Famine In Africa Causes Responses And Prevention:

Famine in Africa von Braun, Joachim, Teklu, Tesfaye, Webb, Patrick, 1999-01-01 Though famine has affected many parts of the world in the twentieth century the conditions that produce famine extreme poverty armed conflict economic and political turmoil and climate shocks are now most prevalent in Africa Researchers differ on how to address this problem effectively but their arguments are often not informed by empirical analysis from a famine context Broadening current theories and models of development for conquering famine Famine in Africa grounds its findings in long term empirical research especially on the impact of famine on households and markets The authors present the results of field work and other research from numerous parts of Africa with a particular focus on Botswana Ethiopia Niger Rwanda Sudan and Zimbabwe With these data the authors explain the factors that cause famines and assess efforts to mitigate and prevent them Famine in Africa is an important resource for international development specialists students and policymakers Food Policy for the Poor Joachim Von Braun, Rajul Pandya-Lorch, 2005-01-01 The Modern World Sarolta Takacs, Mounir Farah, 2015-03-04 Designed to meet the curriculum needs for students from grades 7 to 12 this five volume encyclopedia explores world history from approximately 5000 C E to the present Organized alphabetically within geographical volumes on Africa Europe the Americas the Middle East and Southwest Asia and Asia and the Pacific entries cover the social political scientific and technological economic and cultural events and developments that shaped the modern world Each volume includes articles on history government and warfare the development of ideas and the growth of art and architecture religion and philosophy music science and technology and daily life in the civilizations covered Boxed features include Turning Point Great Lives Into the Twenty First Century and Modern Weapons Maps timelines and illustrations illuminate the text and a glossary a selected bibliography and an index in each volume round out the set **Exploring Strategic Priorities for Regional Agricultural R&D Investments in East and Central Africa** Michael Johnson, 2008 *Encyclopedia of Twentieth-Century African History* Dickson Eyoh, Paul Tiyambe Zeleza, 2005-10-24 With nearly two hundred and fifty individually signed entries the Encyclopedia of Twentieth Century African History explores the ways in which the peoples of Africa and their politics states societies economies environments cultures and arts were transformed during the course of that Janus faced century Overseen by a diverse and distinguished international team of consultant editors the Encyclopedia provides a thorough examination of the global and local forces that shaped the changes that the continent underwent Combining essential factual description with evaluation and analysis the entries tease out patterns from across the continent as a whole as well as within particular regions and countries it is the first work of its kind to present such a comprehensive overview of twentieth century African history With full indexes and a thematic entry list together with ample cross referencing and suggestions for further reading the Encyclopedia will be welcomed as an essential work of reference by both scholar and student of twentieth century African history Choice Outstanding Academic Title 2004 **The New Famines**

Stephen Devereux, 2006-11-22 The recent occurrences of famine in Ethiopia and Southern Africa have propelled this key issue back into the public arena for the first time since 1984 as once again it becomes a priority not only for lesser developed countries but also for the international community Exploring the paradox that is the persistence of famine in the contemporary world this book looks at the way the nature of famine is changing in the face of globalization and shifting geopolitical forces The book challenges perceived wisdom about the causes of famine and analyzes the worst cases of recent years including close analysis of food scarcity in North Korea Ethiopia Sudan and Malawi and less well known cases in Madagascar Iraq and Bosnia With fresh conceptual frameworks and analytical tools major theoretical constructs which have previously been applied to analyze famines such as the democracy ends famine argument Sen's entitlement approach and the complex political emergency framework are confronted This volume assembles an international team of contributors including Marcus Noland Alex de Waal and Dan Maxwell an impressive roster which helps make this book an important resource for those in the fields of development studies and political economics

Harnessing Cultural Capital for Sustainability Munyaradzi Mawere, Samuel Awuah-Nyamekye, 2015-06-20 This book argues that the basic component of any society's social security and sustainability is cultural capital and its ability to fully recognise diversity in knowledge production and advancement However with regard to African societies since the dawn of racial slavery and colonialism cultural capital indigenous knowledge in particular has iniquitously and acrimoniously suffered marginalisation and pejorative ragtags Increasingly since the 1990s cultural capital informed by African knowledge systems has taken central stage in discussions of sustainability and development This is not unrelated with the recognition by America and Europe in particular of the central role that cultural capital could and should assume in the logic of development and sustainability at a global level Unfortunately action has often failed to match words with regard to the situation in Africa The current book seeks to make a difference by exploring the role that African cultural capital could and should assume to guarantee development and sustainability on the continent and globally It argues that lofty pan African ideals of collective self reliance self sustaining development and economic growth would come to naught unless determined and decisive steps are taken towards full recognition of indigenous cultural capital on the continent

Droughts Judith Bloom Fradin, Dennis B. Fradin, 2008 Describes droughts with special eyewitness accounts of the Dust Bowl of the 1930s and the far reaching effects of these disasters Chapters alternate between history and science to bring home the awesome power of nature's fury

Food Aid After Fifty Years Christopher B. Barrett, Dan Maxwell, 2007-05-07 This book analyzes the impact food aid programmes have had over the past fifty years assessing the current situation as well as future prospects Issues such as political expediency the impact of international trade and exchange rates are put under the microscope to provide the reader with a greater understanding of this important subject matter This book will prove vital to students of development economics and development studies and those working in the field

The 1998 Floods in Bangladesh Carlo Del

Ninno,2001-01-01 In 1998 the flood of the century covered more than two thirds of Bangladesh causing crop losses of 2 04 million tons of rice an amount equal to 10 45 percent of target production in 1998 99 This flood threatened the health and lives of millions through food shortages caused by crop failure loss of purchasing power and the spread of water borne disease Yet very few flood related deaths occurred and reportedly none was due to food shortages This report based on data from a survey of 757 rural households in seven flood affected regions thanas conducted in November and December 1998 and on analysis of secondary data on food grain markets describes how Government of Bangladesh policy well functioning private markets household coping strategies and donor and NGO interventions combined to avert a major food crisis To further enhance its food security Bangladesh needs continued investments in agricultural research extension roads electricity and other rural infrastructure policies promoting efficient markets and programs to provide targeted transfers and credit to poor households

Climate Change and Vulnerability and Adaptation Neil Leary,2013-07-04 Sound and solid case studies on vulnerability and adaptation have been woefully lacking in the international discourse on climate change This set of books begins to bridge the gap Achim Steiner UN Under Secretary General and Executive Director of United Nations Environment Programme Important reading for students and practitioners alike Martin Parry Co Chair Working Group II Impacts Adaptation and Vulnerability Intergovernmental Panel on Climate Change IPCC Fills an important gap in our understanding It is policy relevant and deserves to be widely read Richard Klein Senior Research Fellow Stockholm Environment Institute SEI Sweden The Intergovernmental Panel on Climate Change IPCC concluded in its 2001 report that much of the developing world is highly vulnerable to adverse impacts from climate change But the IPCC also concluded that the vulnerabilities of developing countries are too little studied and too poorly understood to enable determination of adaptation strategies that would be effective at reducing risks These authoritative volumes resulting from the work of the Assessments of Impacts and Adaptations to Climate Change AIACC project launched by the IPCC in 2002 are the first to provide a comprehensive investigation of the issues at stake Climate Change and Vulnerability discusses who is vulnerable to climate change the nature of their vulnerability and the causes of their vulnerability for parts of the world that have been poorly researched until now Climate Change and Adaptation covers current practices for managing climate risks to food security water resources livelihoods human health and infrastructure needs for effective management of climate risks the changing nature of the risks strategies for adaptation and the need to integrate these strategies into development planning and resource management

Encyclopedia of Environment and Society Paul Robbins,2007-08-27 As befits the topic this beautifully packaged wonderfully illustrated interdisciplinary resource has more than 1200 entries written by specialists A helpful reader s guide groups topics like agriculture conservation and ecology movements and regulations politics pollution and society A resource guide chronology glossary and list of the UN s economic indicators complete the set Library Journal this important work gives a well focused snapshot of environmentalism in the early 21st Century and it will remain valuable into the future both

for its content and as a yardstick to measure progress toward sustainability and conservation

Summing Up Recommended Undergraduates and general readers CHOICE Booklist Editors Choice 2008 This superb interdisciplinary work should find a place on the shelves of every public and academic library that has the least bit of interest in environment issues which should mean just about all

Booklist Starred Review Where does the environment leave off and society begin When expanding production and consumption drives greenhouse gas emissions that warm the planet which in turn influence the conditions of economic expansion it is unclear where the climate ends and the economy begins This fact is not new to our era however our social and natural sciences have only recently come to grips with the incredible complexity of the world described by understanding the environment and society as being of a piece As a result in the last decade there has been an unprecedented explosion of new concepts theories facts and techniques that follow from such an understanding

The Encyclopedia of Environment and Society brings together multiplying issues concepts theories examples problems and policies with the goal of clearly explicating an emerging way of thinking about people and nature With more than 1 200 entries written by experts from incredibly diverse fields this innovative resource is a first step toward diving into the deep pool of emerging knowledge The five volumes of this Encyclopedia represent more than a catalogue of terms Rather they capture the spirit of the moment a fascinating time when global warming and genetic engineering represent only two of the most obvious examples of socio environmental issues

Key Features Examines many new ideas about how the world works what creates the daunting problems of our time and how such issues might be addressed whether by regulation markets or new ethics Demonstrates how theories of environmental management based on market efficiency may not be easily reconciled with those that focus on population and both may certainly diverge from those centering on ethics justice or labor Offers contributions from experts in their fields of specialty including geographers political scientists chemists anthropologists medical practitioners development experts and sociologists among many others Explores the emerging socio environmental problems that we face in the next century as well as the shifting and expanding theoretical tools available for tackling these problems Covers regions of North America in greater detail but also provides a comprehensive picture that approaches as effectively as possible a cohesive global vision

Key Themes Agriculture Animals Biology and Chemistry Climate Conservation and Ecology Countries Geography History Movements and Regulations Organizations People Politics Pollution Society Packed with essential and up to date information on the state of the global socio environment the Encyclopedia of Environment and Society is a time capsule of its historic moment and a record of where we stand at the start of the 21st century making it a must have resource for any library These inspiring volumes provide an opportunity for more new ways of thinking behaving and living in a more than human world

Transient Workspaces Clapperton Chakanetsa Mavhunga, 2014-09-19 An account of technology in Africa from an African perspective examining hunting in Zimbabwe as an example of an innovative mobile workspace In this book Clapperton Mavhunga views technology in Africa from an African

perspective Technology in his account is not something always brought in from outside but is also something that ordinary people understand make and practice through their everyday innovations or creativities including things that few would even consider technological Technology does not always originate in the laboratory in a Western style building but also in the society in the forest in the crop field and in other places where knowledge is made and turned into practical outcomes African creativities are found in African mobilities Mavhunga shows the movement of people as not merely conveyances across space but transient workspaces Taking indigenous hunting in Zimbabwe as one example he explores African philosophies of mobilities as spiritually guided and of the forest as a sacred space Viewing the hunt as guided mobility Mavhunga considers interesting questions of what constitutes technology under regimes of spirituality He describes how African hunters extended their knowledge traditions to domesticate the gun how European colonizers with no remedy of their own turned to indigenous hunters for help in combating the deadly tsetse fly and examines how wildlife conservation regimes have criminalized African hunting rather than enlisting hunters and their knowledge as allies in wildlife sustainability The hunt Mavhunga writes is one of many criminalized knowledges and practices to which African people turn in times of economic or political crisis He argues that these practices need to be decriminalized and examined as technologies of everyday innovation with a view toward constructive engagement innovating with Africans rather than for them

Coping with Climate Variability Karen O'Brien, Colleen Vogel, 2017-11-22 This title was first published in 2003 Recent food shortages in Southern Africa induced by rainfall variability but compounded by problems of governance and rising food prices have resulted in massive relief efforts A recent scientific innovation supplying farmers with seasonal climate forecasts has been touted as a way to increase preparedness for such situations This book examines how climate forecasts are used by the agricultural community in Southern Africa Based on a workshop funded by the World Bank it covers a broad set of issues related to the use of seasonal forecasts including factors that constrain users capacities to respond Case studies presented in the book explore how forecasts can potentially increase production and food security among a population highly dependent on agriculture and vulnerable to climate variability The book reflects on how the production delivery and uptake of seasonal forecasts might be improved as well as the limitations to their usefulness and it should catalyse future thinking and research in this field

The Triangle of Microfinance Manfred Zeller, Richard L. Meyer, 2002-01-01 Since the 1980s when the microfinance revolution began much has been accomplished but the field became more refined in the 1990s as a result of shifts in paradigms strategies and development practices This volume addresses the three policy objectives that now occupy those who wish to use credit as a development tool financial sustainability of microfinance institutions outreach to the poor and welfare impact Inevitable tradeoffs exist among these objectives and the book advances an analytical framework that assists students of and experts in microfinance to identify the tradeoffs and synergies at the institutional level and in the policy environment The book features a wealth of empirical data and innovative analytical studies and critically discusses the

role of public support for microfinance institutions MFIs in light of the social costs and benefits generated by such financial systems The book is organized into five parts The first discusses the demand for and access to financial services by the poor emphasizing that demand oriented pro poor financial services are crucial in reaching the poor The second is concerned with two of the criteria used to evaluate MFIs outreach and financial sustainability The third features innovative econometric studies seeking to evaluate the impact of MFIs at the household level The fourth looks at the role of both public and private sector institutions in developing sustainable financial systems And the fifth summarizes implications for policy and research Given the lack of sound empirical literature on microfinance this volume is sure to advance knowledge and research methodology in the field

Food Security, Food Prices and Climate Variability Molly E. Brown, 2014-06-05 The agriculture system is under pressure to increase production every year as global population expands and more people move from a diet mostly made up of grains to one with more meat dairy and processed foods This book uses a decade of primary research to examine how weather and climate as measured by variations in the growing season using satellite remote sensing has affected agricultural production food prices and access to food in food insecure regions of the world The author reviews environmental economics and multidisciplinary research to describe the connection between global environmental change changing weather conditions and local staple food price variability The context of the analysis is the humanitarian aid community using the guidance of the USAID Famine Early Warning Systems Network and the United Nations World Food Program in their response to food security crises These organizations have worked over the past three decades to provide baseline information on food production through satellite remote sensing data and agricultural yield models as well as assessments of food access through a food price database These datasets are used to describe the connection and to demonstrate the importance of these metrics in overall outcomes in food insecure communities

Food Insecurity, Vulnerability and Human Rights Failure Basudeb Guha-Khasnobis, Shabd S. Acharya, Benjamin Davis, 2007-10-11 This volume discusses the significance of human rights approaches to food and the way it relates to gender considerations addressing links between hunger and the HIV AIDS pandemic agricultural productivity and the environment

Development as Freedom Amartya Sen, 2011-05-25 By the winner of the 1988 Nobel Prize in Economics an essential and paradigm altering framework for understanding economic development for both rich and poor in the twenty first century Freedom Sen argues is both the end and most efficient means of sustaining economic life and the key to securing the general welfare of the world's entire population Releasing the idea of individual freedom from association with any particular historical intellectual political or religious tradition Sen clearly demonstrates its current applicability and possibilities In the new global economy where despite unprecedented increases in overall opulence the contemporary world denies elementary freedoms to vast numbers perhaps even the majority of people he concludes it is still possible to practically and optimistically restrain a sense of social accountability Development as Freedom is essential reading
