Family Welfare ,2004 Family Welfare David R. Green,Alastair Owens,2004-06-30 The history of welfare provision has generally focused on the rise of the so called welfare state and institutional provision for the poor This work widens our understanding of welfare by focusing not on the poor but on those who have some wealth This book offers an exciting new approach to the history of welfare by focusing attention on the complex range of sources of support drawn on to meet family needs *Gender Inequalities, Households and the Production of Well-Being in Modern Europe* Tindara Addabbo,Marie-Pierre Arrizabalaga,Alastair Owens,2016-04-22 Feminist scholars have long pointed out the relevance of the unpaid work that goes on within European households in sustaining the well being of the continent s populations However care work and domestic labour continue to be largely unremunerated and unequally distributed by gender This unique volume of interdisciplinary essays casts new light on the roles that households play in securing the well being of individuals and families uncovering the processes of bargaining and accommodation and conflict and compromise that underpin them Contributors put gender at the centre of their analyses demonstrating the uneven experiences of men and women as both providers and receivers of welfare in European households in both the past and the present As European states grapple with changing family forms a growing population of dependent people increased participation of women in labour markets and a profound shift in the nature and organisation of work this book makes a timely contribution to our understanding of the critical role played by households in mediating processes of economic and social change It offers new challenges to scholars researchers and policy makers eager to address gender inequalities and enhance well being This book is the second of four volumes being published as part of Ashgate s Gender and Well Being series that arise from a programme of international symposia funded by the European Science Foundation under the auspices of COST European Cooperation in the field of Scientific and Technical Research *Negotiations of Gender and Property through Legal Regimes (14th-19th Century)* ,2021-04-26 This volume explores familial wealth arrangements and gendered property from the fourteenth to the nineteenth centuries in Italian German and Austrian territories including Florence Trento Tyrol and Vienna Nordic countries Western Pyrenees and England Family property as capital in the form of houses land movables financial assets and rights were of great importance in the past Arrangements of such property were characterised by a high degree of negotiating competence but likewise they entailed competition between the parties involved and were highly conflict prone Fifteen contributors from Austria Finland France Germany Italy and the UK address different marital property regimes in relation to the practices and legal regulations of inheritance patterns with consideration to inter familial negotiation conflict and resolution Contributors are Marie Pierre Arrizabalaga Laura Casella Isabelle Chabot Siglinde Clementi Simona Feci Ellinor Forster Andrea Griesebner Christian Hagen Margareth Lanzinger Janine Maegraith Silvia Mattivi Beatrice Moring Craig Muldrew Regina Sch fer and Georg Tschannett *Women and Family Property* Beatrice Moring,2024-02-01 This book examines property

legislation and the actual position of women in receiving holding and passing on family property as daughters wives and as widows throughout history Traditionally the prevailing view has been that women have been disadvantaged in the distribution of property and therefore less interesting as objects of study This volume challenges this view and explores the securing of property for families or for individuals through transfers in the shape of dowries marriage contracts wills and other arrangements as well as how women used and distributed the property they were holding The scope of the volume is both urban and rural analysing the position of women in relation to family property through contributions from a wide geographic area The chapters investigate the situation in southern and northern Europe across the Atlantic and Africa throughout the 18th to the 20th century This volume will be of value to academics undergraduates postgraduates and scholars interested in gender and history and social history

The Appeal of Insurance Geoffrey Wilson Clark, Christiane Thomann, 2010-01-01 The Appeal of Insurance is an excellent collection that reflects a growing interest in insurance research within the social sciences Clearly written and accessible to a variety of audiences this is a volume of world class scholarship Luis Lobo Guerrero School of Politics International Relations and Philosophy Keele University In the marketing of its products the insurance industry has always depended on a considerable dose of moral exhortation and enlightened appeal The Appeal of Insurance traces the ways in which insurance over the past three centuries perhaps more than any other business has grown in concert with a clientele largely of its own making Faced with a public that has preferred to avoid confronting the certainty of fatality or the probabilities of catastrophe insurance promoters have had to create a demand for their products first by persuading the public to see the world as ruled less by divine judgments and more by statistical patterns and second by proclaiming a moral imperative of hedging against death and disaster by the prudential recourse to insurance The essays presented here examine the history of insurance as a process of negotiation between the embedded social legal and cultural norms out of which the practice of insurance grew and the new arrangements and sensibilities that insurance itself helped bring into being Today insurance is a global economic colossus and a fixture in the developed countries of the world But neither the financial clout of the insurance industry nor its ubiquity conveys the full measure of its social and political influence The insurance industry has in fact become a primary agent of discipline and control over public and private behaviours by imposing upon them the criterion of insurability By tracing the boundaries of acceptable and compensated from unacceptable and uncompensated risk insurers directly or indirectly govern people products and markets and by this process become one of the most powerful and pervasive agents of social and economic control Geoffrey Clark is a professor in the Department of History at the State University of New York at Potsdam Gregory Anderson is the former Associate Head of the Business School at the University of Salford Christian Thomann is a senior fellow at the Centre for Risk and Insurance at Leibniz University Hanover J Matthias Graf Von Der Schulenburg is the Director of the Centre for Risk and Insurance at Leibniz University Hanover

Constitutionalism, Legitimacy, and Power Kelly L. Grotke, Markus Josef

Prutsch,2014 If one counts the production of constitutional documents alone the nineteenth century can lay claim to being a constitutional age one in which the generation and reception of constitutional texts served as a centre of gravity around which law and politics consistently revolved This volume critically re examines the role of constitutionalism in that period in order to counter established teleological narratives that imply a consistent development from absolutism towards inclusive participatory democracy

Gender and Well-Being in Europe

Lina Gálvez,2016-04-22 This book is the first of four books based on a series of symposia funded by COST which is an intergovernmental framework for the promotion of European Cooperation in the field of Scientific and Technical Research It draws on both historical and contemporary European case studies to offer a sophisticated account of the relationship between gender and well being The authors focus on key discussions of the changing conceptions of well being from early twentieth century calculations of the relationship between income and the cost of living to more recent critiques from feminist writers Their fascinating answers allow them to significantly challenge the issue with the idea that well being is not only associated with income or opulence but also relates to more abstract concepts including capabilities freedom and agency of different women and men and will be of considerable interest to economic and social historians sociologists of health gender sexuality and economists

Gray, 2006 The historical influence of gender on German society and change *The Formation of the Child in Early Modern Spain* Grace E. Coolidge, 2016-03-16 Drawing on history literature and art to explore childhood in early modern Spain the contributors to this collection argue that early modern Spaniards conceptualized childhood as a distinct and discrete stage in life which necessitated special care and concern The volume contrasts the didactic use of art and literature with historical accounts of actual children and analyzes children in a wide range of contexts including the royal court the noble family and orphanages The volume explores several interrelated questions that challenge both scholars of Spain and scholars specializing in childhood How did early modern Spaniards perceive childhood In what framework literary artistic did they think about their children and how did they visualize those children's roles within the family and society How do gender and literary genres intersect with this concept of childhood How did ideas about childhood shape parenting parents and adult life in early modern Spain How did theories about children and childhood interact with the actual experiences of children and their parents The group of international scholars contributing to this book have developed a variety of creative interdisciplinary

approaches to uncover children's lives the role of children within the larger family adult perceptions of childhood images of children and childhood in art and literature and the ways in which children and childhood were vulnerable and in need of protection Studying children uncovers previously hidden aspects of Spanish history and allows the contributors to analyze the ideals and goals of Spanish culture the inner dynamics of the Habsburg court and the vulnerabilities and weaknesses that Spanish society fought to overcome The Routledge History of Women in Early Modern Europe Amanda L.
