Biblical Exegesis and Church Doctrine Raymond E. Brown, 2002-08-15 In Roman Catholic circles the novelty of contemporary scripture interpretation has been grasped on a surface level Clearly to most scholars the gospels were not written by eyewitnesses and are not necessarily literal accounts of Jesus words Scholars assert that the Bible is a diversified library and not necessarily all history and that many of the dogmas of the church go beyond what the original biblical authors and audience would have thought To some liberally minded Catholics these assertions lessen the authority of doctrine and free them to search out totally new positions while ignoring what has been traditionally taught To some more conservatively minded Catholics horrified by the possibility of doctrinal breakdown the only answer is to reject contemporary biblical

exegesis with its historical and critical components and to hold on stubbornly to past attitudes toward scripture as if such attitudes were themselves doctrine This book argues that neither reaction has grasped the novelty of scripture interpretation at a depth level Centrist Catholic New Testament interpretation while firm in its historical approach to the scriptures often detects lines of development that form an intelligible connective between the biblical period and the doctrines of the later church Indeed the implications of such a centrist exegesis place the authority for doctrine where it has always been in genuine Catholic thought as opposed to biblical fundamentalism not in the book but in the church interpreting the book As it faces new situations the church under the guidance of the Spirit gains new insights into the revelation to which the Bible bears witness The Love That Moves the Sun Paul Dominiak ,2024-08-30 The season of Advent traditionally involved

meditation upon the Four Last Things heaven hell death and judgement This ancient but nearly lost sacred art of contemplation encouraged Christians to evaluate who they were what they treasured and how they ought to live in view of the world to come The Love That Moves the Sun revives this ancient practice and marries it with contemporary concerns Each chapter considers one of the Last Things in relation to a modern crisis from the climate emergency rise of populism and racial injustice to the economic inequalities of class In a time of compound crises retrieving the sacred art of contemplating the Last Things gives a vision of hope and direction in a chaotic world of uncertainty The first advent began with an angelic messenger announcing the coming of Christ to Mary The Love That Moves the Sun enables us to hear a fresh annunciation in our own time calling us to join in with God s salvation of a groaning creation and the hope of a new earth where justice dwells

Principles of Subjective Anthropology Binggong Chen,2023-03-27 This book puts forward the concept of subjective anthropology and outlines a theoretical system that will allow subjective anthropology to qualify as a new academic discipline in its own right In an effort to respond to the field s proper role as the science of humanity subjective analysis has been introduced into the study of anthropology The book fills two distinct gaps in our knowledge and understanding of modern man offering detailed descriptions of personality and of groups while also advancing the theory of structure and choice The book formulates seven basic principles of subjective anthropology and divides anthropology into three major branches subjective anthropology cultural anthropology and biological or physical anthropology which can be

further divided into sub branches The book pursues three key goals advancing and developing the theoretical system of subjective anthropology reconstructing the discipline of anthropology and establishing a Chinese anthropology with Chinese characteristics Chinese visions and Chinese styles STRUCTURE AND CHOICE Chen Binggong,2021-04-05 This book employs the methods of philosophical anthropology to examine the question of what the noumenon of human life is which has been debated for thousands of years This work elaborates upon the noumenon of human life that is man s structure and choice The noumenon of human life differs essentially from the animals in bringing about the unity of structure and choice The noumenon of human life or rather man s structure and choice provides the motive force for the survival and development of individuals and groups families organizations and states as well as the basic ways in which human values can be possible of realization It is only through the instrumentality of man s structure and choice that humans can attain their goals and grasp the laws of development and change of things In passing criticism upon structuralism and existentialism the author tries to reconstruct the ontology of human life whereby his theory provides an ontological foundation for the humanities and social sciences a theoretical framework for an idealistic anthropological commitment to self transcendence a scientific philosophy of life for us and a good deal of enlightenment about many theoretical prerequisites Eternal Life? Hans Kung,2003-04-07 The fact cannot be overlooked that we are in the midst of a sociological crisis of orientation on the grand scale New problems and needs have become insistent new fears and longings have come to light Many are looking for a new foothold a fundamental certainty a compass for their life and the life of other human beings The inconsistencies and ambivalence of the phenomena cannot conceal the fact that religion is attracting greater attention the old religion and many new ones the Christian religion as well as the Islamic Hindu and Buddhist religions In East and West anyway the God Progress seems to have lost rapidly something of its credibility belief in a continually better life with the aid of science and technology and also through revolution and socialism has been shaken by serious doubts And while the elderly have not been able with all the aids of psychology to come to terms with the meaning of death younger people supposedly a no future generation apathetic noncommittal nervous and self destructive are asking afresh about the missing sense of life Meanwhile though science did the most in the last century to destroy belief in immortality and made stupendous efforts to prolong life it is medicine today that has broken through the taboos in regard to death and with its research into dying has given new life to the question of death and survival But has medicine or perhaps parapsychology proved that there is life after death A Transforming Vision George Westhaver,2018-01-31 The study of Christian theology in the last half century has seen a major renaissance in Trinitarian thought which has attempted to connect Trinitarian theology to all aspects of Christian faith and practice This revival has often addressed the unfortunate split which has haunted much modern theological endeavour between theology and both prayer and practice the disjunction between thought about God and the movement of the heart toward God in transformed lives Drawn from papers given at a Pusey House conference in 2015 the contributors to this

collection explore what it means to know and love the Triune God and how the knowledge of God can be a transforming and saving knowledge

And Still We Wait Riyako Cecilia Hikota, 2018-01-30 In response to the recent critiques made against Balthasar's interpretation of Christ's descent into hell on Holy Saturday this book argues that Balthasar does not intend to present a radical reinterpretation of the doctrine in contrast to the traditional teachings but rather intends to fully appreciate the in-betweenness of Holy Saturday as the day of transition from the cross to the resurrection from the old aeon to the new The book further argues that this awareness of the in-betweenness can be detected throughout Balthasar's theological corpus and provides a clue to interpret his thoughts on Christian discipleship and suffering After all the Christian existence is also characterized by the transition from the old aeon to the new from suffering to victory The Christian believes that their victory is already here and not here yet In this sense the Christian still lives in Holy Saturday Eventually we can deepen our understanding of Christian discipleship and suffering in the light of Holy Saturday In short we could patiently endure our Holy Saturday because of Christ's Holy Saturday in hell

Sartre on Sin Kate Kirkpatrick, 2017-10-27 Sartre on Sin Between Being and Nothingness argues that Jean Paul Sartre's early anti humanist philosophy is indebted to the Christian doctrine of original sin On the standard reading Sartre's most fundamental and attractive idea is freedom he wished to demonstrate the existence of human freedom and did so by connecting consciousness with nothingness Focusing on Being and Nothingness Kate Kirkpatrick demonstrates that Sartre's concept of nothingness *le n ant* has a Christian genealogy which has been overlooked in philosophical and theological discussions of his work Previous scholars have noted the resemblance between Sartre's and Augustine's ontologies to name but one shared theme both thinkers describe the human as the being through which nothingness enters the world However there has been no previous in depth examination of this resemblance Using historical exegetical and conceptual methods Kirkpatrick demonstrates that Sartre's intellectual formation prior to his discovery of phenomenology included theological elements especially concerning the compatibility of freedom with sin and grace After outlining the French Augustinianisms by which Sartre's account of the human as between being and nothingness was informed Kirkpatrick offers a close reading of Being and Nothingness which shows that the psychological epistemological and ethical consequences of Sartre's *le n ant* closely resemble the consequences of its theological predecessor and that his account of freedom can be read as an anti theodicy Sartre on Sin illustrates that Sartre's insights are valuable resources for contemporary hamartiology

The Primacy of Persons and the Language of Culture William H. Poteat, 1993 Building upon the scholarship of Michael Polanyi William Poteat has dedicated himself to offering an alternative model to the Cartesian dichotomy of mind and matter that has dominated Western thought for centuries These

essays collected by James Nickell and James Stines cover a wide range of subjects from Poteat's analysis of the epistemological crisis brought on by the Cartesian program to his first attempts at formulating an alternative to the mind/body dichotomy. These essays relentlessly diagnose the present situation of Western thought by making explicit the philosophical presuppositions to which it is committed. They include theological affirmations, reflections on epistemology, conceptual analyses as well as dialogues with other writers in the field of cultural criticism and linguistic theory such as George Steiner, Noam Chomsky, and Walker Percy. Most significant is Poteat's bold affirmation of the primacy of persons and his analysis and critique of our cultural misconstructions of human awareness. *The Primacy of Persons and the Language of Culture* provides an excellent introduction to the scholarship of William Poteat. It should be of particular interest to scholars of philosophy and theology as well as others who share Poteat's deep concern for the state of human culture. **The Gospel**

Ethics and Phenomenology Mark Sanders, J. Jeremy Wisniewski, 2012-03-22. *Ethics and Phenomenology* is a collection of essays that explore the relationship between moral philosophy and the phenomenological tradition. Phenomenology is a vast and rich philosophical tradition which seeks to explain how we perceive the world. This in turn involves questions about one's relationship to the world and how one both acts and should act in the world. For this reason, phenomenology entails an ethics even if such an ethics is not always apparent in the work of phenomenological thinkers. The book is devoted to two central tasks. Section One offers essays exploring the resources available to moral philosophy in the work of the major phenomenologists of the 20th century including Husserl, Heidegger, Merleau-Ponty, Sartre, and others. Part Two consists of essays demonstrating the way that the phenomenological method can facilitate advances in our thinking through the exploration of contemporary ethical issues including environmentalism, intellectual property, parenting, and others.

Heaven Roger Ferlo, 2007-04. This book of short personal essays gathers the hopes and reflections of writers from theology, fiction, and poetry including Rick Moody, Nora Gallagher, Robert Orsi, Barbara Brown Taylor, Phyllis Tickle, Alan Jones, Maggie Robbins, Barbara Crafton, Cynthia Bourgeault, and Susan Wheeler. *Media, Technology and the Imagination* Marie

Hendry, Jennifer Page, 2013-08-19. The dynamic, precarious relationship between technology and imagination, or more broadly between the sciences and the humanities, is a thrilling crux offering possibilities scholars and artists of previous generations might have only hoped for in the most abstract way. No longer is technological advancement confined to the laboratory or to the pages of speculative fiction; it is an accepted, expected aspect of modern existence, including contemporary art.

performance and literature From the ways we communicate to the ways we create technology has become a conduit as well as an inspiration for imaginative innovation The advent and accessibility of new media communication outlets and innovative software programs have democratized the creative landscape building a community of professionals and amateurs who can freely discuss and shape the way literature art and performance are created and perceived Just as technology has been liberated from categorical confines it has helped art and literature be realized as entities that occur in places besides galleries and libraries Tablets and e readers for example make it possible for literary enthusiasts to read books that are out of print difficult to find or even self published by amateur writers which would have merely been a bibliophile s dream as little as a decade ago Correspondingly the essays in this volume examine the intersection of technology and imaginative creation as it applies to and influences modern film fiction graphic novels and pedagogical practice The contributors investigate how technology has indelibly changed the practice of literary and cultural analysis and even the most basic facets of contemporary society communication relation and creation
