## Healing The Wounds:

Designed to Heal Jennie A. McLaurin, Cymbeline Tancongco Culiat, 2021 A rare combination of vivid science compassionate storytelling and lasting spiritual lessons A delight to read Philip Yancey Our bodies are designed to heal We fall off our bikes and skin our knees and without effort on our part the skin looks like new in a few days But while our skinned knees easily heal it can sometimes feel like our emotional and relational wounds are left gaping open broken beyond repair If our bodies instinctively know how to heal physical injuries could they also help us understand how to restore painful emotional and relational ruptures In their groundbreaking debut book physician Jennie McLaurin and scientist Cymbeline T Culiat write *Designed to Heal* a fascinating look at how the restorative processes of the body can model patterns we may adapt to heal the acute and chronic wounds of our social bodies Through engaging patient stories imaginative travels through the body's microcellular landscapes accessible references to current research and reflections on the image of God *Designed to Heal* offers a new perspective for healing our social divisions By learning how the body is created with mechanisms that optimize a flourishing recovery from life's inevitable wounds we are given a model for hopeful faithful and enduring healing in all other aspects of our lives Our wounds don't have to have the last word
