Family Psychology Science Based Interventions:

Family Psychology Howard A. Liddle, 2002-01 *Family Psychology Science Based Interventions* presents innovative perspectives on the science of family intervention. The editors provide a thorough and concise historical overview of this emerging field which is considered the applied branch of family psychology. Leading experts in the field present therapy techniques, procedures, and research strategies that are empirically based. Contributors stress the need to link research and practice so that the questions targeted by researchers are those confronted by clinicians and the results can directly influence the practice of family therapy. Also emphasized is the need to identify specific patient characteristics that set these patients apart from the rest of the population and if addressed in a more focused manner would enhance the effectiveness of the intervention. Chapters offer strong empirical evidence and the most current developments for the treatment of a wide variety of marriage and family problems. Advances in couples and marital research include conceptual frameworks and treatments aimed at preventing marital distress and divorce and promoting marital adjustment. Chapters on family research discuss promising areas and challenges in moving prevention science into broader community settings, the specific value of prevention efforts, and the role of the family in these efforts. Of particular interest are chapters focusing on contextual considerations which highlight the many ways in which gender and cultural factors can influence core constructs and processes. This book will be a valuable resource for advanced graduate students, family therapists, and family researchers committed to conducting clinically meaningful and scientifically sound intervention research. *Family Psychology Science Based Interventions* presents innovative perspectives on the science of family intervention. The editors provide a thorough and concise historical overview of this

Handbook of Family Therapy Mike Robbins, Tom Sexton, Gerald Weeks, 2004-03-01 This new *Handbook of Family Therapy* is the culmination of a decade of achievements within the field of family and couples therapy emerging from and celebrating the dynamic evolution of marriage and family theory practice and research The editors have unified the efforts of the profession's major players in bringing the most up to date and innovative information to the forefront of both educational and practice settings They review the major theoretical approaches and break new ground by identifying and describing the current era of evidence based models and contemporary areas of application The *Handbook of Family Therapy* is a comprehensive progressive and skillful presentation of the science and practice of family and couples therapy and a valuable resource for practitioners and students alike **The Oxford Handbook of Treatment Processes and Outcomes in**

Psychology Sara Maltzman, 2016-06-15 The *Oxford Handbook of Treatment Processes and Outcomes in Psychology* presents a multidisciplinary approach to a biopsychosocial translational model of psychological treatment across the lifespan It describes cutting edge research across developmental clinical counseling and school psychology social work neuroscience and psychopharmacology The *Handbook* emphasizes the development of individual differences in resilience and mental health concerns including social environmental and epigenetic influences across the lifespan particularly during childhood Authors offer detailed discussions that expand on areas of research and practice that already have a substantive research base such as self regulation resilience defining evidence based treatment and describing client related variables that influence treatment processes Chapters in newer areas of research are also included e g neuroimaging medications as

adjuncts to psychological treatment and the placebo effect. Additionally, authors address treatment outcomes such as evaluating therapist effectiveness, assessing outcomes from different perspectives, and determining the length of treatment necessary to attain clinical improvement. The Handbook provides an entrance to the research as well as hands-on guidance and suggestions for practice and oversight, making it a valuable resource for graduate students, practitioners, researchers, and agencies alike.

Family Therapy Review Robert H. Coombs, 2005. This book offers a clear, readable overview of all the knowledge and skills those training as marriage and family therapists and counselors need to pass final degree program certification or licensing examinations. It is organized into three sections: Basic Clinical Knowledge and Skills, Common Client Problems, and Career Issues. Each chapter includes challenging study questions that enable readers to assess their own level of understanding, 15 true/false questions at the outset, checking on baseline knowledge, 30 multiple-choice questions interspersed through the text, underlining crucial points, and 10 provocative discussion questions at the end facilitating synthesis. Each chapter also provides a glossary of key terms and, in addition to references, annotated suggestions for further reading and Web site exploration. Students and trainees will find *Family Therapy Review: Preparing for Comprehensive and Licensing Examinations* a resource to which they will go on referring long after it has helped them through their examinations. Faculty and established professionals will find it a useful one-stop summary of current thinking about best practice.

Drug Use Trajectories Among Minority Youth Yonette F. Thomas, LeShawndra N. Price, 2016-09-01. This volume examines trajectories of drug use among ethnic minority youth in the United States with a focus on African Americans and Hispanics. It also highlights what research designs have been employed to address these differences as well as suggests strategies for moving this discourse forward by identifying potential targets for prevention and intervention with minority youth. This book features essays by leading experts in the field who have grappled with this issue for decades. Inside, readers will find an insightful dialogue that addresses such questions as: Why are African American and Hispanic youth more likely than their White peers to abstain from drug use during adolescence but are more likely to become problem users later in life? What impact does the stress caused by discrimination have on potential drug use? To what extent does religiosity protect minority youth from drug use as past research suggests that it protects White youth? What is the influence of neighborhood context on exposure to and use of substances among urban African American children? Taken together, the essays in this book identify underexplored risk and protective factors and gaps in the current state of knowledge that can be used to develop effective culturally specific drug abuse prevention strategies. This book is for anyone with an interest in the initiation and escalation of drug use among African Americans and Hispanics, Latinos, and factors that influence these patterns over the life course. It will also be an ideal resource for those interested in better understanding the mechanisms by which risk and protective factors are related to the development of drug use and addiction, particularly the ways in which such factors contribute to health differences and have disproportionately more negative consequences for ethnic minorities.
