Duesbury, 2011-01-07 For both students and practicing counselors this book fills the gaps that exist between many current academic programs and practitioner s needs for focused training on how to better assist clients with dream interpretations Its main focus is on dreams concerning family members and other major figures in the dreamer s life with whom he or she interacts Readers will first learn how to understand and use their own dreams and then how to apply this in order to facilitate their clients interpretations of dreams They will be amazed and fascinated by the issues emotions and problem solving suggestions that are often revealed as they guide their clients use of a personalized dream interpretation method developed by the author Through the use of a detailed case example of a client and her dreams the author shows how each step of this method can be applied and carried out in practice and is easily integrated with contemporary psychotherapies especially cognitive behavior therapies **Psychodynamic Perspectives on Working with Children, Families, and Schools** Michael O'Loughlin, 2012-12-08 With the push toward accountability and test performance in schools there has been a decline in emphasis on creativity imagination and feelings in schools Psychodynamic Perspectives on Working with Children Families and Schools is designed for students and professionals who are interested in restoring such values to their work with children There is an absence of psychoanalytic ways of thinking in conventional professional discourses of schooling With a few notable exceptions the discourses of child development classroom management early childhood education special education school psychology and school counseling have constructed notions of children and schooling that are often behaviorist instrumental and symptom focused Curriculum too often focuses on acquisition of knowledge and behaviors discipline is conceptualized as compliance and symptoms such as anger school resistance etc are pathologized and reacted to out of context children s special needs are often conceptualized instrumentally and children with complex psychological symptoms are delimited depersonalized or simply removed Professionals who work with children psychodynamically draw on diverse frameworks including the work of Anna Freud the long tradition of the Tavistock Clinic in London e g Anne Alvarez Susan Reid Margaret Rustin Frances Tustin etc the writings of Klein Winnicott and their colleagues French analysts e g Piera Aulagnier Didier Anzieu Laurent Danon Boileau Fran oise Dolto Maud Mannoni and Catherine Mathelin and Italian infant child analyst Alessandro Piontelli This work is valuable but often inaccessible to school professionals because the writing is somewhat specialized and because there is no tradition of teaching such work in professional preparation in those fields This collection is theoretically grounded in that the authors share a commitment to valuing children s emotions and understand the usefulness of psychoanalytic approaches for enhancing children s lives It is laden with examples to invite into this discussion those students and professionals who value these ideas but for whom this
