*Family Influences on Childhood Behavior and Development* Thomas P. Gullotta, Gary M. Blau, 2008-04-17 Irrespective of theoretical orientation families matter Families are the entity in which children are introduced to words objects shapes and colors Families are the people related in a myriad of conventional and unconventional ways that clothe bathe and feed its biological and acquired offspring Influenced by race ethnicity income and education families relate not only to each other within the unit but to others in the neighborhood the community and beyond This book is about families and their children This book is about those times when the family unit experiences distress This distress may be found in the serious illness of a child or a parent It may be the result of a reconfiguration of the family as in divorce and remarriage Or it may involve the harming of a family member sexually or physically In this volume the authors explore what family means today what functions it serves and those circumstances that can make family life painful Importantly the authors provide readers with clearly written information drawn from the most recent scientific investigations suggesting how the topics in this volume might be addressed to either ease that discomfort treatment or prevent its occurrence

**Faith from a Positive Psychology Perspective** Cindy Miller-Perrin, Elizabeth Krumrei Mancuso, 2014-10-01 This book highlights religious faith from a positive psychology perspective examining the relationship between religious faith and optimal psychological functioning It takes a perspective of religious diversity that incorporates international and cross cultural work The empirical literature on the role of faith and cognition faith and emotion and faith and behaviour is addressed including how these topics relate to individuals mental health well being strength and resilience Information on how these faith concepts are relevant to the broader context of relational functioning

in families friendships and communities is also incorporated Psychologists have traditionally focused on the treatment of mental illness from a perspective of repairing damaged habits damaged drives damaged childhoods and damaged brains In recent years however many psychological researchers and practitioners have attempted to re focus the field away from the study of human weakness and damage toward the promotion of a positive psychology of well being among individuals families and communities One domain within the field of positive psychology is the study of religious faith as a human strength that has the potential to enhance individuals optimal existence and well being Toolkit for Working with Juvenile Sex Offenders Daniel S.
