The Geographies of COVID-19 Melinda Laituri, Robert B. Richardson, Junghwan Kim, 2022-10-31 This volume of case studies focuses on the geographies of COVID 19 around the world These geographies are located in both time and space concentrating on both first and second order impacts of the COVID 19 pandemic First order impacts are those associated with the immediate response to the pandemic that include tracking number of deaths and cases testing access to hospitals impacts on essential workers searching for the origins of the virus and preventive treatments such as vaccines and contact tracing Second order impacts are the result of actions practices and policies in response to the spread of the virus with longer term effects on food security access to health services loss of livelihoods evictions and migration Further the COVID 19 pandemic will be prolonged due to the onset of variants as well as setting the stage for similar future events This volume provides a synopsis of how geography and geospatial approaches are used to understand this event and the emerging new normal The volume's approach is necessarily selective due to the global reach of the pandemic and the broad sweep of second order impacts where important issues may be left out However the book is envisioned as the prelude to an extended conversation about adaptation to complex circumstances using geospatial tools Using case studies and examples of geospatial analyses this volume adopts a geographic lens to highlight the differences and commonalities across space and time where fundamental inequities are exposed the governmental response is varied and outcomes remain uncertain This moment of global collective experience starkly reveals how inequality is ubiquitous and vulnerable populations those unable to access basic needs are increasing This place based approach identifies how geospatial analyses and resulting maps depict the pandemic as it ebbs and flows across the globe Data driven decision making is needed as we navigate the pandemic and determine ways to address future such events to enable local and regional governments in prioritizing limited resources to mitigate the long term consequences of COVID 19

From the Civil Rights Pioneers to the First African American President and Beyond Darryl Lezama, 2014-06-26 The book From The Civil Rights Pioneers to The First African American President and Beyond is a description of some significant events that have impacted our culture in negative and positive ways The negative aspects of some of the events in the book is indicative of the kind of destructive behaviors that project some of the worst aspects of our culture people and nation Nevertheless as stated by our president regarding race relations injustice violence and crime in general in America we are better than this we must summon our better angels as we interact with each other The book in a sense is a challenge for us to examine the negative so that we can change those painful experiences into moments of learning and enhancing our attitudes and treatment of each other regardless of our national heritage ethnicity cultural differences economic status educational and professional backgrounds and racial differences The book is a brief description of experiences that we should not just ignore since many of our great leaders have sacrificed so much to make sure that our nation fulfils its responsibility to all American citizens in terms of Justice equality civil rights and full access to achieving the American dream as we all pursue freedom and the accomplishment of our God ordained dreams The book is also describing how much progress we have made towards achieving the dream of Dr Martin Luther Kings dream of justice and civil rights for all Americas regardless of race

Building A Learning Nation Chris Pratt, 2019-03-19 In Building a Learning Nation Chris Pratt and Allison Chin use powerful evidence to expose serious fault lines in the English learning and education system The authors show that the result of a thirty year political consensus on education has been growing child mental ill health high levels of educational underachievement major skill shortages and a crisis in the retention and recruitment of teachers Increasing numbers of children leading dysfunctional home lives coupled with ineffective government education and skills policies over decades are identified as the principal causes The book explains how these problems make a defining

contribution to the country's sluggish economic performance and deep social divisions Above all else Building a Learning National provides a compelling case for change Unlike other critiques of contemporary education it provides a well thought out workable alternative promoting lifelong learning for all tackling underachievement supporting families radically changing the conditions within which schools operate and developing the skills the nation needs
