Scholarly Communication in Library and Information Services Bhaskar Mukherjee, 2010-07-27 This book has been written with a view to understand the validity of the perceptions of Open Access OA e journals in the Library and Information Science LIS field Using relevant OA journals this book presents and evaluates journals qualitatively and quantitatively Over the last three hundred years scholarly journals have been the prime mode of transport in communicating the scholarly research process However in the last few decades a changing scenario has been witnessed in their form and format OA is an innovative idea that attracts a fair amount of support and

opposition around the world because it bridges the gap between digitally divided scholars by solving the pricing and permission crises that have imbalanced the scholarly communication process. Some scholars are of the opinion that OA has led to a chaotic environment where anyone can publish anything. Scholarly Communication in Library and Information Services records in detail the impact by accessing the journals web site qualitatively and quantitatively in measuring the important elements such as articles, authors, countries, subjects, and cited references. Finally, the book calculates the impact factor using synchronous and asynchronous approaches. First ever study to extensively evaluate LIS Journals Web site qualitatively by using a newly developed set of criteria. LIS OA journals are also evaluated quantitatively. Counts citations of LIS OA articles in terms of formal citations by using Google Scholar. Innovations in Science and Technology Libraries Rita Pellen, William Miller, 2014-06-17. Catch up with the many innovations now affecting sci tech libraries. The twenty four chapters in Innovations in Science and Technology Libraries discuss the creation of digital collections, e repositories, personalized Web environments, and discipline specific Web sites for students and researchers. The book also explores the use of new technologies to improve document delivery and service provision as well as demonstrations of leadership by science librarians who are willing to take risks, adapt to change, control costs, and collaborate with colleagues. Here is just a fraction of the fascinating cases and important concepts highlighted in Innovations in Science and Technology Libraries: the Drexel University Library's transition from print to an electronic only journal collection; the benefits of adopting a just in time purchase on demand rather than a just in case acquisitions policy; IntelliDochow, it has raised the standard for document delivery worldwide and increased international recognition of CISTI; how California State University Sacramento merged its science library into its central reference department; an examination of the two year merging process; the creation of branch libraries focused on electronic information; an engineering library at Kansas State University and an agriculture library at the University of Manitoba; the impact of electronic information upon undergraduate science education; literacy competencies in the sciences and their implications for library instruction; how the MIT libraries created and developed the Reference Vision system that now guides all of their new reference services; the impact of learning communities upon library services; recent additions that enhance the usefulness of the IEEE Xplore online delivery system.
