes It concludes that power must be restored as the centrepiece of empowerment Only then will the term and its advocates provide meaningful ammunition for dealing with the challenges of an increasingly unequal and often sexist global local world
