In 1990, obsessive-compulsive disorder (OCD) was ranked in the 10 most disabling of all illnesses, alongside conditions such as osteoarthritis and chronic obstructive pulmonary disease (Murray et al., 1996). That was the last time OCD was assessed as a discrete entity in the Global Burden of Disease studies. In the interceding 30 years, the Australia healthcare system has seen world-leading advances in clinical research driven by collectives for dementia, psychosis, eating disorders and autism. People with OCD and related disorders (OCDs) have not yet benefitted from this type of evolution in research and service provision. COVID-19 has underscored the urgency for action by triggering presentations of new cases and deterioration of previously well-managed symptoms. The time for action on OCD is now. We propose radical transformation of clinical research and service resourcing and organisation in Australia by way of strengthened collaboration between consumers, carers, clinical services, professional bodies, policymakers, and researchers.

## Prevalence and burden

OCD affects 1 in 50 people in their lifetime, that is, 140 million people globally, including 500,000 people across Australia (Ruscio et al., 2010). It is associated with functional impairments across home life, social life, work/school and overall quality of life in addition a \$3.4 billion annual loss to the Australian economy, accounting for both direct (e.g. healthcare) and

indirect (e.g. lost productivity) costs (McCallum et al., 2019). Fortunately, we know what age most people will develop OCD symptoms – during the two peaks of onset in late childhood or early adulthood respectively – and so targeted early detection and intervention is indicated for this critical window.

## Need for clinical service enhancement

In addition to high prevalence and severity, OCD is associated with a long duration of illness. Moreover, Australian data show that people with OCD wait 9 years for treatment (Cooper et al., 2022). The reasons for these delays to diagnosis and treatment include factors relating to patients (e.g. secrecy), clinicians (e.g. training and supervision) and services (e.g. adequate resourcing) (Cooper et al., 2022). Fortunately, OCD can be reliably detected through brief, routine screening measures, which can address some of these factors. Indeed, universal screening for OCDs has been proposed in other countries, such as the United Kingdom, based on the high prevalence, burden, lifespan course and delays in access to care. We propose that there is a demand for routine screening of OCD in Australia.

If detected, there are validated, reliable assessment and diagnosis measures, assessing symptoms, severity, family accommodation, global functioning and quality of life. More importantly, there are numerous

evidence-based treatment options for OCD, including psychological therapy, medications and neurostimulation. Cognitive-behavioural therapy with exposure and response prevention (ERP) is the first-line evidence-based treatment. ERP achieves treatment response in approximately two-thirds of patients across the lifespan, although remission rates are somewhat more favourable in children and adolescents – underscoring the need for early intervention. Selective serotonin reuptake inhibitors are more accessible than ERP and offer a moderate effect size. Repetitive transcranial magnetic stimulation and deep transcranial magnetic stimulation have an emerging evidence-base, supported by RCTs, particularly for treatment-resistant OCD (Lusicic et al., 2018). **Consider What the Angels Say** George DeVangelos, 2016-08-31 Our world now and throughout history has had conflicting accounts of the nature of God and man's relationship to this cosmic deity These conflicts have wrecked havoc within the societies of humanity to dangerous levels Mankind has relied upon his sacred and canonized scriptures to provide doctrinal absolutes for his religions but these absolutes differ and therefore cannot possibly all be correct at least in specific contexts However there exist a very mysterious book circulating worldwide that does have specific detailed and consistent answers to all of our questions The origin of this book is steeped in mystery and no human author has claimed ownership to its teachings which cover 2097 pages of intensive reading and exhaustive information This book is known as the Urantia Book and has been placed in the public domain The Urantia Book takes us from the conceptual locations within our segregated religious heritage and correctively re-calibrates our various belief systems which have been unavoidably limited and distorted by our world views throughout human history After its conceptual enhancements and adjustments the Urantia Book enlarges such informational details into an elevation of more exact universal levels of perception as an advancement of cosmic truth Consider What the Angels Say takes this expansive and intricately complicated

book and presents a timesaving presentation of its teachings and gently correlates it with Christian doctrines and other religions as well as human philosophy and knowledge In this book the following questions will be answered What exactly is God and how does this phenomenon relate to infinite reality the time and space cosmos other spiritual beings and our world Exactly what is the Godhead Trinity and why is it a necessary foundation for the existence of universal reality What are angels and spiritual principalities What are their levels and types and how do they interface and interact between supernatural and human situations How does the historical Jesus Christ fit into the spiritual dimensions of reality How is he related to the one eternal God and how is Jesus an integral part of our soul salvation How was man physically created and what accounts for the variances in human biological races and how does this correlate with the theory of evolution What is the nature of the human soul and how is it translated into the eternal spiritual realities and how does it exist beyond death and what is its destiny How did mankind come to develop and organize his cultures and what part did supernatural spiritual beings play in the formulations of man s religious doctrines Why has there been so much tragedy hardship war disease and social discord throughout our history What is the nature of sin and why does evil even exist Something is not right what went wrong In all of the versions of religious theologies and doctrines worldwide no one book explains the details of these universal mysteries as completely and systematically as the Urantia Book it is truly a gift from the angels Consider What the Angels Say is a concentrated effort forged from the heartfelt love and concern for humanity to introduce this majestic angelic book to all who are able to receive and benefit form its supernatural information
