# Electronic Document Delivery The Artemis Concept

## Electronic Document Delivery

**Adrian R. D. Norman, Commission of  
the European Communities.  
Directorate General, Information  
Market and Innovation**

## **Electronic Document Delivery The Artemis Concept Electronic Document Delivery:**

*Electronic Document Delivery: The ARTEMIS concept for document digitalisation and teletransmission*, 1981

*Electronic Document Delivery* Adrian R. D. Norman, 1981      *Electronic Document Delivery* Adrian R. D.

Norman, Commission of the European Communities. Directorate General, Information Market and Innovation, 1981 A study prepared for the Directorate General Information Market and Innovation Commission of the European Communities

**Electronic Publishing** R. Williamson, 2013-10-22 Electronic Publishing State of the Art Report provides an overview of the state of knowledge in electronic publishing This Report is organized into three parts Invited Papers Analysis and Bibliography The Invited Papers describe some of the problems of producing effective commercial versions of electronic document transfer systems drawing on the experience of participants in the DOCDEL project funded by the Commission of the European Communities CEC These projects show many interesting and potentially important possibilities for commercial activity in areas ranging from authoring systems designed to help the electronic origination of scientific and mathematical works to developments in the field of storing and transmitting graphical information The Analysis assesses major advances in electronic publishing The Analysis is constructed by the editor of the Report to provide a balanced and comprehensive view of the latest developments in electronic publishing The editor's personal analysis of the subject is supplemented by quotations from the Invited Papers written by leading authorities on the subject The Bibliography is a specially selected compilation of the most important published material on the subject of electronic publishing Each key item in the literature is reviewed and annotated to assist in selecting the required information      *New Information Technologies and Libraries* H. Liebaers, W.J. Haas, W.E. Biervliet, 2013-06-29 The nucleus of this volume consists of a number of papers presented at the Advanced Research Workshop on liThe Impact of New Information Technologies on Library Management Resources and Cooperation held in Luxembourg from 19-23 November 1984 The workshop was a joint effort of four international organisations The Scientific Affairs Division of the North Atlantic Treaty Organization through a personal commitment and interest expressed by Dr H Durand Assistant Secretary General for Scientific Affairs was the first and major sponsor acting as a catalyst in enabling the Workshop to take place Through its support for travel and subsistence costs of some of the North American participants the Workshop could become a platform for the exchange of ideas between parties concerned with information handling and transmission and information policy in Western Europe and North America The Directorate General for Information Market and Innovation of the Commission of the European Communities hosted the Workshop in its facilities the Jean Monnet Building in Luxembourg also providing for simultaneous translation in the main languages of the European Community Moreover the Commission generously funded the participation of key participants from Community countries and provided participants with ample information on existing Community programmes related to electronic publications electronic transmission of documents copyright problems problems of standards telecommunication and so on I

he Council of Europe supported attendance from Sweden Austria and Spain And lastly the European Cultural Foundation organised the event on behalf of all these organisations      **Information Technology & Libraries** Roy J.

Adams,2024-08-30 First published in 1986 *Information Technology Libraries* explores some of the issues problems and opportunities presented to librarians with the development of information technology Charting the development of information technology in libraries in a historical context the book examines the possible changes in the way society will operate and the effects on the higher education system as a background to library service It discusses the external networks bringing in data from institution to use and the local networks which will distribute and add to the data These will change the way libraries operate and the mechanisms employed by members of the institution to gather and analyse information The volume therefore looks forward to the future of the library and the attendant effects on users structures management and staff It highlights the key issues for the library manager and the requirements for library staff education training and skills This book will be of interest to students and researchers of library information science library skills and education
