Hegel's Phenomenology Of Spirit Its Point:

Hegel's Phenomenology of Spirit, Its Point and Purpose Werner Marx, 1975 Is there such a thing as a philosophical school among young philosophers The editors of this book were concerned particularly to establish whether there is a linguistic school of philosophy to which new philosophers subscribe and to determine whether there was any restricting uniformity of treatment and topics chosen by the contributors to this collection of paper The topics the contributors chose are in fact heterogeneous and include ethics and materialism aesthetics and the philosophy of science meaning and existence persons machines and the philosophy of language The treatments given these diverse topics are as diverse as the topics themselves so that the editors conclude that if there ever was a school of philosophy which concerned itself exclusively with language it seems to have disappeared Publisher *Hegel's Phenomenology of Spirit* Werner Marx, 1975 Hegel Katerina Deligiorgi, 2014-12-05 Over the last decade renewed interest in Hegel's thought and its legacy especially in Anglo American philosophy has combined with the publication of new critical editions of his work in German to underline the value of Hegel for contemporary philosophy Hegel New Directions takes stock of this re evaluation and presents an assessment of current thinking on this seminal philosopher Leading scholars who have spearheaded the reappraisal bring the history of philosophy into dialogue with contemporary philosophical questions Drawing on a broad range of themes the essays offer a critical and stimulating guide to Hegel's thought whilst addressing central questions of contemporary philosophy in epistemology ethics political and social theory religion philosophy of nature and aesthetics Hegel's Idealism Robert B. Pippin, 1989 Hegel is presented as a critical philosopher whose disagreements with Kant only enhance the idealist arguments against empiricism realism and naturalism in this original interpretation *The Cambridge Companion to Hegel* Frederick C. Beiser, 1993-01-29 This volume considers all the major aspects of Hegel's work epistemology logic ethics political philosophy aesthetics philosophy of history and philosophy of religion *The Heterodox Hegel* Cyril O'Regan, 1994-09-20 *Church and Theology in the Nineteenth Century* Ferdinand Christian Baur, 2018-03-14 The last volume of Baur's church history based on lectures delivered during the 1850s covers the nineteenth century They were edited and published by Eduard Zeller after Baur's death Since the lectures devote equal attention to theological and ecclesiastical matters the title in English is Church and Theology in the Nineteenth Century Baur provides critical analyses of the philosophers and theologians of the nineteenth century Herder Schiller Goethe Kant Fichte Schelling Jacobi Schleiermacher Marheineke Neander M hler Hegel Strauss Feuerbach and many others as well as details about European Catholic and Protestant church history from 1800 to 1860 What he produces is a participant history written by a scholar very much engaged in the issues of his time Ferdinand Christian Baur was a professor of theology at the University of Tbingen from 1826 to 1860 He is known for his path breaking studies in New Testament literature and historical theology Recent translations of his work by Brown and Hodgson include History of Christian Dogma and Lectures on New Testament Theology **Hegel's Trinitarian Claim** Schlitt, 2024-10-28

A New German Idealism Adrian Johnston, 2018-05-01 In 2012 philosopher and public intellectual Slavoj Žižek published what arguably is his magnum opus the one thousand page tome *Less Than Nothing: Hegel and the Shadow of Dialectical Materialism*. A sizable sequel appeared in 2014 *Absolute Recoil: Towards a New Foundation of Dialectical Materialism*. In these two books Žižek returns to the German idealist G. W. F. Hegel in order to forge a new materialism for the twenty-first century. Žižek's reinvention of Hegelian dialectics explores perennial and contemporary concerns: humanity's relations with nature, the place of human freedom, the limits of rationality, the roles of spirituality and religion, and the prospects for radical sociopolitical change. In *A New German Idealism*, Adrian Johnston offers a first of its kind sustained critical response to *Less Than Nothing* and *Absolute Recoil*. Johnston, a leading authority on and interlocutor of Žižek, assesses the recent return to Hegel against the backdrop of Kantian and post-Kantian German idealism. He also presents alternate reconstructions of Hegel's positions that differ in important respects from Žižek's version of dialectical materialism. In particular, Johnston criticizes Žižek's deviations from the secular naturalism and Enlightenment optimism of his chosen sources of inspiration: not only Hegel but Karl Marx and Sigmund Freud too. In response, Johnston develops what he calls transcendental materialism: an antireductive and leftist materialism capable of preserving and advancing the core legacies of the Hegelian, Marxian, and Freudian traditions central to Žižek.

Philosophy Beside Itself Stephen W. Melville, 1986 *Philosophy Beside Itself* was first published in 1986. Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions. The writings of French philosopher Jacques Derrida have been the single most powerful influence on critical theory and practice in the United States over the past decade. But with few exceptions, American philosophers have taken little or no interest in Derrida's work, and the task of reception, translation, and commentary has been left to literary critics. As a result, Derrida has appeared as a figure already defined by essentially literary critical activities and interests. Stephen Melville's aim in *Philosophy Beside Itself* is to insist upon and clarify the distinctions between philosophy and criticism. He argues that until we grasp Derrida's philosophical project as such, we remain fundamentally unable to see his significance for criticism. In terms derived from Stanley Cavell's writings on modernism, Melville develops a case for Derrida as a modernist philosopher working at once within and against that tradition and discipline. Melville first places Derrida in a Hegelian context, the structure of which he explores by examining the work of Heidegger, Lacan, and Bataille. With this foundation, he is able to reappraise the project of deconstructive criticism as developed in Paul de Man's *Blindness and Insight* and further articulated by other Yale critics. Central to this critique is the ambivalent relationship between deconstructive criticism and Lacanian psychoanalysis. Criticism, radical self-criticism, is a central means through which the difficult facts of human community come to recognition, and Melville argues for criticism as an activity intimately bound to the ways in which we do and do not belong in time and in community. Derrida's achievement has been to find a new and necessary way to assert that the task of philosophy is criticism.

the task of literary criticism is to assume the burden of that achievement Stephen Melville is an assistant professor of English at Syracuse University and Donald Marshall is a professor of English at the University of Iowa

Conceptual Realism and Historicity: Brandom versus Hegel Norman Schultz, 2024-12-23 A persistent challenge in philosophy is constructing an explicit link between mind and external reality In this regard this book introduces and examines two opposing philosophies It scrutinizes Brandom's inferentialist solution encompassing his influential work *Making It Explicit* 1994 and his controversial interpretation of Hegel as a conceptual realist in *A Spirit of Trust* 2019 Contrastingly it introduces Hegel's relativist historicism arguing that a robust epistemological framework does not necessitate an explicit link to mind independent reality By confining knowledge to its historical context it prevents adherence to false beliefs maintaining openness for truth to emerge one day

A New Exploration of Hegel's Dialectics I Deng Xiaomang, 2022-05-10 This volume reinterprets Hegelian dialectics via an exploration of the two origins of dialectics and illuminates how they constitute the inner tension at the heart of the philosophical system developing into the forms of thought that fashion the history of western philosophy As the first volume of a three volume set that gives insights into Hegel's dialectics and thereby his overall philosophical thought the book considers the linguistic spirit of logos and the existentialist spirit of nous in Greek philosophy as the two origins of Hegelian dialectics The author argues that the two spirits form a dialectical unity of opposites and constitute the inner tension at the heart of the belief system Based on this tension this volume explains Hegel's problem of beginning that has the sense composed of both the starting point of logic and that of consciousness Beginning in this twofold sense shapes dimensions of his methodology immediacy and mediacy the path of doubt and the path of truth the linguistic lever and the existential lever The title will appeal to scholars and students interested in Hegel and Marx's philosophy German classical philosophy and Western philosophy

The Art of Reconciliation D. Petersson, 2013-05-14 Dag Petersson offers a comprehensive critique of the philosophy that has dominated 200 years of modern thought politics economy and culture The basic question is this why does dialectical metaphysics fail to keep what it promises What is it about dialectics that makes it fall into irreducibly distinct variations of itself when all it promises is to synthesize to reconcile and make whole what is fragmented and alien to itself An undisciplined creativity intrinsic to completing reason comes to light through analyses of how dialectical systems begin Every dialectical philosophy must account for its own birth and it is at this point when it also articulates its promise of universal synthesis that the book discovers a desire for light writing or photography Only the most immediate element light can mediate the necessary self determination of thought at its origin Light must begin to write A philosophical critique of dialectics is therefore also a point of departure for a new aesthetic ontology of photography

[Japan and the Enemies of Open Political Science](#) David Williams,2002-11-01 The central argument of Japan and the Enemies of Open Political Science is that Eurocentric blindness is not a moral but a scientific failing In this wide ranging critique of Western social science Anglo American philosophy and French theory Williams works on the premise that Japan is the most important political system of our time He explains why social scientists have been so keen to ignore or denigrate Japan s achievements If social science is to meet the needs of the Pacific Century it requires a sustained act of intellectual demolition and subsequent renewal

Hegel's Phenomenology of spirit, it's point and purpose Werner Marx,1974

Hegel and Greek Tragedy Martin Thibodeau,2013 This study is concerned with the different interpretations of Greek tragedy proposed by G W F Hegel While Hegel s philosophical interest in tragedy as an art form is well known the motivation for his preoccupation with this art form needs to be further explored Indeed why would Hegel a pivotal figure of German idealism be inclined to concern himself with a form of poetry that reached its peak in the 5th century B C Precisely this question forms the core of this book It articulates what the primary stakes are and thereby develop and defend the thesis that Hegel s examination of Greece and tragedy is one that has a direct bearing on the fate of politics in the modern world

The Politics of Desire Micaela Janan,2000-12-13 Propertius ca 54 b c ca 2 b c was a Roman poet who composed four compelling books of elegies in the chaotic years surrounding Rome s transition from republic to empire The first three of these books revolve mostly around a tormented love affair with a woman called Cynthia The fourth book of poetry rests on more diverse subject matter and is notoriously the most opaque and elusive In The Politics of Desire Micaela Janan radically reassesses Propertius last elegies using contemporary psychoanalytic theory to illuminate these challenging texts Janan finds that the upheaval of Rome s transformation to empire corresponds to the intellectually unsettled conditions of our own time so that contemporary methodologies offer an uncannily suitable approach for understanding Propertius In particular she uses the work of Jacques Lacan since it provides the best conceptual tools for examining the relation between political crisis and the struggles of the self a theme that resonates in these difficult elegies This book expands our understanding of an important Roman poet and its innovative and sophisticated methodological approach makes a substantial contribution to feminist and psychoanalytic criticism In addition Janan addresses elegy s

relationship to larger cultural questions and broadens our understanding of the social crisis affecting Rome during the early empire
