Cocaine Edmundo Morales, 1989-11 Cocaine Much is known about the damage done by this drug in the United States yet how much is actually known of its impact at its source Though most processed cocaine comes from Colombia more than half of the coca paste from which the drug is made originates in the vast jungle slopes shared by Bolivia and Peru People here have chewed coca leaves for centuries but only over the last twenty

years has coca become a major cash crop Now it supports local economies feeds inflation and affects the social behavior of Peruvians Edmundo Morales a Peruvian who is now a drug researcher in the United States has conducted an extensive study of this underground economy to show how cocaine has changed the social cultural economic and political climate of Peru and why government efforts are unable to stop it With statistics on coca agriculture a description of coca paste manufacturing and an examination of the industry s social structure Morales s book is an inside look at the white gold rush that only a Peruvian could have written It offers a new perspective for understanding a problem that is usually seen only as it affects our own society and it proposes a new look at policies directed toward its control *Illegal Drugs, Economy, and Society in the Andes* Francisco E. Thoumi, 2003 Table of contents *Innocent Bystanders* Philip Keefer, Norman Loayza, 2010-03-24 This book presents evidence that drug policies impose high costs on poor transit and producer countries It argues that in the face of great uncertainty about the benefits of alternative drug policies those with lower social costs should receive greater emphasis *Cocaleros. Drugs and Money Robert E. Grosse, 2001-03-30 Money laundering has been around as long as there have been illicit businesses since criminals have always had to convert their ill gotten gains into clean financial instruments in order to utilize them in legitimate business Grosse explores how drug traffickers turn profits from street sales of cocaine and crack into bank accounts airplanes securities investments and other uses These schemes are both creative and extensive from shipping suitcases of dollars to Mexico to buying gold with drug cash in California to faking the export of clothing from Colombia to Panama The amounts of money involved are often staggering hundreds of millions of dollars in most cases Grosse also considers some of the issues raised by money laundering He offers advice to banks and other financial institutions that hope to avoid becoming involved in a money laundering process He examines the social costs and benefits of money laundering in particular the charge that the rapid development of Miami in the 1980s was due directly to the hundreds of millions of cocaine dollars invested in real estate and businesses by the cocaine cowboys Increasing law enforcement has in Grosse's opinion only resulted in more clever laundering schemes and recent discussion about legalizing narcotics will prove even more costly for the United States
