history     **The Experimental Units of Hitler's Condor Legion** Rafael A. Permuy López, 2017-01-30 At the start of the Spanish Civil War the nationalists sought help for their cause from Germany following which volunteers from the German Air Force and Army formed what was called the Condor Legion This force made a significant contribution to General Franco's eventual victory and this included two experimental air units known as VJ 88 and VB 88 The former's mission was to combat test the new monoplane fighters the Messerschmitt Bf 109 and the Heinkel He 112 The latter group's task was to test the new twin engine retractable undercarriage bombers the Heinkel He 111 the fast Dornier Do 17 and the Junkers Ju 86 The Heinkels made their combat debut on 9 March 1937 when they attacked Republican held airfields in support of the Battle of Guadalajara The Heinkel proved superior to the two other German medium bombers being both faster and carrying a heavier bomb load Likewise the Messerschmitt Bf 109 was quickly found to be the better of the two fighters This book aims to examine the history of the men and machines that served in those units The Führer thought the matter over I urged him to give support to Franco under all circumstances firstly in order to prevent the further spread of communism in that theatre and secondly to test my young Luftwaffe at this opportunity in this or that technical respect Herman Göring at the Nuremberg War Trials     *Secret Projects of the Luftwaffe - Vol 1 - Jet Fighters 1939 -1945* Dan Sharp, 2020-09-22 Germany's air ministry was quick to grasp the potential of the jet engine as early as 1938 and by 1939 several German aircraft manufacturers were already working on fighter designs that would utilize this new form of propulsion Rocket engines too were seen as the way of the future and companies were commissioned to design fighters around them As the Second World War began the urgent need to bring these advanced new types into production saw a host of innovative aircraft designs being produced which would eventually result in Messerschmitt's Me 262 jet fighter and the Me 163 rocket propelled interceptor And as the war progressed efforts were increasingly made to find better ways of utilizing jet rocket and latterly ramjet engines in fighter aircraft Aviation companies from across Germany set their finest minds to the task and produced some of the most radical aircraft designs the world had ever seen They proposed rotating wing ramjet fighters arrowhead shaped rammers rocket firing bat winged gun platforms sleek speed machines tailless flying wings tiny mini fighters and a host of others ranging from deadly looking advanced fighters to downright dangerous vertical launch interceptors *Secret Projects of the Luftwaffe Volume 1 Jet Fighters 1939 1945* by Dan Sharp based on original research using German wartime documents offers the most complete and authoritative account yet of these fascinating designs through previously unseen photographs illustrations and period documentation from archives around the world     *Von Braun* Michael Neufeld, 2017-04-12 Curator and space historian at the Smithsonian's National Air and Space Museum delivers a brilliantly nuanced biography of controversial space pioneer Wernher von Braun Chief rocket engineer of the Third Reich and one of the fathers of the U S space program Wernher von Braun is a source of consistent fascination Glorified as a visionary and vilified as a war criminal he was a man of profound moral complexities whose intelligence and charisma were coupled with an enormous and some

would say blinding ambition Based on new sources Neufeld s biography delivers a meticulously researched and authoritative portrait of the creator of the V 2 rocket and his times detailing how he was a man caught between morality and progress between his dreams of the heavens and the earthbound realities of his life **Library of Congress Subject Headings**

Library of Congress,2013 **In Furious Skies** Tim Heath,2022-09-21 When a proud Adolf Hitler revealed his new Luftwaffe to the world in March 1935 it was the largest most modern military air arm the world had seen Equipped with the latest monoplane fighter and bomber aircraft manned by well trained and motivated crews it soon became evident that the Luftwaffe also possessed a high degree of technical superiority over Germany s future enemies Yet within just nine years the once mightiest air force in the world had reached total collapse destroyed in part by the very people responsible for creating it By 1944 the Luftwaffe wearied by aerial battles on multiple fronts combined with tactical mismanagement from the highest levels of command were unable to match their enemies in both production and manpower By this time the Luftwaffe was fighting for its survival and for the survival of Germany itself above the burning cities of the Third Reich facing odds sometimes as high as ten to one in the air Told through the eyes of the fighter and bomber crews themselves this book explores previously unpublished first hand accounts of the rise and fall of one of the most formidable air forces in twentieth century military history It paints a haunting picture of the excitement fear romance intertwined with the brutality futility and wastefulness that is war [Air Combat Legends: Supermarine Spitfire, Messerschmitt Bf109](#) ,2004 **Legion Condor**

**1936-39** James S. Corum,2020-04-30 The bombing of Guernica has become a symbol of Nazi involvement in the Spanish Civil War but the extent of the German commitment is often underestimated The Luftwaffe sent 20 000 officers and men to Spain from 1936 to 1939 and the Condor Legion carried out many missions in support of the Spanish Nationalist forces and played a lead role in many key campaigns of the war Aircraft that would play a significant role in the combat operations of World War II the Heinkel 11 bomber the Me 109 fighter and others saw their first action in Spain fighting against the modern Soviet fighters and bombers that equipped the Republican Air Force Condor Legion bombers attacked Republican logistics and transport behind the lines as well as bombing strategic targets German bombers and fighters provided highly effective close air support for the front line troops and German fighters and anti aircraft units ensured Nationalist control of the air The experience garnered in Spain was very important to the development of the Luftwaffe The war allowed them to hone and develop their tactics train their officers and to become the most practised air force in the world at conducting close support of ground troops In effect the Spanish Civil War proved to be the training ground for the Blitzkrieg which would be unleashed across Europe in the years that followed In this rigorous new analysis Legion Condor expert James Corum explores both the history and impact of the Luftwaffe s engagement during the Spanish Civil War and the role that engagement played in the development of the Luftwaffe strategy which would be used to such devastating effect in the years that followed **Aces of the Legion Condor** Robert Forsyth,2012-01-20 For Germany the Spanish Civil War proved a perfect testing ground for new

technologies and tactics During the war some 19 000 German volunteers formed an aviation group called the Legion Condor in support of the fascists Originally flying He 51s they were soon upgraded to 109s These fighters proved dominant in the Spanish skies and many members of the legion scored five or more kills during the fighting

The Rise and Fall of the Japanese Imperial Naval Air Service Peter J. Edwards,2020-01-31 This book describes in considerable detail the people events ships and aircraft that shaped the Air Service from its origins in the late 19th century to its demise in 1945 The formative years began when a British Naval Mission was established in Japan in 1867 to advise on the development of balloons for naval purposes After the first successful flights of fixed wing aircraft in the USA and Europe the Japanese navy sent several officers to train in Europe as pilots and imported a steady stream of new models to evaluate During World War One Japan became allied with the UK and played a significant part in keeping the German fleets of ships and submarines at bay in the Pacific and Indian Oceans However in the international naval treaties that followed they felt betrayed since the number of capital ships battleships and cruisers that they were allowed was below those of the USA and the UK Aircraft carriers were not included so a program of carrier building was started and continued until World War Two At the same time they developed an aircraft industry and at the beginning of war their airplanes were comparable and in some instances superior to those of the British and Americans Much prewar experience was gained during Japans invasion of China but their continued anger with America festered and resulted in their becoming allied with Germany Italy and the Vichy France during World War Two There followed massive successful attacks on Pearl Harbor the Philippines

the Southern Islands Port Darwin and New Guinea The British were decimated and the USA recoiled at the onslaught taking over a year to regroup and take the war to the Imperial Japanese forces Throughout the conflict many sea battles were fought and the name Zero became legendary When Japan eventually capitulated after the Atomic bombs were dropped the Japanese Imperial Air Service was disbanded
