Heilprin,Louis Heilprin,1906 **Space in Diachrony** Silvia Luraghi,Tatiana Nikitina,Chiara Zanchi,2017-08-14 Space is a fundamental dimension of human life and is pervasive in human experience Research on space has highlighted the possible asymmetrical nature of spatial relations Differences in the encoding of goals and sources of motion are a case in point and cross linguistic coding tendencies show that path is less frequently flagged by a dedicated case than goal source origin and static location locative Interestingly such asymmetries may correlate with certain types of landmark as in the case of toponyms or of animate entities Even though these issues have been focused upon both in typological and psycholinguistic research they remain largely open The papers in this collection aim to show that a diachronic approach may shed light on the way in which asymmetries in the space domain come about over time thus contributing to the clarification of synchronically puzzling facts Pedro de Valencia and the Catholic Apologists of the Expulsion of the Moriscos Grace Magnier,2010-03-08

The Spanish Moriscos Muslims forcibly converted to Christianity were expelled by Philip III between 1609 and 1614 Subsequently writers known as Catholic Apologists wrote justifying the event Pedro de Valencia humanist biblical scholar jurist and royal Chronicler condemned expulsion Both Apologists and Pedro de Valencia made their case by invoking Divine Providence the former contended that millenarian prophecies and apocalyptic visions were signs of divine warning beforehand and of approval afterwards Valencia urged Philip III to act as a shepherd king arguing that Divine Providence would punish monarchs who put political expediency before moral rectitude Drawing on unpublished source material the book juxtaposes the ideals of Valencia a Christian humanist with the bigotry superstition and racism of the Apologists

rhetorical and ideological purposes while they simultaneously incorporate key Machiavellian concepts into their own advice
