Science and Technology in Nineteenth-Century America Todd Timmons, 2005-09-30 The 19th Century was a period of tremendous change in the daily lives of the average Americans Never before had such change occurred so rapidly or and had affected such a broad range of people And these changes were primarily a result of tremendous advances in science and technology Many of the technologies that play such a central role in our daily life today were first invented during this great period of innovation everything from the railroad to the telephone These inventions were instrumental in the social and cultural developments of the time The Civil War Westward Expansion the expansion and fall of slave culture the rise of the working and middle classes and changes in gender roles none of these would have occurred as they did had it not been for the science and technology of the time *Science and Technology in Nineteenth Century America* chronicles this relationship between science and technology and the revolutions in the lives of everyday Americans The volume includes a discussion of Transportation from the railroad and steamship to the first automobiles appearing near the end of the century Communication including the telegraph the telephone and the photograph Industrialization how the growing factory system impacted the lives of working men and women Agriculture how mechanical devices such as the McCormick reaper and applications of science forever altered how farming was done in the United States Exploration and navigations the science and technology of the age was crucial to the expansion of the country that took place in the century and The book includes a timeline and a bibliography for those interested in pursuing further research and over two dozen fascinating photos that illustrate the daily lives of Americans in the 19th Century Part of the *Daily Life through History* series this title joins *Science and Technology in Colonial America* in a new branch of the series titles specifically looking at how science innovations impacted daily life **Constructive Imperialism, Experts and Crisis in Colonial Cyprus** Serkan Karas, 2021-09-28 This book explores the colonial history of Cyprus through the history of technology Based on materialist and actor network approaches to power it unfolds the role of technology in the formation of British colonial rule during critical episodes in Cyprus It considers the entanglement of colonial rule and technology in four cases of infrastructural development the island wide electrification project Famagusta and Larnaca Harbours and the Cyprus Government Railway Throughout these cases the reader will discover the expert based developmentalist and material ways of governing crises with which the British Empire expected to reproduce and prolong its rule on the island **Visions of Electric Media** Ivy Roberts, 2025-10-01

Visions of Electric Media is an historical examination into the early history of television as it was understood during the Victorian and Machine ages How did the television that we use today develop into a functional technology What did

Victorians expect it to become How did the vision of television change once viewers could actually see pictures on a screen We will journey through the history of television from the first indications of live communications in technology and culture in the late nineteenth century to the development of electronic televisual systems in the early twentieth century Along the way we will investigate the philosophy folklore engineering practices and satires that went into making television a useful medium

Sustainable Energy Transformations, Power and Politics Sharlissa Moore, 2018-09-03 This book analyses energy transitions and the opportunities and challenges for building sustainable energy systems to improve human capabilities while protecting the environment Sufficient and secure energy supply is critical to human thriving and socioeconomic development Yet energy systems are also implicated in the most pressing socio environmental challenges of our time climate change air pollution and water and land use This book examines what is arguably the most ambitious vision for a renewable energy based system worldwide This vision often called Desertec is for a regional electricity system supplying North Africa Europe and the Middle East with sustainable and affordable power The behemoth plan would entail building dozens of large scale solar and wind power plants mostly in North Africa interconnecting the fragmented transmission infrastructure of 38 Mediterranean countries and linking North Africa to the European Union EU through undersea transmission cables Within the Mediterranean the book focuses on Morocco which is one of the most advanced developing countries in renewable energy scale up to understand its motivations for building renewable energy and the effects on sustainable development The book therefore takes a unique multi scalar approach to understanding the social and political aspects of energy transitions weaving together the views of villagers living near Morocco s first solar energy zone with the perspectives of national decision makers in Morocco with the views of European policymakers and major transnational energy companies in the Mediterranean region This book will be of great interest to students scholars and policymakers interested in energy transitions sustainable and renewable energy Mediterranean politics sustainable development and environment and sustainability more generally

The Playful Crowd Gary Cross, John K. Walton, 2005-10-18 During the first part of the twentieth century thousands of working class New Yorkers flocked to Coney Island in search of a release from their workaday lives and the values of bourgeois society On the other side of the Atlantic British workers headed off to the beach resort of Blackpool for entertainment and relaxation However by the middle of the century a new type of park began to emerge providing well ordered squeaky clean and carefully orchestrated corporate entertainment Contrasting the experiences of Coney Island and Blackpool with those of Disneyland and Beamish Gary S Cross and John K Walton explore playful crowds and the pursuit of pleasure in the twentieth century to offer a transatlantic perspective on changing ideas about leisure class and mass culture Blackpool and Coney Island were the definitive playgrounds of the industrial working class Teeming crowds partook of a gritty vulgarity that offered a variety of pleasures and thrills from roller coaster rides and freak shows to dance halls and dioramas of exotic locales Responding to the new money and mobility of the working class the

purveyors of Coney Island and Blackpool offered the playful crowd an industrial saturnalia Cross and Walton capture the sights and sounds of Blackpool and Coney Island and consider how these Sodoms by the sea flouted the social and cultural status quo The authors also examine the resorts very different fates as Coney Island has now become a mere shadow of its former self while Blackpool continues to lure visitors and offer new attractions The authors also explore the experiences offered at Disneyland and Beamish a heritage park that celebrates Britain s industrial and social history While both parks borrowed elements from their predecessors they also adapted to the longings and concerns of postwar consumer culture Appealing to middle class families Disney provided crowds a chance to indulge in child like innocence and a nostalgia for a simpler time At Beamish crowds gathered to find an escape from the fragmented and hedonistic life of modern society in a reconstructed realm of the past where local traditions and nature prevail

Cities of Light and Heat Mark H. Rose,1995-01-01 Cities of Light and Heat takes us to Kansas City and Denver during the late nineteenth century when gas and electricity were introduced to these instant cities of the west With rich detail Mark Rose shows how the new technology spread during the next century from a few streets and businesses within the city limits to countless private homes in the suburbs In Kansas City and Denver as in most communities throughout the U S business executives city leaders and engineers acted as early promoters of the new technology But by the early 1900s educators home builders architects and salespersons were becoming increasingly important as gas and electric utilities and appliances reached more and more American homes But these voices for the new technology brought with them their own social attitudes and cultural values By mid century whether in the classroom or in advertisements Americans were regularly encouraged to fit the new technology within prevailing notions of cleanliness comfort convenience and gender Although in hindsight the spread of modern technology might seem inevitable to us Rose shows how even the leaders of the nation s great gas and electric corporations with their vast production and distribution facilities were subject to geography competing ideologies urban politics and even the choices of ordinary consumers Rose thus locates the driving force behind the diffusion of technology in the neighborhoods kitchens and offices of the city Cities of Light and Heat shows the importance of culture politics and urban growth in shaping technological change in the cities of North America

The Economics of Energy and the Production Process Guido Buenstorf,2004-03-25 Guido Buenstorf s book is a splendid attempt to break new ground in the theory of production Turning away from the ever more

abstract and theoretically empty production function approach he shows how changing physical constraints in the utilisation of energy systematically affect production processes in the economy With his analysis the author challenges the value based approach to production He outlines the contours of a richer theory which is capable of accounting for physical and technological aspects without losing sight of their economic implications Ulrich Witt Max Planck Institute for Research into Economic Systems Germany This book makes a fundamental contribution to economics in that it deals with production theory from a perspective that integrates economics with engineering and science It represents a far more realistic interpretation than the standard neoclassical approach and will act as a stimulus for further research in this area Robert U Ayres INSEAD France The economics of energy has been a contested issue over the past century Although it has not figured prominently in mainstream economics numerous alternative proposals have called for energy to play a more central role in economic theory In this highly original and enlightening volume Guido Buenstorf develops a new conceptual approach to the economics of energy which originates from recent advances in evolutionary economics

The Electric Light Liz Sonneborn, 2007 Describes the life of Thomas Edison and examines the impact of his invention of the light bulb on daily life

Ordinary Consumption Jukka Gronow, Alan Warde, 2013-01-11 The sociology of consumption has concentrated unduly on the more spectacular and visual aspects of contemporary consumer behaviour thereby constructing an unbalanced and misleading view This collection emphasises ordinary rather than extraordinary items routine and repetitive behaviour rather than conscious decision making It studies practical contexts of use rather than decisions to purchase and analyses collective identification rather than personal identity Each essay argues one or more of these points for the most part using new empirical material from several different national contexts The topics analysed include shopping in Taiwan second home ownership in France environmental considerations concerning food choice in Denmark the take up of new domestic technologies in Finland and kitchen design in England Key concepts like tradition routine and habit are clarified and new conceptual distinctions are made with the book defending theoretical approaches deriving from Simmel Weber Durkheim and Bourdieu Ordinary Consumption promotes a distinctive approach to the understanding of the central practices of consumer society it is a book with a controversial message one which will be a source of debate about the appropriate agenda for future research

The Age of Edison Ernest Freeberg, 2014-01-28 A sweeping history of the electric light revolution and the birth of modern America The late nineteenth century was a period of explosive technological creativity but more than any other invention Thomas Edison's incandescent light bulb marked the arrival of modernity transforming its inventor into a mythic figure and avatar of an era In *The Age of Edison* award winning author and historian Ernest Freeberg weaves a narrative that reaches from Coney Island and Broadway to the tiniest towns of rural America tracing the progress of electric light through the reactions of everyone who saw it and capturing the wonder Edison's invention inspired It is a quintessentially American story of ingenuity ambition and possibility in which the greater forces of progress and change are made by one of our most

humble and ubiquitous objects **The Architecture of the Wire** Carlotta Daro,2025-04-22 A visually inspiring architectural history of the wire and its representations that illuminates the relationship between telecommunications technology and architecture The Architecture of the Wire explores the development of telecommunications infrastructure and its impact on the architectural and urban culture of the modern age from poles wires and cables to micro architectures such as the th trophone and the telephone booth Starting with the intrepid worldwide infrastructures of the late nineteenth century Carlotta Dar proposes a new history that explores the multiple links and crossroads of such technical things with architecture and art Based on extensive research of North American company archives and French institutional ones and drawing on secondary literature in art and architectural history media studies and the history of technology Dar examines the aesthetic implications of material objects that have forever changed our urban rural and domestic environments

Hideous Progeny Angela Smith,2012-01-24 Twisted bodies deformed faces aberrant behavior and abnormal desires characterized the hideous creatures of classic Hollywood horror which thrilled audiences with their sheer grotesqueness Most critics have interpreted these traits as symptoms of sexual repression or as metaphors for other kinds of marginalized identities yet Angela M Smith conducts a richer investigation into the period s social and cultural preoccupations She finds instead a fascination with eugenics and physical and cognitive debility in the narrative and spectacle of classic 1930s horror heightened by the viewer s desire for visions of vulnerability and transformation Reading such films as Dracula 1931 Frankenstein 1931 Dr Jekyll and Mr Hyde 1931 Freaks 1932 and Mad Love 1935 against early twentieth century disability discourse and propaganda on racial and biological purity Smith showcases classic horror s dependence on the narratives of eugenics and physiognomics She also notes the genre s conflicted and often contradictory visualizations Smith ultimately locates an indictment of biological determinism in filmmakers visceral treatments which take the impossibility of racial improvement and bodily perfection to sensationalistic heights Playing up the artifice and conventions of disabled monsters filmmakers exploited the fears and yearnings of their audience accentuating both the perversity of the medical and scientific gaze and the debilitating experience of watching horror Classic horror films therefore encourage empathy with the disabled monster offering captive viewers an unsettling encounter with their own impairment Smith s work profoundly advances cinema and disability studies in addition to general histories concerning the construction of social and political attitudes toward the Other **Fresh** Susanne Freidberg,2010-10-01 That rosy tomato perched on your plate in December is at the end of a great journey not just over land and sea but across a vast and varied cultural history This is the territory charted in Fresh Freidberg takes six common foods from the refrigerator to discover what each has to say about our notions of freshness

Shock Cities Harold L. Platt,2005-05-22 Publisher Description *The Power Makers* Maury Klein,2008-05-27 Traces the power revolution that transformed America from an agrarian society into a technological superpower evaluating the contributions of such figures as George Westinghouse J P Morgan and Thomas Edison By the author of Rainbow s End

The Crash of 1929 50 000 first printing **From Edison to Enron** Richard Munson,2005-09-30 Traces the history of the 210 billion power industry showcasing the key individuals technological innovations corporate machinations and political battles waged over its domination The author maintains that the technological and regulatory infrastructure have outlived their usefulness and that generators are the nation s largest polluters Spirit Cure Joseph W. Williams,2012-12-27 Joseph W Williams offers a compelling examination of the changing healing practices of pentecostals in the United States over the past hundred years from the early believers who rejected mainstream medicine and overtly spiritualized disease to the later generations of pentecostals and their charismatic successors who dramatically altered the healing paradigms they inherited Williams shows that over the course of the twentieth century pentecostal denunciations of the medical profession often gave way to natural healing methods associated with scientific medicine natural substances and even psychology By the early twenty first century figures such as the pentecostal preacher T D Jakes appeared on The Dr Phil Show other healers marketed their books at mainstream retailers such as Wal Mart and some developed lucrative nutritional products that sold online and in health food stores across the nation Exploring the interconnections resonances and continued points of tension between pentecostal adherents and some of their fiercest rivals Spirit Cure chronicles pentecostals embrace of competitors healing practices and illuminates their dramatic transition from a despised minority to major players in the world of American evangelicalism and mainstream American culture
