Hegel's Educational Theory and Practice Hettie Millicent Hughes Mackenzie,1909 *Education in Hegel* Nigel Tubbs,2011-10-20 In this wide ranging and compelling set of essays Nigel Tubbs illustrates how a philosophical notion of education lies at the heart of Hegelian philosophy and employs it to critique some of the stereotypes and misreadings from which Hegel often suffers With chapters on philosophical education in relation to life and death self and other subject and substance and to Derrida and Levinas in particular Tubbs brings Hegelian education read as recollection to bear on modern social and political relations He argues in sum that Hegelian philosophy comprehended in terms of education yields a theory of self and other that can inform and reform relations between rich and poor West and East Finally the book addresses the most controversial aspect of any defence of Hegel namely the comprehension of the absolute and its imperialist implications for Western history The author argues passionately that through a notion of philosophical education Hegel teaches us not to avoid the dilemmas that are endemic to modern Western power and mastery when trying to comprehend some of our most pressing human concerns **Hegel as Educator** Frederic Ludlow Luqueer,1896 **A History of Western Educational Ideas** Professor Peter Gordon,Professor Denis Lawton,2019-11-26 It is important that all those concerned with education parents teachers administrators and policymakers should have a reasonable understanding of the present system and how it has developed sometimes over a period of many years This work traces the development of Western educational ideas from the Greek society of Socrates Plato and Aristotle to the ideas and ideologies behind some of the controversial issues in education today This book discusses the continuous development of educational thought over three millennia The focus upon the history of ideas in this volume is partly an attempt to move history of education away from an approach based on great men to technological economic and political influences on ideas and beliefs It reviews many issues ranging from the purposes of education from the earliest times to the challenge of postmodernism in the present century The authors provide an accessible and thought provoking guide to the educational ideas that underlie practice *Ideas of Education* Christopher Brooke,Elizabeth Frazer,2013-07-18 There has always been a strong relationship between education and philosophy especially political philosophy Renewed concern about the importance and efficacy of political education has revived key questions about the connections between the power to govern and the power to educate Although these themes are not always prominent in commentaries political writings have often been very deeply concerned with both educational theory and practice This invaluable book will introduce the reader to key concepts and disputes surrounding educational themes in the history of political thought The book draws together a fascinating range of educational pioneers and thinkers from the canon

of philosophers and philosophical schools from Plato and Aristotle down to Edward Carpenter and John Dewey with attention along the way paid to both individual authors like Thomas Hobbes and Mary Wollstonecraft as well as to intellectual movements such as the Scottish Enlightenment and the Utopian Socialists Each thinker or group is positioned in their historical context and each chapter addresses the structure of the theory and argument considering both contemporaneous and current controversies A number of themes run throughout the volume an analysis of pedagogy socialisation schooling and university education with particular relation to public and private life and personal and political power references to the historical and intellectual context an overview of the current reception understanding and interpretation of the thinker in question the educational legacy of the theories or theorists This book will be of interest to students researchers and scholars of education as well as students and teachers of political theory the history of political thought and social and political philosophy

Philosophy's Higher Education Nigel Tubbs, 2006-01-26 At about the age of 13 I began to realise that my formal education was separating itself off from my philosophical education Of course at the time I did not know it in this way I experienced it as a split between what I was being taught and my experience of what I was being taught It was I now know the philosophical experience of formal schooling It was not until beginning the study of sociology at 16 that I came across the idea of dualisms pairs of opposites that always appeared together but were never reconciled In sociology it was the dualism of the individual and society The question most asked in our classes was always regarding which aspect of the dualism dominated the other The answer we always leaned towards was that both were mutually affected by the other The answer seemed to lie somewhere in the middle It was only at university first as an undergraduate and then as a postgraduate that I came across the idea of the dialectic Slowly I began to recognise that the dualisms which plagued social theory I and we self and other good and evil modernity and post modernity autonomy and heteronomy freedom and nature truth and relativism and so many more were not only dialectical in being thought about but also that the thought of them being dialectical had an even stranger quality It was the same experience as being at school
