The Killing of Crazy Horse Thomas Powers,2011-11-01 With the Great Sioux War as background and context and drawing on many new materials Thomas Powers establishes what really happened in the dramatic final months and days of Crazy Horse s life He was the greatest Indian warrior of the nineteenth century whose victory over General Custer at the battle of Little Bighorn in 1876 was the worst defeat ever inflicted on the frontier army But after surrendering to federal troops Crazy Horse was killed in custody for reasons which have been fiercely debated for more than a century The Killing of Crazy Horse pieces together the story behind this official killing

Reich of the Black Sun Joseph P. Farrell,2020-09-04 Why were the Allies worried about an atom bomb attack by the Germans in 1944 Why did the Soviets threaten to use poison gas against the Germans Why did Hitler in 1945 insist that holding Prague could win the war for the Third Reich Why did US General George Patton s Third Army race for the Skoda works at Pilsen in Czechoslovakia instead of Berlin Why did the US Army not test the uranium atom bomb it dropped on Hiroshima Why did the Luftwaffe fly a non stop round trip mission to within twenty miles of New York City in 1944 Reich of the Black Sun takes the reader on a scientific historical journey in order to answer these questions Arguing that Nazi Germany actually won the race for the atom bomb in late 1944 Reich of the Black Sun then goes on to explore the even more secretive research the Nazis were conducting into the occult alternative physics and new energy sources The book concludes with a fresh look at the Nazi Legend of the UFO mystery by examining the Roswell Majestic 12 documents and the Kecksburg crash in the light of parallels with some of the super secret black projects being run by the SS Reich of the Black Sun is must reading for the researcher interested in alternative history science or UFOs

The Third Reich at War Richard J. Evans,2009-03-19 An absorbing revelatory and definitive account of one of the greatest tragedies in human history by the author of The Coming of the Third Reich The Third Reich in Power and Hitler s People This is history in the grand style the kind of large scale narrative that few historians dare to write these days It is difficult to imagine how it could be improved upon let alone surpassed The Washington Post This superb book is not simply a military history it is a comprehensive portrait of a society at war A masterpiece of historical research and analysis Likely to remain the best study of the Third Reich at war for many years to come The Christian Science Monitor Adroitly blending narrative description and analysis Richard J Evans portrays a society rushing headlong to self destruction and taking much of Europe with it Interweaving a broad narrative of the war s progress from a wide range of people Evans reveals the dynamics of a society plunged into war at every level The great battles and events of the conflict are here but just as telling is Evans s re creation

of the daily experience of ordinary Germans in wartime At the center of the book is the Nazi extermination of the Jews The Third Reich at War lays bare the most momentous and tragic years of the Nazi regime Strategic Studies Thomas G. Mahnken, Joseph A. Maiolo, 2014-01-10 The second edition of Strategic Studies A Reader brings together key essays on strategic theory by some of the leading contributors to the field This revised volume contains several new essays and updated introductions to each section The volume comprises hard to find classics in the field as well as the latest scholarship The aim is to provide students with a wide ranging survey of the key issues in strategic studies and to provide an introduction to the main ideas and themes in the field The book contains six extensive sections each of which is prefaced by a short introductory essay The Uses of Strategic Theory Interpretation of the Classics Instruments of War Intelligence and Deception Nuclear Strategy Irregular Warfare and Small Wars Future Warfare Future Strategy Overall this volume strikes a balance between theoretical works which seek to discover generalisations about the nature of modern strategy and case studies which attempt to ground the study of strategy in the realities of modern war This new edition will be essential reading for all students of strategic studies security studies military history and war studies as well as for professional military college students Sex and War Malcolm Potts, Thomas Hayden, 2010-02-02 As news of war and terror dominates the headlines scientist Malcolm Potts and veteran journalist Thomas Hayden take a step back to explain it all In the spirit of Guns Germs and Steel Sex and War asks the basic questions Why is war so fundamental to our species And what can we do about it Malcolm Potts explores these questions from the frontlines as a witness to war torn countries around the world As a scientist and obstetrician Potts has worked with governments and aid organizations globally and in the trenches with women who have been raped and brutalized in the course of war Combining their own experience with scientific findings in primatology genetics and anthropology Potts and Hayden explain war's pivotal position in the human experience and how men in particular evolved under conditions that favored gang behavior rape and organized aggression Drawing on these new insights they propose a rational plan for making warfare less frequent and less brutal in the future Anyone interested in understanding human nature warfare and terrorism at their most fundamental levels will find Sex and War to be an illuminating work and one that might change the way they see the world An Atomic Love Story Shirley Streshinsky, Patricia Klaus, 2013-10-23 A gripping narrative of the love and betrayal of J Robert Oppenheimer told through the lives of three unique women Set against a dramatic backdrop of war spies and nuclear bombs An Atomic Love Story unveils a vivid new view of a tumultuous era and one of its most important figures In the early decades of the 20th century three highly ambitious women found their way to the West Coast where each was destined to collide with the young Oppenheimer the enigmatic physicist whose work in creating the atomic bomb would forever impact modern history His first and most intense love was for Jean Tatlock though he married the tempestuous Kitty Harrison both were members of the Communist Party and was rumored to have had a scandalous affair with the brilliant Ruth Sherman Tolman ten years his senior and the wife of another celebrated physicist

Although each were connected through their relationship to Oppenheimer their experiences reflect important changes in the lives of American women in the 20th century the conflict between career and marriage the need for a woman to define herself independently experimentation with sexuality and the growth of career opportunities Beautifully written and superbly researched through a rich collection of firsthand accounts this intimate portrait shares the tragedies betrayals and romances of an alluring man and three bold women revealing how they pushed to the very forefront of social and cultural changes in a fascinating volatile era The A to Z of World War II Anne Sharp Wells,2009-09-28 World War II dominates world history today as it dominated world attention over 60 years ago In spite of the alliances that bound many of the same participants the war was essentially two separate but simultaneous conflicts one involved Japan as the major antagonist and took place mostly in Asia and Pacific and the other initiated by Germany and Italy was contested mainly in Europe North Africa the Mediterranean and the Atlantic The A to Z of World War II The War Against Japan traces the brutal conflict from Japan s seizure of Chinese territory in 1931 through the onset of war with the Western Allies in 1941 to the use of atomic weapons by the United States in 1945 It also addresses the aftermath of the war including the formation of the United Nations and the American occupation of Japan As the first of two volumes covering World War II this volume concentrates on the war in Asia and the Pacific so the user benefits from the comprehensive explanations of the people places and events that shaped much of that region s 20th century history *War and Displacement in the Twentieth Century* Sandra Barkhof,Angela K. Smith,2014-03-14 Human displacement has always been a consequence of war written into the myths and histories of centuries of warfare However the global conflicts of the twentieth century brought displacement to civilizations on an unprecedented scale as the two World Wars shifted participants around the globe Although driven by political disputes between European powers the consequences of Empire ensured that Europe could not contain them Soldiers traversed continents and civilians often followed them or found themselves living in territories ruled by unexpected invaders Both wars saw fighting in Europe Africa the Middle East and the Far East and few nations remained neutral Both wars saw the mass upheaval of civilian populations as a consequence of the fighting Displacements were geographical cultural and psychological they were based on nationality sex gender or age They produced an astonishing range of human experience recorded by the participants in different ways This book brings together a collection of inter disciplinary works by scholars who are currently producing some of the most innovative and influential work on the subject of displacement in war in order to share their knowledge and interpretations of historical and literary sources The collection unites historians and literary scholars in addressing the issues of war and displacement from multiple angles Contributors draw on a wealth of primary source materials and resources including archives from across the world military records medical records films memoirs diaries and letters both published and private and fictional interpretations of experience *Why the Allies Won* Richard Overy,2024-11-12 Overy has written a masterpiece of analytical history posing and answering one of the great questions of

the century Sunday Times London Richard Overy's bold book begins by throwing out the stock answers to this great question Germany doomed itself to defeat by fighting a two front war the Allies won by sheer weight of material strength In fact by 1942 Germany controlled almost the entire resources of continental Europe and was poised to move into the Middle East The Soviet Union had lost the heart of its industry and the United States was not yet armed The Allied victory in 1945 was not inevitable Overy shows us exactly how the Allies regained military superiority and why they were able to do it He recounts the decisive campaigns the war at sea the crucial battles on the eastern front the air war and the vast amphibious assault on Europe He then explores the deeper factors affecting military success and failure industrial strength fighting ability the quality of leadership and the moral dimensions of the war The Virtual Weapon and International Order Lucas Kello,2017-09-26 An urgently needed examination of the current cyber revolution that draws on case studies to develop conceptual frameworks for understanding its effects on international order The cyber revolution is the revolution of our time The rapid expansion of cyberspace brings both promise and peril It promotes new modes of political interaction but it also disrupts interstate dealings and empowers non state actors who may instigate diplomatic and military crises Despite significant experience with cyber phenomena the conceptual apparatus to analyze understand and address their effects on international order remains primitive Here Lucas Kello adapts and applies international relations theory to create new ways of thinking about cyber strategy Kello draws on a broad range of case studies including the Estonian crisis the Olympic Games operation against Iran and the cyber attack against Sony Pictures Synthesizing qualitative data from government documents forensic reports of major incidents and interviews with senior officials from around the globe this important work establishes new conceptual benchmarks to help security experts adapt strategy and policy to the unprecedented challenges of our times **Lost Crusader** John Prados,2003 John Prados is a senior researcher at the National Security Archive in Washington *Hitler's Miracle Weapons: the Secret History of the Rockets and Flying Crafts of the Third Reich* Friedrich Georg,2003 Following on from the success of volume 1 Friedrich Georg's second book in the series covers unconventional short and medium range weapons In particular this volume includes a wealth of information about the V rocket programme not just the more familiar V 1 and V 2 but special variants of these two rockets as well as later experimental craft and weaponry Following a fascinating examination of pre war efforts to build flying bombs the author examines the V 1 and V 2 projects in great detail Particular attention is paid to special variants that have previously received little coverage These include the V 2 A 4 America Rocket and V 2s designed to carry nuclear and radiological warheads The capability of the Germans to deploy such weapons is also discussed A large number of weird and wonderful projects that never left the drawing board are examined including the FR 35 V 6 V 101 Waterfall and Naval EMW A 7 rockets The fascinating final section examines German plans to utilise such rocketry against London and Paris in 1945 as well as recounting the activities of V weapons on other fronts including Italy Yugoslavia and the Eastern Front The text is supported by b w photographs and

16 superb pages of colour artwork including profiles computer generated images of designs that never flew and pictures of the author's own models

Spies in the Congo Susan Williams, 2018-05-31 Spies in the Congo is the untold story of one of the most tightly guarded secrets of the Second World War America's desperate struggle to secure enough uranium to build its atomic bomb The Shinkolobwe mine in the Belgian Congo was the most important deposit of uranium yet discovered anywhere on earth vital to the success of the Manhattan Project Given that Germany was also working on an atomic bomb it was an urgent priority for the US to prevent uranium from the Congo being diverted to the enemy a task entrusted to Washington's elite secret intelligence agents Sent undercover to colonial Africa to track the ore and to hunt Nazi collaborators their assignment was made even tougher by the complex political reality and by tensions with Belgian and British officials A gripping spy thriller Spies in the Congo is the true story of unsung heroism of the handful of good men and one woman in Africa who were determined to deny Hitler his bomb

The Effect of Science on the Second World War G. Hartcup, B. Lovell, 2016-01-08 The latest advances in science were fully exploited in the Second World War They included radar sonar improved radio methods of reducing disease primitive computers the new science of operational research and finally the atomic bomb necessarily developed like all wartime technology in a remarkably short time Such progress would have been impossible without the cooperation of Allied scientists with the military The Axis powers failure to recognise this was a major factor in their defeat

The First War of Physics Jim Baggott, 2011-08-15 An epic story of science and technology at the very limits of human understanding the monumental race to build the first atomic weapons Rich in personality action confrontation and deception The First War of Physics is the first fully realized popular account of the race to build humankind's most destructive weapon The book draws on declassified material such as MI6's Farm Hall transcripts coded soviet messages cracked by American cryptographers in the Venona project and interpretations by Russian scholars of documents from the soviet archives Jim Baggott weaves these threads into a dramatic narrative that spans ten historic years from the discovery of nuclear fission in 1939 to the aftermath of Joe 1 August 1949's first Soviet atomic bomb test Why did physicists persist in developing the atomic bomb despite the devastation that it could bring Why despite having a clear head start did Hitler's physicists fail Could the soviets have developed the bomb without spies like Klaus Fuchs or Donald Maclean Did the allies really plot to assassinate a key member of the German bomb program Did the physicists knowingly inspire the arms race The First War of Physics is a grand and frightening story of scientific ambition intrigue and genius a tale barely believable as fiction which just happens to be historical fact

World War II in Asia and the Pacific and the War's Aftermath, with General Themes Loyd Lee, 1998-10-23 A companion to World War II in Europe Africa and the Americas this volume reevaluates the most enduring literature on basic aspects of the war in Asia and the Pacific It also covers themes pertaining to societies at war culture the arts and science and technology as well as international relations and the postwar world Included are not only grand strategy military and naval campaigns and matters of diplomacy but also resistance collaboration

prisoners of war and broad topics of the home front including chapters on gender issues film literature popular culture and propaganda This volume and its companion provide the first comprehensive historiographic reference work on the war Each chapter describes the state of knowledge on the topic relating each bibliographic reference to the chapter s themes and issues and concludes with a bibliography Recent original scholarship is included when it aids new understanding and older works of enduring value also find a place The essays in this volume will interest scholars and college teachers as well as advanced students and serious amateurs seeking insight into the history of the war and its literature
