modern thread; no doubt somebody showing off his expertise pointed out the error to the seller, or merely allowed him to see it by the way he examined the dolls.

Figures 1–3 show the original and two copies of a Chavín stone bowl from the North coast of Peru, ca. 1000–400 B.C. The richly carved bottom of the original in the Brooklyn Museum (Fig. 1) presents a snarling semihuman monster who holds a severed human head in one hand and a rectangular blade in the other. His body, seen displayed from above, is decorated with other trophy heads. His rump is composed of a spiral shell from which a serpent emerges.

A modern copy of the Brooklyn Museum bowl (Fig. 2) is made of a different kind of stone. Its carving lacks the monumentality and the almost baroque plasticity of modeling characteristic of the original. The forger has failed to include any of the short teeth in the principal and subsidiary heads. Only the crudely rendered fangs of the monster remain, and these fail to extend over and press into the lips. The perpetrator of this aesthetic crime, besides being a very poor observer, may have made such a bad job
