High-Dimensional Spaces David B. Skillicorn,2012-09-24 High dimensional spaces arise as a way of modelling datasets with many attributes Such a dataset can be directly represented in a space spanned by its attributes with each record represented as a point in the space with its position depending on its attribute values Such spaces are not easy to work with because of their high dimensionality our intuition about space is not reliable and measures such as distance do not provide as clear information as we might expect There are three main areas where complex high dimensionality and large datasets arise naturally data collected by online retailers preference sites and social media sites and customer relationship databases where there are large but sparse records available for each individual data derived from text and speech where the attributes are words and so the corresponding datasets are wide and sparse and data collected for security defense law enforcement and intelligence purposes where the datasets are large and wide Such datasets are usually understood either by finding the set of clusters they contain or by looking for the outliers but these strategies conceal subtleties that are often ignored In this book the author suggests new ways of thinking about high dimensional spaces using two models a skeleton that relates the clusters to one another and boundaries in the empty space between clusters that provide new perspectives on outliers and on outlying regions The book will be of value to practitioners graduate students and researchers *Consequences of War* David Wilson,2014-08-29 Consequences of War is an American warrior s story of unrelenting combat against terrorism in the Far East It recounts the author s early life that gave him a warrior s soul unrelenting drive and fearlessness to fight and it follows him as he describes grueling military preparation and combat narrating mission after mission Observe as he tries rescuing wounded US Spec Ops forces still engaged with the enemy resulting in a fierce firefight against those trying to overrun his position With American conflicts never seeming to end he eventually resigned his commission and went to Africa in search of peace In his work as a wildlife scientist he describes shooting hundreds of animals including elephants buffalo and antelope for population control He narrates being knocked down and gored by Cape buffalo encounters with deadly snakes and attacks and deaths from lions and elephants After undergoing 22 surgeries and military disability the author describes the consequences of war resulting from prolonged and excessive numbers of American wars the severe impact on our military
