Intellectual Developments in Greece and China Raymond W.K. Lau,2020-03-17 This book presents a study of historical sociology and a comparison of ancient Greece s and ancient China s intellectual developments It provides a special historical sociological theoretical model allowing the exploration of how and why Greece s and China s developments followed two different trajectories This model allows a superior explanation of this phenomenon than previous studies which all employ the outdated methodology of mono causal determinism This work takes the critique of Eurocentric views in comparative studies pioneered by Joseph Needham in Science and Civilization in China to a new level of excellence because in addition to presenting new empirical findings and dispelling previous misunderstandings it also provides a sophisticated theoretical analysis It will appeal to scholars and students in the fields of comparative intellectual studies sinology historical sociology classics and intellectual history

Robust Design and Assessment of Product and Production by Means of Probabilistic Multi-objective Optimization Maosheng Zheng,Jie Yu,2024-05-15 This book develops robust design and assessment of product and production from viewpoint of system theory which is quantized with the introduction of brand new concept of preferable probability and its assessment It aims to provide a new idea and novel way to robust design and assessment of product and production and relevant problems Robust design and assessment of product and production is attractive to both customer and producer since the stability and insensitivity of a product s quality to uncontrollable factors reflect its value Taguchi method has been used to conduct robust design and assessment of product and production for half a century but its rationality is criticized by statisticians due to its casting of both mean value of a response and its dispersion into one index which doesn t characterize the issue of simultaneous optimization of above two independent sub responses sufficiently for robust design so an appropriate approach is needed The preference or role of a response in the evaluation is indicated by using preferable probability as the unique index Thus the rational approach for robust design and assessment of product and production is formulated by means of probabilistic multi objective optimization which reveals the simultaneous optimization of both mean value of a response and its dispersion in manner of joint probability Besides defuzzification and fuzzification measurements are involved as preliminary approaches for robust assessment the latter provides miraculous treatment for the target the best case flexibly
