Auer, Dan Centea, 2021-02-05 This book contains papers in the fields of Interactive Collaborative and Blended Learning Technology Supported Learning Education 4.0 Pedagogical and Psychological Issues With growing calls for affordable and quality education worldwide we are currently witnessing a significant transformation in the development of post secondary education and pedagogical practices Higher education is undergoing innovative transformations to respond to our urgent needs The change is hastened by the global pandemic that is currently underway The 9th International Conference on

Interactive Collaborative and Blended Learning Visions and Concepts for Education 4.0 was conducted in an online format at McMaster University Canada from 14th to 15th October 2020 to deliberate and share the innovations and strategies. This conference's main objectives were to discuss guidelines and new concepts for engineering education in higher education institutions including emerging technologies in learning to debate new conference format in worldwide pandemic and post pandemic conditions and to discuss new technology based tools and resources that drive the education in non traditional ways such as Education 4.0. Since its beginning in 2007 this conference is devoted to new learning approaches with a focus on applications and experiences in the fields of interactive collaborative and blended learning and related new technologies. Currently the ICBL conferences are forums to exchange recent trends research findings and disseminate practical experiences in collaborative and blended learning and engineering pedagogy. The conference bridges the gap between pure scientific research and the everyday work of educators. Interested readership includes policymakers academics educators researchers in pedagogy and learning theory school teachers industry centric educators continuing education practitioners etc.
