Fame And Architecture:

Fame + Architecture, 2002-03-15 Fame is the lifeblood of architecture Throughout history fame has motivated architects and their clients to build ever more ambitious schemes In recent years the power of the media and the force of celebrity have intensified this Some kind of public profile or degree of publicity has become essential to any thriving architectural practice Fame and Architecture examines the dynamics behind the fame game in architecture examining it from a historical perspective its impact on education and the way in which contemporary architects negotiate it This outstanding issue also includes interviews with world famous architects including Lord Foster of Thames Bank Fame + Architecture Julia Chance, Torsten Schmiedeknecht, 2002-03-15 Fame is the lifeblood of architecture Throughout history fame has motivated architects and their clients to build ever more ambitious schemes In recent years the power of the media and the force of celebrity have intensified this Some kind of public profile or degree of publicity has become essential to any thriving architectural practice Fame and Architecture examines the dynamics behind the fame game in architecture examining it from a historical perspective its impact on education and the way in which contemporary architects negotiate it This outstanding issue also includes interviews with world famous architects including Lord Foster of Thames Bank *Famous* Brendan M. Lee, DaeWha Kang, Justin Kwok, 2005 This issue of Perspecta discusses whether fame empowers architecture by giving architects leverage to produce ambitious projects or undermines architecture by diluting the quality and neglecting the values it must serve Does fame empower architecture or undermine it Does the star power or cult status of an architect enhance the art or dilute it This issue of Perspecta the oldest and most distinguished student edited university based American architecture journal examines the inner workings of fame as it relates to architecture through media and culture It looks at how the commodification of architecture affects the design process whether fame emphasizes all the wrong aspects of architecture or provides the only way an architect can produce truly ambitious projects How does architecture generate fame And how does fame generate architecture Celebrity permeates all levels of contemporary society architecture academia the architectural press and the mainstream media all play a role in promoting the mystique of the designer genius The tradition of learning through apprenticeship and the struggle to have projects commissioned and built perpetuate the importance of the famous architect Does this serve architecture or only the architectural star The contributors to Perspecta examine both sides of the argument Architecture moves forward through a process of innovation fame provides the architect with the leverage needed to accomplish innovation Or is it that fame because of its relationship to the media and popular tastes inevitably dilutes the quality of the architecture Does famous architecture glorify only itself and neglect the people the values and the functions that it must serve **An Architect's Guide to Fame** Paul Davies, Torsten Schmiedeknecht, Julie Cook, 2005 Behind the scenes look at how to become a star architect Architecture's Evil Empire? Miles Glendinning, 2010-10-15 From Chicago to Toronto to Shanghai cities around the world have sprouted iconic buildings by

celebrity architects like Frank Gehry and Daniel Libeskind that compete for attention both on the skyline and in the media. But in recent years criticism of these extreme gestural structures known for their often exaggerated forms has been growing. Miles Glendinning's impassioned polemic *Architecture's Evil Empire* looks at how today's trademark architectural individualism stretches beyond the well-known works and ultimately extends to the entire built environment. Glendinning examines how the global empire of the current modernism emerged particularly in relation to the excesses of global capitalism and explains its key organizational and architectural features placing its most influential theorists and designers in a broader context of history and artistic movements. Arguing against the excesses of iconic architecture, Glendinning advocates a vision of modern renewal that seeks to remedy the shattered and alienated look he sees in contemporary architecture. Mingling scholarship with wry humor and a genuine concern for the state of architecture, *Architecture's Evil Empire* will raise many heated debates and appeal to a wide range of readers from architects to historians interested in the built environment.

Jean-Pierre Chupin, Carmela Cucuzzella, Bechara Helal, 2015-01-26. Winner of the 2016 Bronze medal in Architecture Independent Publisher Book Awards. This book comprises a series of 22 case studies by renowned experts and new scholars in the field of architecture competition research. In 2015 it constitutes the most comprehensive survey of the dynamics behind the definition, organization, judging, archiving and publishing of architectural landscape and urban design competitions in the world. These richly documented contributions revolve around a few questions that can be summarized in a two-fold critical interrogation: How can design competitions, these historical democratic devices both praised and dreaded by designers, be considered laboratories for the production of environmental design quality and ultimately for the renewing of culture and knowledge? Includes 340 illustrations, bibliographical references and index of over 200 cited competitions.

Keywords: Architecture, International competitions, Architectural judgment, Design thinking, Digital archiving, databases, Architectural publications, Architectural experimentation, Landscape architecture, Urban studies.

Peter Raisbeck, 2019-11-08. This book provides a clear sighted analysis which suggests that architectural design may yet shape and order the future of cities. A clear argument that emerges is that to retain their future agency, architects must understand the contours and ecologies of practice that constitute the global system of architectural production.
