Empty Cities Of The Full Moon A Novel:

Empty Cities of the Full Moon Howard V. Hendrix, 2001 When the latest technology of the world revives a plague of apparent global madness that annihilates urban civilization a new world is spawned under the sway of the moon and the human race is forever altered

Human in the Circuit Howard V. Hendrix, 2011-01-01 In the tradition of the old Ace Doubles two in one books flip one over to read the second title here is the fifteenth Wildside Double HUMAN IN THE CIRCUIT Collected Stories by Howard V Hendrix An astronaut with suicidal tendencies from having spent too much time in suspended animation Machine descendants of human technology trying to understand what their creators were thinking Virtual and atomic spins on apocalypse Mystics one Martian one mathematician who succeed by failing and fail by succeeding Cutting edge science fiction by a modern master PERCEPTION OF DEPTH Collected Stories by Howard V Hendrix A plausibly mad mushroom messiah and a lost tribe soon to be more lost than ever as humanity's first ambassadors to the stars Three fighter pilots on a secret mission involving the Roswell cover story's surprising truth An early astronomer discovers the macrocosm of which our universe is just a part A trip backwards from 1999 to the 1939 World's Fair and a meeting with Einstein More strange yet compelling characters encountering the challenges of a technological world

Lightpaths Howard V. Hendrix, 2010-11-01 Roger Cortland came to the Orbital Complex to continue his life's work in virtual reality Marissa Correa to observe this Utopian society up close and Jhana Meniskos to student the Orbital Park the station's biodiversity preserve But no utopia is safe from corruption from sabotage from corporate greed And when this perfect world begins to unravel all three will have to fight to protect their work and their lives Writer Michael Bishop says An exhilarating intellectual tour of both an amazing orbital habitat and a dizzying complex of ideas

Science Fiction George Slusser, 2022-01-04 In what N Katherine Hayles describes as this enormously ambitious posthumous volume renowned scholar George Slusser offers a definitive version of the argument about the history of science fiction that he developed throughout his career that several important ideas and texts routinely overlooked in other critical studies made significant contributions to the creation of modern science fiction as it developed into a truly global literature He explores how key thinkers like Ren Descartes Benjamin Constant Thomas DeQuincey Guy du Maupassant J D Bernal and Ralph Waldo Emerson influenced and are reflected in twentieth century science fiction stories from the United States Great Britain France Germany Poland and Russia The conclusion begins with Slusser's overview of global science fiction in the twenty first century and discusses recent developments in countries like China Romania and Israel Hayles's foreword provides a useful summation of the book's contents while science fiction writer Gregory Benford contributes an afterword providing a personal perspective on the life and thoughts of his longtime friend The book was edited by Slusser's former colleague Gary Westfahl a distinguished scholar in his own right

Standing Wave Howard V. Hendrix, 2010-08-01 What was the light that mazed every mind's eye What has brought a flying mountain top home from the stars and sent investigators into the orbital habitats

floating above Earth How is this connected to a living fossil fungus or to a dead madman or to the fate of the planet Whoever discovers the answers to these questions FIRST will decide the ultimate fate of the Earth and all humanity An imaginative tour de force

The Year's Best Science Fiction: Nineteenth Annual Collection Gardner Dozois, 2002-07-22 The twenty first century has so far proven to be exciting and wondrous and filled with challenges we had never dreamed New possibilities previously unimagined appear almost daily and science fiction stories continue to explore those possibilities with delightful results Collected in this anthology are such compelling stories as On K2 with Kanakaredes by Dan Simmons A relentlessly paced and absorbing tale set in the near future about three mountain climbers who must scale the face of K2 with some very odd company The Human Front by Ken MacLeod In this compassionate coming of age tale the details of life are just a bit off from things as we know them and nothing is as it appears to be Glacial by Alastair Reynolds A fascinating discovery on a distant planet leads to mass death and a wrenching mystery as spellbinding as anything in recent short fiction The twenty six stories in this collection imaginatively takes us far across the universe into the very core of our beings to the realm of the gods and the moment just after now Included here are the works of masters of the form and of bright new talents including Eleanor Arnason Chris Beckett Michael Blumlein Michael Cassutt Brenda W Clough Paul Di Filippo Andy Duncan Carolyn Ives Gilman Jim Grimsley Simon Ings James Patrick Kelly Leigh Kennedy Nancy Kress Ian R MacLeod Ken MacLeod Paul J McAuley Maureen F McHugh Robert Reed Alastair Reynolds Geoff Ryman William Sanders Dan Simmons Allen M Steele Charles Stross Michael Swanwick Howard Waldrop Supplementing the stories are the editor's insightful summation of the year's events and a lengthy list of honorable mentions making this book a valuable resource in addition to serving as the single best place in the universe to find stories that stir the imagination and the heart

Science Fiction, Canonization, Marginalization, and the Academy Gary Westfahl, George Slusser, 2002-01-30 Science fiction occupies a peculiar place in the academic study of literature For decades scholars have looked at science fiction with disdain and have criticized it for being inferior to other types of literature But despite the sentiments of these traditionalists many works of science fiction engage recognized canonical texts such as the Odyssey and many traditionally canonical works contain elements of science fiction More recently the canon has been subject to revision as scholars have deliberately sought to include works that reflect diversity and have participated in the serious study of popular culture But these attempts to create a more inclusive canon have nonetheless continued to marginalize science fiction This book examines the treatment of science fiction within the academy The expert contributors to this volume explore a wide range of topics related to the place of science fiction in literary studies These include academic attitudes toward science fiction the role of journals and cultural gatekeepers in canon formation and the marginalization of specific works and authors by literary critics In addition the volume gives special attention to multicultural and feminist concerns In discussing these topics the book sheds considerable light on much broader issues related to the politics of literary studies and academic inquiry

Visions of Mars Howard V. Hendrix, George

Slusser, Eric S. Rabkin, 2014-01-10 Seventeen wide ranging essays explore the evolving scientific understanding of Mars and the relationship between that understanding and the role of Mars in literature the arts and popular culture Essays in the first section examine different approaches to Mars by scientists and writers Jules Verne and J H Rosny Section Two covers the uses of Mars in early Bolshevik literature Wells Brackett Burroughs Bradbury Heinlein Dick and Robinson among others The third section looks at Mars as a cultural mirror in science fiction Essayists include prominent writers e g Kim Stanley Robinson scientists and literary critics from many nations

World Weavers Kin Yuen Wong, Gary Westfahl, Amy Kit-sze Chan, 2005-11-01 World Weavers is the first ever study on the relationship between globalization and science fiction Scientific innovations provide citizens of different nations with a unique common ground and the means to establish new connections with distant lands This study attempts to investigate how our world has grown more and more interconnected not only due to technological advances but also to a shared interest in those advances and to what they might lead to in the future Science fiction has long been both literally and metaphorically linked to the emerging global village It now takes on the task of exploring how the cybernetic revolution might transform the world and keep it one step ahead of the real world despite ever accelerating developments As residents of a world that is undeniably globalized science fictional and virtual it is incumbent on us to fully understand just how we came to live in such a world and to envisage where this world may be heading next World Weavers represents one small but significant step toward achieving such knowledge

Science Fiction and the Two Cultures Gary Westfahl, George Slusser, 2009-06-01 Essays in this volume demonstrate how science fiction can serve as a bridge between the sciences and the humanities The essays show how early writers like Dante and Mary Shelley revealed a gradual shift toward a genuine understanding of science how H G Wells first showed the possibilities of combining scientific and humanistic perspectives how writers influenced by Gernsback's ideas like Isaac Asimov illustrated the ways that literature could interact with science and assist in its progress and how more recent writers offer critiques of science and its practitioners

Contemporary Authors Lisa Kumar, 2004-07 A biographical and bibliographical guide to current writers in all fields including poetry fiction and nonfiction journalism drama television and movies Information is provided by the authors themselves or drawn from published interviews feature stories book reviews and other materials provided by the authors publishers

Historical Dictionary of Science Fiction Literature Brian Stableford, 2004-04-19 This reference tracks the development of speculative fiction influenced by the advancement of science and the idea of progress from the eighteenth century to the present day The major authors and publications of the genre and significant subgenres are covered Additionally there are entries on fields of science and technology which have been particularly prolific in provoking such speculation The list of acronyms and abbreviations the chronology covering the literature from the 1700s through the present the introductory essay and the dictionary entries provide science fiction novices and enthusiasts as well as serious writers and critics with a wonderful foundation for understanding the realm of science fiction literature The
