Hectorneri Castafeda:

Hector-Neri Castañeda James E. Tomberlin, 1986-03-31 The aim of this series is to inform both professional philosophers and a larger readership of social and natural scientists methodologists mathematicians students teachers publishers etc about what is going on who's who and who does what in contemporary philosophy and **PROFILES** is designed to present the research activity and the logic results of already outstanding personalities and schools and of newly emerging ones in the various fields of philosophy and logic There are many *Festschrift* volumes dedicated to various philosophers There is the celebrated Library of Living Philosophers edited by P A Schipp whose format influenced the present enterprise Still they can only cover very little of the contemporary philosophical scene Faced with a tremendous expansion of philosophical information and with an almost frightening division of labor and increasing specialization we need systematic and regular ways of keeping track of what happens in the profession **PROFILES** is intended to perform such a function Each volume is devoted to one or several philosophers whose views and results are presented and discussed The profiled philosopher's will summarize and review his their own work in the main fields of significant contribution This work will be discussed and evaluated by invited contributors Relevant historical and or biographical data an up to date bibliography with short abstracts of the most important works and whenever possible references to significant reviews and discussion will also be included

Castañeda and his Guises Adriano Palma, 2014-08-25 This volume responds to and reassesses the work of Hector Neri Castañeda 1924 1991 The essays collected here written by his students followers and opponents examine Castañeda's seminal views on deontic logic metaethics indexicality fictions and metaphysics utilizing the critical viewpoint afforded by time as well as new data to offer insights on his theories and methodology **Hector-Neri Castañeda H.**

Tomberlin, 1986-03-31 *Agent, Language, and the Structure of the World* Hector-Neri Castañeda, James E. Tomberlin, 1983

Thinking, Language, and Experience Hector-Neri Castañeda, 1989-06-12 *Thinking Language and Experience* was first published in 1989 Hector Neri Castañeda's intricate and provocative essays have been widely influential especially his work in epistemology and ethics and his theory on the relation of thought to action The fourteen essays in *Thinking Language and Experience* half of them written expressly for this volume demonstrate the breadth and richness of his recent work on the unitary structure of human experience A comprehensive unified study of phenomena at the intersection between experience thinking language and reality this book focuses on singular reference that is reference to individuals insofar as they are thought of as individuals indicators quasi indicators proper names singular descriptions Castañeda establishes a large number of new facts linguistic semantic psychological and sociological about the workings of language in human experience and from them develops a network of new theories all grounded in his comprehensive Guise Theory These theories offer a systematic account for the structure of human experience and the world at large the mental powers required to think of the world and to undergo experiences self consciousness the language for thinking of other minds perception and the interaction between

indexical reference and perceptual fields and the role of subjectivity in perception and intentional action *Thought, Language, and Ontology* Francesco Orilia, W.J. Rapaport, 2012-12-06 The late Hector Neri Castañeda the Mahlon Powell Professor of Philosophy at Indiana University and founding editor of *Noûs* has deeply influenced current analytic philosophy with diverse contributions including guise theory the theory on indicators and quasi indicators and the proposition practice theory This volume collects 15 papers for the most part previously unpublished in ontology philosophy of language cognitive science and related areas by ex students of Professor Castañeda most of whom are now well known researchers or even distinguished scholars The authors share the conviction that Castañeda's work must continue to be explored and that his philosophical methodology must continue to be applied in an effort to further illuminate all the issues that he so deeply investigated The topics covered by the contributions include intensional contexts possible worlds quasi indicators guise theory property theory Russell's substitutional theory of propositions event theory the adverbial theory of mental attitudes existentialist ontology and Plato's Leibniz's Kant's and Peirce's ontologies An introduction by the editors relates all these themes to Castañeda's philosophical interests and methodology *Thinking and the Structure of the World / Das Denken und die Struktur der Welt* Klaus Jacobi, Helmut Pape, 2011-08-02 No detailed description available for *Thinking and the Structure of the World* *Das Denken und die Struktur der Welt* **Intentionality, Minds, and Perception** Hector-Neri Castañeda, 1967 *Morality and the language of conduct* Hector-Neri Castañeda, 1963 **Self-reference and Self-awareness** Andrew Brook, Richard C. DeVidi, 2001 Rich in precursors Kant and Frege and stimulated by Castañeda's study in the logic of self consciousness and Shoemaker's seminal paper *Self reference and self awareness* the work of the past thirty five years on self reference and self awareness has generated a wealth of deep sophisticated philosophy This volume explores the historical anticipations in Kant and Frege brings four classic contributions together in one place and offers five new studies Series A *Thinking and Doing* Hector-Neri Castañeda, 1975-09-30 Philosophy is the search for the large patterns of the world and of the large patterns of experience perceptual theoretical aesthetic and practical the patterns that regardless of specific contents characterize the main types of experience In this book I carry out my search for the large patterns of practical experience the experience of deliberation of recognition of duties and their conflicts of attempts to guide other person's conduct of deciding to act of influencing the physical world with one's doings and the like This is the experience that makes possible our social life the formulation of plans for teamwork the building of institutions the development of nations and the adoption of the ideal of morality Here I develop a network of theories about the most fundamental aspects of practical thinking what is thought in such thinking what makes that thinking correct what makes it practical and the structure of the doings that accrue to the world when such thinking is effective I have attempted to build each theory in sufficient detail so that it illuminates its subject matter with a certain degree of fullness But I have also aimed at producing an harmonious system of theories so that the grand pattern of practical thinking can be admired not only for the

beauty of the separate structures of its parts but also for its architectonic unity Chapter 1 gives the details of the many facets of this project and discusses some methodological techniques **Castañeda and his Guises** Adriano Palma,2014-08-25

This volume responds to and reassesses the work of Hector Neri Castañeda 1924 1991 The essays collected here written by his students followers and opponents examine Castañeda's seminal views on deontic logic metaethics indexicality practices fictions and metaphysics utilizing the critical viewpoint afforded by time as well as new data to offer insights on his theories and methodology **Defending Realism** Guido Bonino,Greg Jesson,Javier Cumpa,2014-12-11

The essays in this volume first presented at an international conference held at the University of Urbino Italy in 2011 explore the different senses of realism arguing both for and against its distinctive theses and considering these senses from a historical point of view The first sense is the metaphysical thesis that whatever exists does so and has the properties it has independently of whether it is the object of a person's thought or perception The second sense of realism is epistemological wherein realism claims that in some cases it is possible to know the world as it exists in and of itself A third sense which has become known as ontological realism states that universals exist as well as individuals The essays collected here make new contributions to these fundamental philosophical issues which have largely defined western analytic philosophy from Plato and Aristotle to the present day

Philosophical Analysis D.S. Austin,2012-12-06 Analytic philosophy is alive and in good health as this collection of twenty previously unpublished essays most ably demonstrates The reader will find here assembled some of the finest writings of modern analytic philosophers at the top of their form Matthews discusses Plato's attempt to deal with the problem of false belief about identities Parson evaluates Russell's early theory of denoting phrases Chisholm exhibits the utility of thirteen epistemic categories Plantinga criticizes Chisholm's account of justification Conee argues that solving the Gettier Problem is important and Ginet proposes a solution to it Lehrer criticizes an argument based on the simplicity of our belief in material objects and other minds R Feldman defends an account of having evidence F Feldman defends a propositional account of pleasure Van Fraassen criticizes Garber's solution to the problem of old evidence Castañeda investigates the nature of negation McKay argues that de se analyses of belief do not account for belief de re Richard argues that no Fregean semantics for belief attribution will succeed Ryckman suggests that the Millian theory of names has little to do with the theory of belief is no threat to God's omniscience Dunn investigates constraints imposed on non classical modal logics by extensionality Fitch argues that singular propositions perform important functions in modal logic Jubien evaluates arguments for and against possible worlds Ratzsch argues that there must be a deeper source of nomicality than ordinary subjunctives and Stalnaker argues that there is room for determinacy of identity and indeterminacy in reference

Husserl and Intentionality D.W Smith,R. McIntyre,2012-12-06 This book has roots in our respective doctoral dissertations both completed in 1970 at Stanford under the tutelage of Professors Dagfinn Føllesdal John D Goheen and Jaakko Hintikka In the fall of 1970 we wrote a joint article that proved to be a prolegomenon to the present work our

Intentionality via Intentions The Journal of Philosophy 68 1971 Professor Hintikka then suggested we write a joint book and in the spring of 1971 we began writing the present work The project was to last ten years as our conception of the project continued to grow at each stage Our intellectual debts follow the history of our project During our dissertation days at Stanford we joined with fellow doctoral candidates John Lad and Michael Sukale and Professors F. Llesdal Goheen and Hintikka in an informal seminar on phenomenology that met weekly from June of 1969 through March of 1970 During the summers of 1973 and 1974 we regrouped in another informal seminar on phenomenology meeting weekly at Stanford and sometimes Berkeley the regular participants being ourselves Hubert Dreyfus Dagfinn F. Llesdal Jane Lipsky McIntyre Izchak Miller and in 1974 John Haugeland

Psychopathology and Philosophy Manfred Spitzer, Friedrich A. Uehlein, Godehard Open, 2012-12-06 Psychopathology should make clear what we know how we know and what we do not know ffYoU think you could eliminate philosophy and regard it as something irrelevant it will overwhelm you in some obscure disguise This is the point where that bulk of bad philosophy in psychopathological studies originates KARL JASPERS Since the publication of KARL JASPERS General Psychopathology in 1913 at least it has become obvious that a psychopathologist cannot do without philosophical reflection If he wants to say anything about disorders of perception and thought or of the experiencing I to name the subjects of this book he must know those disorders and the problems related to them The phenomena and problems in question are not at all simply empirical which is to say that they concern the structure and function of the organs of sense or the central nervous system but conceptual We have already formed some notions and prejudices concerning those subjects perception e.g. is considered to be a projection from the outside into the inward thinking a kind of inward talk the I refers to reflecting upon me by myself etc Unless we think about these ideas critically we shall fail in describing disorders of experience thought and action

Essays on the Philosophy of Roderick M. Chisholm Hector-Neri Castañeda, Rudolf Haller, Jaakko Hintikka, 1979

Political Identity and the Metaphysics of Politics Gabriele De Anna, Manuele Dozzi, 2023-05-05 The chapters in this volume clarify the notion of political identity by focusing on the metaphysics of politics By analysing the notion of political identity they provide the conceptual resources for a deeper understanding of the theoretical and practical debates on populism the crisis of sovereignty the feasibility of a world government and ethical religious and cultural pluralism What is a political community Any answer to this question lies at the intersection between three fields metaphysics philosophy of action and political philosophy The question concerns how and why a plurality of individuals becomes a political unity what principles or forces keep that unity together and what threats that unity can encounter In this volume the contributors investigate how different metanormative views affect the possible answers to this metaphysical question They explore the role that the individual identities of agents play in grounding common practices that underpin political life They investigate the individual identities of agents as the result of the interplay between natural and cultural factors Finally they observe the ways in which a political community as a collection of individuals who hang together

in an attempt to reach common purposes demonstrate a certain metaphysical solidity Political Identity and the Metaphysics of Politics will appeal to researchers and advanced students working in metaphysics political philosophy political theory and philosophy of action

New Studies in Deontic Logic R. Hilpinen, 2012-12-06 The present volume is a sequel to *Deontic Logic Introductory and Systematic Readings* D Reidel Publishing Company Dordrecht 1971 its purpose is to offer a view of some of the main directions of research in contemporary deontic logic Most of the articles included in *Introductory and Systematic Readings* represent what may be called the standard modal approach to deontic logic in which deontic logic is treated as a branch of modal logic and the normative concepts of obligation permission and prohibition are regarded as analogous to the alethic modalities necessity possibility and impossibility As Simo Knuuttila shows in his contribution to the present volume this approach goes back to late medieval philosophy Several 14th century philosophers observed the analogies between deontic and alethic modalities and discussed the deontic interpretations of various laws of modal logic In contemporary deontic logic the modal approach was revived by G H von Wright's classic paper *Deontic Logic* 1951 Certain analogies between deontic and alethic modalities are obvious and uncontroversial but the standard approach has often been criticized on the ground that it exaggerates the analogies and tends to ignore those features of normative concepts which distinguish them from other modalities

Themes from Kaplan Joseph Almog, 1989-06 Containing sixteen essays by such distinguished contributors as Robert M Adams Nathan Salmon and Scott Soames this book discusses and expands upon the work of David Kaplan and provides essential new perspectives on the philosophy of language It includes Kaplan's hitherto unpublished paper *Demonstratives*
