Heaven and Earth John A. Goodall, 1979 **Heaven and Earth** John A. Goodall, 1979 Heaven and Earth John A. History of Azuki Beans Worldwide (300 BCE to 2021) William Shurtleff; Akiko Aoyagi, 2021-10-18 One of the Goodall, 1979 world's most comprehensive well documented and well illustrated book on this subject With extensive subject and geographic index 104 photographs and illustrations mostly color Free of charge in digital PDF format Encyclopaedias of New Global Knowledge (1870-1930) Milena Doleželová-Velingerová, Rudolf G Wagner, 2013-08-04 This is a set of pioneering studies on Chinese encyclopaedias of modern knowledge 1870 1930 At a transitional time when modern knowledge was sought after yet few modern schools were available these works were crucial sources of information for an entire generation This volume investigates many of these encyclopaedias which were never reprinted and are hardly known even to specialists for the first time The contributors to this collection all specialize in the period in question and have worked together for a number of years The resulting studies show that these encyclopaedias open a unique window onto the migration and ordering systems of knowledge across cultural and linguistic borders The Making of the Chinese State Leo K. Shin, 2006-07-03 In this well crafted study of the relationships between the state and its borderlands Leo Shin traces the roots of China's modern ethnic configurations to the Ming dynasty 1368 1644 Challenging the traditional view that China s expansion was primarily an exercise of incorporation and assimilation Shin argues that as the centre extended its reach to the wild and inaccessible south the political interests of the state the economic needs of the settlers and the imaginations of the cultural elites all facilitated the demarcation and categorisation of these borderland non Chinese populations The story told here however extends beyond the imperial period Just as Ming emperors considered it essential to reinforce a sense of universal order by demarcating the non Chinese modern day Chinese rulers also find it critical to maintain the myth of a unified multi national state by officially recognising a total of fifty six nationalities **Continuum Encyclopedia of Animal Symbolism in World Art** Hope B. Werness, 2006-01-01 Animals and their symbolism in diverse world cultures and different eras of human history are chronicled in this lovely volume East Asian Cartographic Print Culture Alexander Akin, 2025-10-01 Alexander Akin examines how the expansion of publishing in the late Ming dynasty prompted changes in the nature and circulation of cartographic materials in East Asia Focusing on mass produced printed maps East Asian Cartographic Print Culture The Late Ming Publishing Boom and its Trans Regional Connections investigates a series of pathbreaking late sixteenth and early seventeenth century works in genres including geographical education military affairs and history analysing how maps achieved unprecedented penetration among published materials even in the absence of major theoretical or technological changes like those that transformed contemporary European cartography By examining contemporaneous developments in neighboring Choson Korea and Japan this book demonstrates the crucial importance of considering the East Asian sphere in this period as a network of communication and publication rather than as discrete

national units with separate cartographic histories It also reexamines the Jesuit printing of maps on Ming soil within the broader context of the local cartographic publishing boom and its trans regional repercussions History of Sov Nutritional Research (200 BCE to 1945) William Shurtleff; Akiko Aoyagi, 2021-01-26 The world's most comprehensive well documented and well illustrated book on this subject With extensive subject and geographical index 95 tables photographs and illustrations Free of charge in digital PDF format on Google Books Qing Colonial Enterprise Laura Hostetler, 2005-12-15 In Qing Colonial Enterprise Laura Hostetler shows how Qing China 1636 1911 used cartography and ethnography to pursue its imperial ambitions She argues that far from being on the periphery of developments in the early modern period Qing China both participated in and helped shape the new emphasis on empirical scientific knowledge that was simultaneously transforming Europe and its colonial empires at the time Although mapping in China is almost as old as Chinese civilization itself the Qing insistence on accurate to scale maps of their territory was a new response to the difficulties of administering a vast and growing empire Likewise direct observation became increasingly important to Qing ethnographic writings such as the illustrated manuscripts known as Miao albums from which twenty color paintings are reproduced in this book These were intended to educate Qing officials about various non Han peoples so that they could govern these groups more effectively Hostetler's groundbreaking account will interest anyone studying the history of the early modern period and colonialism
