German Encounters with Modernity Katherine Roper, 2023-08-21 The novels of Imperial Berlin comprise a body of material of immense historical richness Their importance as a historical source lies in the intricate connections their authors make between the individual lives of characters a modernizing city and a newly unified nation These connections and the values and assumptions behind them are the focus of this study In creating these connections as fictional representations of their society Berlin novelists not only reflected societal values but also were molding them by contributing to the social discourse in which they evolved Taken together their works constitute a significant piece in the complicated puzzle of how the society of Imperial Germany as it underwent the social and economic upheavals of modernization transformed the rule of traditional elites into new authoritarian forms Using individual works to analyze fictional treatment of a spectrum of problems of nationhood and modernity I argue that Berlin novelists were using their works for two significant social purposes to search for a German identity that spoke to modern realities and to envision a particularly German revolution that would bring genuine national greatness As the young nation matured however these visions became increasingly elusive They were impeded I suggest by specific obstacles including traumatic historical events inherited cultural ideals powerful mythologies social anxieties and political indifference This book documents what Berlin novelists conceived as a struggle for Germany's soul and traces the stages of its defeat

German Literature of the Twentieth Century Ingo Roland Stoeck, 2001 Traces literary developments in the German speaking countries from 1900 to the present This study of German literature in the past hundred years sets its subject clearly in the artistic and political context of developments in Western Europe during the century It begins with the turn of the century aestheticism and visions of decay led by Schnitzler Hofmannsthal and other Austrian writers and the quite different explosion of new artistic energy in the Expressionist and Dada movements These movements are succeeded by the rise of Modernism culminating in the inter war years the poetry of Rilke Brecht's epic theatre and novels by Thomas Mann Kafka Hesse Musil Döblin and Broch the influence of Nazism on literary production is considered The study of developments after 1945 reflects the struggle to establish a post Holocaust literature and to deal with the questions posed by the political division of Germany Finally the convergence of East and West German literature after unification is addressed Ingo R Stoeck teaches literature at Kilgore College Texas and is editor of the bilingual journal of German literature in English translation *Dimension 2*

Empowering Citizens, Engaging the Public Rainer Eisfeld, 2019-02-12 This book is the first comprehensive study to respond to the ongoing debates on political sciences fragmentation doubtful relevance and disconnect with the larger public It explores the implications of the argument that political science ought to become more topic driven more relevant and more comprehensible for lay audiences Consequences would include evolving a culture of public engagement challenging tendencies toward *liars rule* and emphasizing the role of large themes in academic education and research the latter being identified as those areas where severe democratic erosion is occurring such as escalating income and wealth disparities pushing democracy towards plutocracy ubiquitous change triggering insecurity and aggression racist prejudice polarizing societies and counter terrorism strategies subverting civil liberties Political science needs to address these pressing problems ahead of other issues by in depth research and broadly accessible public narratives including solution orientated normative notions This need provides the final justification for evolving a discipline where problems would take priority over methods and public relevance over sophisticated specialization

Cultures of Neurasthenia, 2016-08-22

Neurasthenia meaning nerve weakness was invented in the United States as a disorder of modernity caused by the fast pace of urban life Soon after from the early 1880s onwards this modern disease crossed the Atlantic Neurasthenia became much less popular in Britain or the Netherlands than in Germany Neurasthenia's heyday continued into the first decade of the twentieth century The label referred to conditions similar to those currently labelled as chronic fatigue syndrome Why this rise and fall of neurasthenia and why these differences in popularity This book which emerged out of an Anglo Dutch German

conference held in June 2000 explores neurasthenia's many-sided history from a comparative perspective The Seduction of Culture in German History Wolf Lepenies, 2009-01-10 During the Allied bombing of Germany Hitler was more distressed by the loss of cultural treasures than by the leveling of homes Remarkably his propagandists broadcast this fact convinced that it would reveal not his callousness but his sensitivity the destruction had failed to crush his artist's spirit It is impossible to begin to make sense of this thinking without understanding what Wolf Lepenies calls The Seduction of Culture in German History This fascinating and unusual book tells the story of an arguably catastrophic German habit that of valuing cultural achievement above all else and envisioning it as a noble substitute for politics Lepenies examines how this tendency has affected German history from the late eighteenth century to today He argues that the German preference for art over politics is essential to understanding the peculiar nature of Nazism including its aesthetic appeal to many Germans and others and the fact that Hitler and many in his circle were failed artists and intellectuals who seem to have practiced their politics as a substitute form of art In a series of historical intellectual literary and artistic vignettes told in an essayistic style full of compelling aphorisms this wide-ranging book pays special attention to Goethe and Thomas Mann and also contains brilliant discussions of such diverse figures as Novalis Walt Whitman Leo Strauss and Allan Bloom The Seduction of Culture in German History is concerned not only with Germany but with how the German obsession with culture sense of cultural superiority and scorn of politics have affected its relations with other countries France and the United States in particular

The Fateful Alliance Hermann Beck, 2008-04-01 On 30 January 1933 Alfred Hugenberg's conservative German National People's Party DNVP formed a coalition government with the Nazi Party thus enabling Hitler to accede to the chancellorship This book analyzes in detail the complicated relationship between Conservatives and Nazis and offers a re-interpretation of the Nazi seizure of power the decisive months between 30 January and 14 July 1933 The Machtergreifung is characterized here as a period of all pervasive violence and lawlessness with incessant conflicts between Nazis and German Nationals and Nazi attacks on the conservative Burgertum a far cry from the traditional depiction of the takeover as a relatively bloodless virtually sterile assumption of power by one vast impersonal apparatus wresting control from another The author scrutinizes the revolutionary character of the Nazi seizure of power the Nazis' attacks on the conservative Burgertum and its values and National Socialism's co-optation of conservative symbols of state power to serve radically new goals while addressing the issue of why the DNVP was complicit in this and paradoxically participated in eroding the foundations of its very own principles and bases of support "Communazis" Alexander Stephan, 2000-01-01 Based on FBI files released under the

German Expressionist Prose Augustinus P.

Dierick,1987-12-15 An extreme sensitivity to gathering social crisis an accompanying angry enthusiasm for artistic experimentation and renewal this compelling mix in German art poetry and drama of the period 1910 to 1925 continues to draw both scholarly attention and intense popular interest In this book Augustinus Dierick focuses on another significant but hitherto neglected medium of German Expressionist thought short narrative prose in order to illuminate and evaluate the contribution of that genre to one of the twentieth century s most powerful artistic movements Dierick s study includes a thorough analysis of the works of a broad range of Expressionist prose writers from those of such specialists in the genre as Edschmid Heym Benn Loerke Frank Sternheim Ehrenstein and Mynona to the shorter prose works of such major figures as Alfred D blin Heinrich Mann Max Brod and Franz Werfel Dierick isolates the thematic obsessions common among Expressionist writers the pathos of the self in confrontation with nature and with God the tension between self and the institutions of bourgeois society and the attractions and dangers of eroticism Throughout Dierick stresses the interrelationship between themes and their formal expression He examines many apparent excesses in style and tone many aberrations in structure and generic characteristics and identifies them not as needless experimentation but as a necessary result of the attempt to find appropriate forms for extreme situations and complex ideas Dierick s analysis makes clear that Expressionist prose has an intrinsic artistic value and because of certain nuances and different accents must be included in any estimation of the nature and importance of Expressionism as a whole
