understanding of and relationship to hedgehogs reveals the complex interactions between culture technology bodies conservation and care for other animals Across the globe the bumbling hedgehog has been framed in a variety of ways

throughout history as a symbol of both good and bad luck of transformation of vengeance and of wit and reincarnation In recent years it has also in different parts of the world been viewed as a pest for its predation on ground nesting birds and has thus become a target for culling In *Hedgehogs Killing and Kindness* Laura McLauchlan explores how human actors have interacted with hedgehogs and other species through time and attends to the questions these interactions raise when it comes to ending and preserving life in the name of species conservation and wildlife rehabilitation Grounded in rich empirical material and careful critique *Hedgehogs Killing and Kindness* traces the author's own more than human transformative experience and elucidates how care is shaped by and shapes various cultural and material forces McLauchlan urges us to rethink and reflect on how cares are normalized and at what and whose expense what it might mean to care in more responsive ways and finally whether it is possible to kill with kindness in this rapidly changing and conflicting world A valuable addition to the understanding and practices of multispecies ethnography environmental anthropology and the broader environmental humanities this book sheds a necessary light on the fraught space between caring for and killing to care for other than human animals on our one precious planet
