Task-Based Language Teaching in Foreign Language Contexts Ali

Shehadeh, Christine A. Coombe, 2012-10-17 This volume extends the Task Based Language Teaching Issues Research and Practice books series by deliberately exploring the potential of task based language teaching TBLT in a range of EFL contexts It is specifically devoted to providing empirical accounts about how TBLT practice is being developed and researched in diverse educational contexts particularly where English is not the dominant language By including contributions from settings as varied as Japan China Korea Venezuela Turkey Spain and France this collection of 13 studies provides strong indications that the research and implementation of TBLT in EFL settings is both on the rise and interestingly diverse not least because it must respond to the distinct contexts constraints and possibilities of foreign language learning The book will be of interest to SLA researchers and students in applied linguistics and TESOL It will also be of value to course designers and language teachers who come from a broad range of formal and informal educational settings encompassing a wide range of ages and types of language learners

The Transmission of Anglo-Norman Richard P. Ingham, Richard Ingham, 2012 This investigation contributes to issues in the study of second language transmission by considering the well documented historical case of Anglo Norman Within a few generations of the establishment of this variety its phonology diverged sharply from that of continental French yet core syntactic distinctions continued to be reliably transmitted The dissociation of phonology from syntax transmission is related to the age of exposure to the language in the experience of ordinary users of the language The input provided to children acquiring language in a naturalistic communicative setting even though one of a school institution enabled them to acquire target like syntactic properties of the inherited variety In addition it allowed change to take place along the lines of transmission by incrementation A linguistic environment combining the here and now aspects of ordinary first language acquisition with the growing cognitive complexity of an educational meta language appears to have been adequate for this variety to be transmitted as a viable entity that encoded the public life of England for centuries

Beh, 2000 **Whitaker's Books in Print**, 1998 **Understanding Multimodal Discourses in English Language Teaching Textbooks** Christopher A. Smith, 2022-08-11 Textbooks are indispensable components and in some case the cornerstones of the mission of English Language Teaching ELT However they are artefacts of a pedagogical culture that rarely echo the concerns of their most prolific consumers teachers and students This book offers a useful framework for evaluating ELT textbooks from a critical discourse perspective one that is based on sound current research but also offers practical guidance to teachers Building from a foundational understanding of ELT textbooks the author presents a systematic procedure to critically analyze their multimodal discourse examine how those discourses are negotiated between teachers and students in class and measure how those consumers privately value the lessons The book provides teachers with the tools they need to select and adapt materials based on critical multimodal discourse analysis where not only the text but the pictures websites audio visual elements too are subjected to a process which can reveal underlying ideologies assumptions omissions and reifications The triangulated approach demonstrated in a series of vignettes featuring Korean university students and native English speaking instructors can inform textbook choice instigate change and inspire lesson re contextualization to best suit the needs of its primary consumers *English Grammar* Digby Beaumont, 1998 **Changing Pedagogy** Xin-min Zheng, Chris Davison, 2008-02-20 China's growing economic military and political stability have for the first time started to gain international recognition As China increasingly opens up to the world its unique role in the context of economic globalization is becoming more pronounced which is exemplified by its recent membership of the WTO and Beijing's successful bid to host the Olympic Games Unsurprisingly this has resulted in an explosion in the popularity of English language learning in China which has in turn led to radical reform of the curricula teaching methods teacher education and assessment system in China in order to improve standards This fascinating monograph explores the nature of the implemented English language curriculum in China focussing in particular on the pedagogy of secondary school teachers There follows an insightful analysis into how such teachers in different situations and with different backgrounds and motivations make decisions about what and how they teach and the extent to which they adapt the promoted methods in their individual teaching environments The authors then use their findings to propose an innovative and coherent framework which has far reaching consequences for pedagogy in China and across the world
