Architecture and Embodiment Harry Francis Mallgrave, 2013-06-26 In recent years we have seen a number of dramatic discoveries within the biological and related sciences Traditional arguments such as nature versus nurture are rapidly disappearing because of the realization that just as we are affecting our environments so too do these altered environments restructure our cognitive abilities and outlooks If the biological and technological breakthroughs are promising benefits such as extended life expectancies these same discoveries also have the potential to improve in significant ways the quality of our built environments This poses a compelling challenge to conventional architectural theory This is the first book to consider these new scientific and humanistic models in architectural terms Constructed as a series of five essays around the themes of beauty culture emotion the experience of architecture and artistic play this book draws upon a broad range of discussions taking place in philosophy psychology biology neuroscience and anthropology and in doing so questions what implications these discussions hold for architectural design Drawing upon a wealth of research Mallgrave argues that we should turn our focus away from the objectification of architecture treating design as the creation of objects and redirect it back to those for whom we design the people inhabiting our built environments

Spiritus Loci Bert Daelemans, S.J., 2015-01-08 In *Spiritus Loci* Bert Daelemans who graduated as an architect and a theologian provides an interdisciplinary method for the theological assessment of church architecture Rather than a theory this method is based on case studies of contemporary buildings 1995-2015 which are often criticized for lacking theological depth In a threefold method the author brings to light the ways in which architecture can be theology or theotopy by focusing on *topoi* places rather than *logoi* words Churches reveal our relationship with God by engaging our body mind and community This method proves relevant not only for the way we perceive these buildings but also for the way we use them especially in our prophetic engagement for a better world

Kisho Kurokawa Dennis Sharp, 2002 Known as the Big Eye the Oita Stadium is one of the chosen venues for the next World Cup in 2002 It will be reused for the second stage of the Japan Inter Prefectural Athletic Competition in 2008 after the World Cup continuing to grow in the future to become a large scale all purpose sports park for Oita The whole site covers an area of 225 ha and has

several facilities outside the main football stadium These include general fitness training and lodging centres a botanical pool two multipurpose athletic fields two rugby and soccer practise pitches a softball field tennis courts and other game areas The main stadium features an open track for athletic events as well as the football pitch It can also be used year round for public events aided by its retractable roof For soccer matches spectator seats are placed right up to the edge of the pitch to bring them close to the action To change over for track events a retractable seating system was developed The stadium sits elegantly on its site enhanced by the gentle curves of its spherical design The choice of the sphere Kurokawa says is an expression of abstract symbolism This spherical shape also enables the retractable portion to move along its curved surface The use of Teflon membrane panels with 25 percent light permeability obviates the need for artificial lighting during daylight hours In order for the pitch to get proper exposure to sunlight the elliptical roof opening runs along the north south axis A main arch with perpendicular horizontal sub members follows the elliptical shape of the roof opening Between the roof and the spectator seating below the surrounding mountains can be seen from a slender ventilation clearstorey set just below the roof line This slit of space is designed to create a feeling of openness inside the stadium Since the original design an idea emerged for a moving camera to be located on the main beam to deliver special dynamic images for television audiences around the world

Profane Sakralarchitektur in Wien ab 1960

Heidemarie Seblatnig, 2006

Sacred Buildings Rudolf Stegers, 2008-05-16

The building of religious structures represents a rare opportunity for the architect to concentrate on the creation of volume space and form Sacred architecture is far less determined than other building tasks by functional requirements norms and standards As a rule it is free to unfold as pure architecture Thus in design terms this building task offers enormous freedoms to the architect At the same time however the special atmospherics of sacred spaces call on the part of the architect for a highly sensitive treatment of religion and the relevant cultural and architectural traditions In a systematic section this volume introduces the design technical and planning fundamentals of building churches synagogues and mosques In its project section it also presents about seventy realized structures from the last three decades Drawing upon his in depth knowledge of the subject and his many years of

publishing experience the author offers a valuable analysis of the conceptual and formal aspects that combine to create the religious impact of spaces e.g. the ground plan the shapes of the spaces the incidence of light and materiality Bolles + Wilson Lars Lerup, Mirko Zardini, 2003 The Luxor is a significant milestone in the oeuvre of Bolles Wilson As a major public building it pursues themes first tested in the 1993 new city library in Münster a characteristic plan form an intervention that redefines its context and a synthesis of the abstract with a spatial warmth an ambience that communicates directly and subliminally to a wide audience base The architecture of this German Australian duo does not fit easily into conventional architectural genres Smallness intimacy and precise details characterise their work just like an increasing number of urban interventions that have made a major impact on cities like Hengelo The Hague or Magdeburg The design of the Luxor Theatre the process of its realisation Bolles Wilson's surrounding urban fields and most importantly the internal life in the building engendered by the architecture are fully presented in this book **Carlo Scarpa. Museo Canoviano, Possagno** Judith Carmel-Arthur, Carlo Scarpa, Stefan Buzas, 2002-10-18 A photographic study of the extension to the Museo Canoviano in Possagno Italy built by Venetian architect Carlo Scarpa in 1957 *Pensare l'architettura. Sapere filosofico e fare architettonico* Rocco Pititto, 2017-03-20 Filosofia e architettura costituiscono un unico sapere in funzione del benessere dell'uomo Parlare pensare fare avere delle emozioni sono dimensioni dell'esistenza umana La filosofia ha bisogno dell'architettura ma anche questa ha bisogno della filosofia La costruzione di un ambiente per l'uomo se opera dell'architetto lo soltanto perché dietro ogni artefatto c'è un'idea che trova la sua forma e la sua realizzazione in un progetto Il fare architettonico si lega al sapere filosofico quasi ad affermare che nella figura dell'architetto conviva anche quella del filosofo La filosofia dà all'architettura il fondamento che si costituisce come regola e misura di un'attività tesa a costruire un mondo più umano Dentro questo quadro sono qui riproposti dei percorsi narrativi che vedono l'uomo in relazione con alcuni degli artefatti dell'architettura Sono artefatti che hanno una incidenza nella vita degli individui perché in essi che gli uomini vivono e sperimentano la loro condizione umana il loro patire e il loro sperare La casa come la dimora più originaria dell'essere dell'uomo a difesa della sua sopravvivenza lo spazio sacro con la riscoperta del divino nell'uomo nell'epoca del disincanto la città degli uomini con le sue narrazioni e le sue utopie mancate la biblioteca con la richiesta di una maggiore cultura nel tempo nella crisi della contemporaneità sono alcuni di questi artefatti più rappresentativi rispetto ad altri oggetti di racconto Sono artefatti che disegnano il perimetro entro cui l'essere dell'uomo fa esperienza di sé con i problemi e le difficoltà dell'esistenza ma anche con le sue aspettative i suoi desideri e i suoi sogni
