Information Seeking in Electronic Environments Gary Marchionini, 1995 Significant amounts of our time and energy are devoted to creating managing and avoiding information Computers and telecommunications technology have extended our regard for information and are driving changes in how we learn work and play One result of these developments is that skills and strategies for storing and retrieving information have become more essential and more pervasive in our culture This book considers how electronic technologies have changed these skills and strategies and augmented the fundamental human activity of information seeking The author makes a case for creating new interface designs that allow the information seeker to choose what strategy to apply according to their immediate needs Such systems may be designed by providing information seekers with alternative interface mechanisms for displaying and manipulating multiple levels of representation for information objects Information Seeking in Electronic Environments is essential reading for researchers and graduate students in information science human computer interaction and education as well as for designers of information retrieval systems and interfaces for digital libraries and archives

Franklin, Ellen Strenski,2013-03-14 The Internet and the World Wide Web are deeply affecting the way things are traditionally done E commerce is changing businesses the stock market is accessible to individuals digitized journals up to date databases and newsgroups are changing the lives of researchers Is it reasonable to think that learning will remain unaffected Nevertheless universities with their blend of teaching and research have much to offer to those who wish to learn more than simple skills judgment initiative and fair competition for research positions Over the years universities have acquired invaluable resources in the form of laboratories and libraries with specially trained staff How can they evolve to take advantage of the many possibilities of the Internet and broadband communication Many institutions of higher education are trying to integrate new information and communications technologies into current curricula or to develop new learning paradigms for learning Because it is still so early in the game they are eager to compare their efforts and results to the achievements of others and are willing to learn from them The International Federation for Information Processing IFIP is a multi national federation of professional and technical organizations founded in 1960 under the auspices of UNESCO whose mission is to assist in the development exploitation and application of Information Technology for the benefit of all peoples Given this scope of activity IFIP seemed the appropriate body to give an international dimension to such a forum **Extreme-temperature and Harsh-environment Electronics** Vinod Kumar Khanna,2017 Electronic devices and circuits are employed by a range of industries in testing conditions from extremes of high or low temperature in chemically corrosive environments subject to shock and vibration or exposure to radiation This book presents material selections with design and fabrication methods for operating electronics in such extremes

Re-Scaling the Environment Ákos Moravánszky, Karl R. Kegler,2016-12-19 From 1960 1980 both eastern and western Europe experienced a construction boom of new dimensions Cybernetics the science of planning and sociology as well as the new possibilities offered by technology and production paved the way to large scale processes and systems in architecture and urban design which favored technocratic and utopian concepts Increasingly architects and planners saw themselves as

designers of comprehensive infrastructure and mega structures in a technology focused world The authors assesses these developments on the back of a knowledge transfer between East and West It confirms a change in attitude that can still be felt today recession social changes and environmental problems led to criticism of the then contemporary concepts of modernity
