Heavy Flavours:

Heavy Flavours II A. J. Buras, Manfred Lindner, 1998 This volume is a collection of review articles on the most outstanding topics in heavy flavour physics All the authors have made significant contributions to this field The book reviews in detail the theoretical structure of heavy flavour physics and confronts the Standard Model and some of its extensions with existing experimental data This new edition covers new trends and ideas and includes the latest experimental information Compared to the previous edition interesting new activities are included and some of the key contributions are updated Particular attention is paid to the discovery of the top quark and the determination of its mass *Heavy Flavours* F. Grancagnolo, F.-L. Navarria, 2016-06-04 Heavy Flavours covers the proceedings of the Third Topical Seminar on Heavy Flavours held in San Miniato Italy on June 17 21 1991 The book focuses on the reactions properties characteristics and transformations of heavy flavors The publication first offers information on flavor factories and monochromatization as the way to maximum luminosity B factories as well as design strategies and parameters requirements luminosity limitations and B factory with monochromatization and vertical separation The book then ponders on theoretical results in heavy quark hadroproduction heavy flavor production at high energies and leptonic decay constants of heavy mesons The book examines heavy baryon transitions and the heavy quark effective theory non universality of nucleon sea distributions probed by neutrinos and muons and heavy flavor physics at hadron colliders The publication is a dependable reference for readers interested in the study of heavy flavors

Heavy Flavours A J Buras, M Lindner, 1992-11-26 This volume is a collection of review articles on the most outstanding topics in heavy flavour physics All the authors have made significant contributions to this field The book reviews in detail the theoretical structure of heavy flavour physics within the Standard Model and its confrontation with existing experimental data The physics of the top quark and of the Higgs play an important role in this volume Beginning with radiative electroweak corrections and their impressive tests at LEP and hadron colliders the book summarizes the present status of quark mixing CP violation and rare decays The dynamics of exclusive D and B meson decays the lepton physics and the newly discovered heavy quark symmetries are discussed in detail The impact of strong interactions on weak decays is clearly visible in many articles The physics of heavy flavours at LEP HERA and hadron colliders constitutes an important part of the book Another significant topic is the possible role of heavy flavours in the spontaneous symmetry breaking of gauge symmetries Finally the most recent advances in lattice calculations of the properties of heavy flavours and the lattice studies of the dynamics of heavy flavours are presented Advanced Study Conference on Heavy Flavours , 1994

Heavy Flavours and High-Energy Collisions in the 1-100 TeV Range A. Ali, L. Cifarelli, 2013-11-21 The present volume is based on the proceedings of the 6th and 7th INFN ELOISATRON project workshops held at the Centro di Cultura Scientifica Et tore Majorana CCSEM Erice Trapani Sicily Italy in the period June 10 27 1988 The topics of the two workshops were respectively Heavy Flavours Status and Perspectives and Novel Features of

High Energy Collisions in 1 100 TeV Region They were attended by sixty three physicists The two workshops were followed by a meeting of the INFN ELOISATRON working group also held at the CCSEM in the period October 7 15 1988 in which twenty five physicists participated Since there was quite a bit of overlap among speakers participants and the topics covered at the three meetings we have decided to issue a joint proceeding with the first part entitled Heavy Flavour Physics and the second High Energy Physics with 1 100 TeV Proton Beams Some of the reports included in this volume have been contributed by the INFN ELOISATRON working group members The first part of these proceedings deals mostly with the presentation and interpretation of results in the so called flavour physics sector New results which have become available in the last three years from experiments involving kaons charmed and beauty hadrons and searches for the still missing top quark at the present and forthcoming colliders are topics of major interest here The contributions in this part are organized in three categories Experimental Results Theoretical Interpretation and Future Directions
