*The Green Library Planner* Mary M. Carr, 2013-09-11 Green buildings are better buildings In fact buildings use 36% of the energy in the United States according to the Environmental Protection Agency so green buildings that use less energy help to address the very real challenges of reliance on fossil fuel and climate change More than only being environmentally responsible green libraries are beautiful cost effective high performance buildings that enhance occupant health and comfort The Green Library Planner is designed for members of library building design teams who typically are not actively engaged in architecture construction or engineering but who need an introduction to the rationale for green buildings the elements of green building and the language of the field It will be equally useful for public officials boards or administrators who are considering a new green library building a renovated library structure or sustainable elements for a current library facility Mary M Carr a library director who is also a LEED Accredited

Professional with national certification first introduces the basic tenets of green building. She then covers the gamut of green building from design through all phases of construction or renovation to operations and maintenance. Chapter highlights include Fundamentals of Sustainable Building, The Importance of Place, Energy and Lighting, Indoor Environmental Quality, Water Conservation and Quality, Sustainable Construction Management Techniques, Commissioning Sustainable Operations and Maintenance. With this information the librarian and related library staff and administrators will be able to design, build, or renovate and operate the library in the best way possible while considering the environmental and economic challenges faced locally and globally in the 21st century. **Air Conditioning** Carnegie Library of Pittsburgh, 1914
