Abstract—Adaptive workload prediction is a key challenge in proactive auto-scaling. In this paper, we propose a novel adaptive workload prediction algorithm that can predict the workload of a PaaS system in advance. The algorithm is based on the idea of using a machine learning model to predict the workload of a PaaS system. The algorithm is evaluated using real-world data and shows that it can predict the workload of a PaaS system with high accuracy.

Keywords—Adaptive workload prediction, proactive auto-scaling, PaaS systems, machine learning, workload prediction.
