Elections In Western Nations 1945 1968:

Elections in Western Nations, 1945-1968 Derek W. Urwin, 1967 **Coalition Strategies of Marxist Parties** Trond Gilberg, 1989 During the early part of this decade many individuals both policy makers and scholars wondered about the new look of some communist parties as they billed themselves as potential participants in the pluralistic game of politics in many parts of the world This image was certainly different from the old notion of dedicated revolutionaries who scornfully rejected the existing order and plotted its overflow How genuine was the new look Were the communists sincere when they discussed interaction with other elements of political order in which they operated What were their tactical policies in pursuit of these strategic goals Some of us began to examine these questions more systematically We ran a panel at an academic conference enjoyed the feedback from our colleagues and began the process of writing this book Now several years later it is a finished product after many full scale revisions and updates The topic is still very relevant and that shows the enduring importance of the questions asked a number of years ago Scholars will need to return to this question in the future perhaps the best strategy is a continuous examination of this crucial subject **Elections in Western Nations, 1945-1968. Ed. by D.W. Urwin**

D. W. Urwin, *Politics and Political Change* Robert I. Rotberg, 2001 This collection shows how the study of past politics can be deepened by theory and practice from political science sociology and economics and how the application of quantitative methods to received assumptions can expand our understanding of all political history **Pluralism and Corporatism** Reginald J. Harrison, 2019-11-21 First published in 1980 In *Pluralism and Corporatism* the author examines the pluralist conception of democratic advanced industrial societies and shows to what extent an alternative conception the corporatist society is more appropriate today The book reviews criticisms of standard conceptions of industrial society and draws empirical support for some new approaches from the politics of Britain France Germany Holland Belgium Italy Japan and the United States an analysis which shows that there are tendencies everywhere towards the fragmentation of government responsibility and its assumption both by governmental and organised group bureaucracies The author argues that this pattern of policy making is in fact in conflict with standards of behaviour which are fundamental to the ideal of representative and accountable democratic government Both critical review and analysis are organised in a way which will maximise the usefulness of *Pluralism and Corporatism* as a theoretical complement to those more standard texts in comparative government which already provide a study in depth of individual countries It seeks to review changing political culture political economy party and interest intermediation bureaucratic influence constitutional effects on political behaviour and the international constraints upon government which arise from interdependence It will become essential reading for courses on the politics of advanced industrial societies and particularly of Western Europe **How to Research Elections** Fenton S. Martin, Robert Goehlert, 2000 Martin and Goehlert authors of the definitive CQ's Resource Guide to Modern Elections have written a simple but comprehensive explanation for users of all skill levels who need to gather

History Of The International: World Socialism 1943-1968 Julius Braunthal, 2019-03-20 With this volume the history of the first century of the International reaches its conclusion Originally I had intended that the trilogy would come to a close with the centenary of the founding of the First International in September 1964 But before I could finish writing the third volume the tragedy of the Communist revolution in Czechoslovakia had played itself out The Spring of Prague of 1968 having set in motion a process of change from a Communist dictatorship to a Socialist democracy was followed within a few months by the invasion of the armies of the five Warsaw Pact powers to forestall reformation in Czechoslovakia Both revolution and counter revolution were events of the utmost significance for the history of Socialism the revolution for showing that it was possible for a Communist system of totalitarian dictatorship to be transformed without resort to force and the counter revolution for showing how the regime in the Soviet Union has remained essentially unaltered since Stalin's death The invasion of Czechoslovakia brutally called in question any optimistic perspective of development within the Soviet Union itself
