Heavy-ion Physics Today And Tomorrow:

Heavy-ion Physics: Today And Tomorrow - Proceedings Of The 7th Adriatic International Conference On Nuclear Physics, 1991 Roman Caplar, Walter Greiner, 1991-11-29 Nuclear Molecules Walter Greiner, Jae Y Park, Werner Scheid, 1995-02-28

Nuclear molecules are analogous to ordinary electronic molecules Valence nucleons are circling nuclear cores and thus bind them They appear in collisions of nuclei on nuclei and in fission and fusion processes Here a lively field of research has developed over the past 20 years Nuclear Molecules are the strongest deformed nuclear complexes and play an important role in nuclear structure cluster physics They are also of considerable interest for the synthesis of elements in astrophysics cosmology Most of the various nuclear molecular phenomena are discussed This book is the first monograph exclusively written to cover the theoretical aspects of nuclear molecular phenomena in heavy ion collisions The experimental evidence is presented and confronted with theory *Nuclear Science Abstracts* ,1975 *Clustering Aspects Of Nuclear Structure And Dynamics: Cluster '99 - Proceedings Of The 7th International Conference* Roman Caplar, 2000-03-02 In the past three decades our understanding of the clustering behavior of nucleons in both nuclear structure and nuclear dynamics has evolved considerably Moreover the notion of the cluster has made its way into a number of scientific disciplines This book provides an overview of the current understanding of clustering phenomena in nuclear structure and nuclear dynamics The topics covered include fundamental aspects of nuclear clustering models of nucleon clusterization clustering aspects of nuclear structure selected topics on clustering aspects in medium and high energy nucleus nucleus collisions **Proceedings of the 7th International Conference on Clustering Aspects of Nuclear Structure and Dynamics** M. Korolija, Z. Basrak, R. Caplar, 2000 In the past three decades our understanding of the clustering behavior of nucleons in both nuclear structure and nuclear dynamics has evolved considerably Moreover the notion of the cluster has made its way into a number of scientific disciplines This book provides an overview of the current understanding of clustering phenomena in nuclear structure and nuclear dynamics The topics covered include fundamental aspects of nuclear clustering models of nucleon clusterization clustering aspects of nuclear structure selected topics on clustering aspects in medium and high energy nucleus nucleus collisions **Energy Research Abstracts** ,1995 **60 Years Of Cern Experiments And Discoveries** Herwig Schopper, Luigi Di Lella, 2015-07-13 The book is a compilation of the most important experimental results achieved during the past 60 years at CERN from the mid 1950s to the latest discovery of the Higgs particle Covering the results from the early accelerators at CERN to those most recent at the LHC the contents provide an excellent review of the achievements of this outstanding laboratory Not only presented is the impressive scientific progress achieved during the past six decades but also demonstrated is the special way in which successful international collaboration exists at CERN **Heavy-ion Physics Today and Tomorrow** Roman Caplar, Walter Greiner, 1991-01-01 **Directory of Published Proceedings** ,1999

Relativistic Dissipative Hydrodynamic Description of the Quark-Gluon Plasma Akihiko Monnai,2014-01-20 This thesis presents theoretical and numerical studies on phenomenological description of the quark gluon plasma QGP a many body system of elementary particles The author formulates a causal theory of hydrodynamics for systems with net charges from the law of increasing entropy and a momentum expansion method The derived equation results can be applied not only to collider physics but also to the early universe and ultra cold atoms The author also develops novel off equilibrium hydrodynamic models for the longitudinal expansion of the QGP on the basis of these equations Numerical estimations show that convection and entropy production during the hydrodynamic evolution are key to explaining excessive charged particle production recently observed at the Large Hadron Collider Furthermore the analyses at finite baryon density indicate that the energy available for QGP production is larger than the amount conventionally assumed **AEC Authorizing Legislation, FY74** United States.
