Hegemony And Resistance:

Gramsci and Global Politics Mark McNally, John Schwarzmantel, 2009-03-09 The aim of this book is to explain and assess the relevance of the ideas of Gramsci to a world fundamentally transformed from that in which his thought was developed It takes some of Gramsci's best known concepts hegemony civil society passive revolution the national popular trasformismo the integral state and uses them creatively to analyse features of present day politics assessing to what extent his ideas can aid our understanding of the contemporary political world The book contains essays focused on aspects of global politics the development of a global civil society the validity of the knowledge claims of neo Gramscian IR specialists and the politics of the WTO and the Alternative Globalisation Movement contemporary feminism the problem of adjusting Gramsci's theory of political agency to modern conditions Turkish and Israeli politics and a series of essays on present day British politics The book concludes that while there remain considerable problems in applying Gramsci's concepts to the contemporary world his political thought still retains an attraction and validity that will continue to inspire political analysts well into the future Bringing together a range of essays representing some of the latest research in the field *Gramsci and Global Politics* Hegemony and Resistance opens up new perspectives on Gramsci which will be of vital interest to students and scholars in International Relations and Political Science Sociology and History

Contested States Mindie Lazarus-Black, Susan F. Hirsch, 2012-11-12 *Contested States* examines how hegemony is created and facilitated through law as well as how people use legal arenas to resist oppression The essays written by anthropologists and historians offer rich historical and ethnographic detail as they engage these themes in such contexts as colonial and post colonial courts in Kenya India Uganda and the Caribbean bureaucracies in Tonga and Turkey and judicial processes in the historical and contemporary United States *Contested States* contributes to the new focus on power and social process in legal studies and argues that while states encode and enforce law a crucial part of the power of law is its very contestability The book demonstrates that theoretical insights learned in legal arenas can deepen one's overall understanding of sociocultural order and the processes of historical and legal change

Hegemony and Resistance Thiven Reddy, 2018-05-08 This title was first published in 2000 An original explanation for the importance South Africans' attachment to ethnic and racial group categories in everyday speech and practice The answers emerge by presenting a history of dominant and resistance discourses as they relate to collective identity a move which breaks with prevailing approaches to South African political history problematises ethnic group categories and offers new ways of seeing old debates

Hegemony, International Political Economy and Post-Communist Russia Owen Worth, 2017-07-05 This illuminating book explores the neo Gramscian school of international political economy and their conceptualization of global hegemony and furthers these by looking at how the often fragmented society of post Communist Russia can provide insight into the nature

and workings of neo liberal global hegemony The volume illustrates how historically Russia has been a unique case in rejecting Western inspired hegemonic projects It outlines how successive governments since the fall of the Soviet Union have attempted often unsuccessfully to integrate Russia into the global economy and identifies the multitude of ideological contestation within Russia It will prove a useful addition to the literature on both post Communist Russian studies and international political economy

Rethinking Hegemony Owen Worth, 2015-06-01

Hegemony has long been a key concept within the study of International Relations as well as across the social sciences more generally and a term used by analysts to make sense of contemporary events Drawing on a rich historical framework this book traces the different definitions and interpretations of hegemony in world politics and shows that the term continues to be a contested one It examines and develops traditional ideas about hegemony from the idea of the strong leading state to the dominance of particular ideologies through a wide range of approaches including hegemonic stability theory and the work of Antonio Gramsci Exploring issues such as the role of the state the changing influence of regionalism and the emergence of counter hegemonic movements this book argues that a more nuanced understanding of hegemony is necessary in order to understand the construction of the contemporary world order Considering a wide range of case studies throughout from the reputation of the United States as an international leader to the European Union s regional hegemony and the economic prowess of the so called BRICS group this text provides the ideal guide to a multi faceted term and significant force of both history and the modern age

Globalization and Race Kamari Maxine Clarke, Deborah A. Thomas, 2006

Kamari Maxine Clarke and Deborah A Thomas argue that a firm grasp of globalization requires an understanding of how race has constituted and been constituted by global transformations Focusing

attention on race as an analytic category this state of the art collection of essays explores the changing meanings of blackness in the context of globalization It illuminates the connections between contemporary global processes of racialization and transnational circulations set in motion by imperialism and slavery between popular culture and global conceptions of blackness and between the work of anthropologists policymakers religious revivalists and activists and the solidification and globalization of racial categories A number of the essays bring to light the formative but not unproblematic influence of African American identity on other populations within the black diaspora Among these are an examination of the impact of black America on racial identity and politics in mid twentieth century Liverpool and an inquiry into the distinctive experiences of blacks in Canada Contributors investigate concepts of race and space in early twenty first century Harlem the experiences of trafficked Nigerian sex workers in Italy and the persistence of race in the purportedly non racial language of the New South Africa They highlight how blackness is consumed and expressed in Cuban timba music in West Indian adolescent girls fascination with Buffy the Vampire Slayer and in the incorporation of American rap music into black London culture Connecting race to ethnicity gender sexuality nationality and religion these essays reveal how new class economies ideologies of belonging and constructions of social difference are emerging from ongoing global transformations Contributors Robert L Adams Lee D Baker Jacqueline Nassy Brown Tina M Campt Kamari Maxine Clarke Raymond Codrington Grant Farred Keshia Fikes Isar Godreau Ariana Hernandez Reguant Jayne O Ifekwunigwe John L Jackson Jr Oneka LaBennett Naomi Pabst Lena Sawyer Deborah A Thomas

Consciousness and Ideology Patricia Ewick, 2017-05-15 In this volume of essays by leading socio legal scholars the dual concepts of consciousness and ideology are examined and used to expose law s presence and power in social life Rejecting the association between ideology and concealment each essay explores the ways in which ideology and consciousness artfully produce truth creating both power and the grounds of its resistance The rich empirical studies included in this volume are crucial to our understanding of law consciousness and ideology

Rethinking Hegemony Thomas Clayton, 2006 In *Rethinking Hegemony* edited by Thomas Clayton a group of prominent educationists explore the complex and powerful process of hegemony or ideological domination as it operates in schools and other educational settings In this collection of national and international empirical studies the authors grapple with the central process of hegemony that of social maintenance or transformation by means of prominent social ideas which shape our understanding of what constitutes just proper and legitimate ways of thinking and acting While the authors agree that these ideas are continually renewed recreated and defended by dominant groups in society they also consider the way other groups respond to this process in what often becomes a struggle for hegemony or ideological ascendancy Chapters include Daniel Schugurensky s analysis of the university restructuring in Latin America Carmel Borg s examination of the diffusion of Catholic values in Malta s state schools Joseph and Rea Zajda s study of the rewriting of history textbooks in Russia after the fall of the Soviet Union Peter Mayo s case study of a state sponsored adult education program in the University of Malta and

Richard Maclure's examination of the role of international and African NGOs in serving the interests of African elites and transnational capital. Ethnographic studies by Barbara Burgess and Mark Ginsburg and Peter Demerath examine the education of emotionally disturbed children in the USA and the struggles of New Guinean youth to negotiate between the Western ideas of individualism and hierarchical power structures and the egalitarianism of their village origins. Ryohei Matsuda and Ahmed Mah's chapters consider both the marginalisation and the attempts at recognition of indigenous agricultural knowledge in Agricultural Science faculties in African universities. Chapters by Victor Cordova and Mark Ginsburg Pamela Young Joseph Slowinski and Thomas Clayton consider campus struggles in a Mexican university the role of Protestant missionaries in the 19th and 20th century Ottoman Empire the influence of EU educational assistance in Eastern Europe and the role of Vietnamese interventions in Cambodian education and culture

Critical Studies of Innovation Benoît Godin, Dominique Vinck, 2017-05-26 Different theories, models and narratives of innovation compete for both legitimacy and authority. However, despite the variations, they all offer a consistent pro-innovation bias, dismissing resistance as irrational and overlooking the value of non-users and collateral impacts. This book looks at innovation from a different perspective and asks what has been left out. It offers a reflexive view and invites researchers to consider new avenues of research through a critique of current representations of innovation.

Elias Canetti and Social Theory Andrea Mubi Brighenti, 2023-01-12 Elias Canetti is a key thinker in the trend towards the renewal of social theory for the 21st century. He is increasingly being recognised in the social and political sciences for the seminal text *Crowds and Power* (1960). While this work can sometimes be criticised for its alleged anti-historicity, anti-modernism, fixation on death, and a dark vision of humankind, *Crowds and Power* can in fact be interpreted as a study and a critique of the mono-dimensionality and the obsessiveness of power. In Canetti's own words, it is an attempt to find the weak spot of power and ultimately an invitation to recognise and explore the endless richness of human transformations. *Elias Canetti and Social Theory* argues that the alleged anti-modernism of Canetti actually makes him more contemporary than many contemporary social-political thinkers. It deals with key concepts within socio-political theory, including commands, increase in resistance, and commonality. Each of these ideas is connected with real-lived social realities, making this book a compelling argument for Canetti's crucial relevance today.

Irishness Is All Around Us Olaf Zenker, 2013-04-01 Focusing on Irish speakers in Catholic West Belfast, this ethnography on Irish language and identity explores the complexities of changing and contradictory senses of Irishness and shifting practices of Irish culture in the domains of language, music, dance, and sports. The author's theoretical approach to ethnicity and ethnic revivals presents an expanded explanatory framework for the social re-production of ethnicity, theorizing the mutual interrelations between representations and cultural practices regarding their combined capacity to engender ethnic revivals. Relevant not only to readers with an interest in the intricacies of the Northern Irish situation, this book also appeals to a broader readership in anthropology, sociology, cultural studies, history, and political science concerned with the mechanisms behind ethnonational
