Good Old Fashioned Future:

A Good Old-Fashioned Future Bruce Sterling, 2011-06-22 From the subversive to the antic the uproarious to the disturbing the stories of Bruce Sterling are restless energy filled journeys through a world running on empty the visionary work of one of our most imaginative and insightful modern writers They live as strangers in strange lands In worlds that have fallen or should have They wage battles in wars already lost and become heroes and sometimes martyrs in their last ditch efforts to preserve the dignity and individuality of humanity A hack Indian filmmaker takes the pulse of a wounded and declining civilization 21st century Britain A pair of swashbuckling Silicon Valley entrepreneurs join forces to make a commercial killing in organic underground slime and computer generated jellyfish A man in a Japanese city takes orders from a talking cat while pursuing a drama of danger and adventure that has become the very essence of his life From *The Littlest Jackal* a darkly hilarious thriller of mercs and gunrunners set in Finland to a stark vision of a post atomic netherworld in his haunting tale *Taklamakan* Bruce Sterling once again breaks boundaries breaks icons and breaks rules to unleash the most dangerously provocative and intelligent science fiction being written today

Archaeologies of the Future Fredric Jameson, 2020-05-05 In an age of globalization characterized by the dizzying technologies of the First World and the social disintegration of the Third is the concept of utopia still meaningful *Archaeologies of the Future* Jameson's most substantial work since *Postmodernism Or the Cultural Logic of Late Capitalism* investigates the development of this form since Thomas More and interrogates the functions of utopian thinking in a post Communist age The relationship between utopia and science fiction is explored through the representations of otherness alien life and alien worlds and a study of the works of Philip K Dick Ursula LeGuin William Gibson Brian Aldiss Kim Stanley Robinson and more Jameson's essential essays including *The Desire Called Utopia* conclude with an examination of the opposing positions on utopia and an assessment of its political value today

Inventions of A Present Fredric Jameson, 2024-05-07 The giant of literary theory analyses the novel Conrad James Atwood Oe Mailer Grass Grossman Garcia Marquez Gibson Knausgaard and more A novel is an act an intervention which most often the naive reader takes as a representation The novel intervenes to modify or correct our conventional notions of a situation and in the best and most intense cases to propose a wholly new idea of what constitutes an event or of the very experience of living The most interesting contemporary novels are those which try and sometimes succeed in awakening our sense of a collectivity behind individual experience opening up a relationship between the isolated subjectivity and class or community But even if this happens rarely one must go on to find traces of collective praxis hidden away within the mere awakening of a feeling of multitude And since it is in the sense of the nation and nationality that collectivity is most often expressed it is urgent to disengage the possibilities of genuine action within these nationalisms This sweeping collection of essays ranges from the elusive politicality of North American literature to the sometimes frozen narrative experiences of the eastern countries and the old Soviet Union from East Germany to Japan Latin America and the

Nordic countries Like any such voyage it is an arbitrary movement across the world of historical situations which however seeks to dramatize their common kinship in late capitalism itself

Future Politics Jamie Susskind, 2018-09-12 Future Politics confronts one of the most important questions of our time how will digital technology transform politics and society The great political debate of the last century was about how much of our collective life should be determined by the state and what should be left to the market and civil society In the future the question will be how far our lives should be directed and controlled by powerful digital systems and on what terms Jamie Susskind argues that rapid and relentless innovation in a range of technologies from artificial intelligence to virtual reality will transform the way we live together Calling for a fundamental change in the way we think about politics he describes a world in which certain technologies and platforms and those who control them come to hold great power over us Some will gather data about our lives causing us to avoid conduct perceived as shameful sinful or wrong Others will filter our perception of the world choosing what we know shaping what we think affecting how we feel and guiding how we act Still others will force us to behave certain ways like self-driving cars that refuse to drive over the speed limit Those who control these technologies usually big tech firms and the state will increasingly control us They will set the limits of our liberty decreeing what we may do and what is forbidden Their algorithms will resolve vital questions of social justice allocating social goods and sorting us into hierarchies of status and esteem They will decide the future of democracy causing it to flourish or decay A groundbreaking work of political analysis Future Politics challenges readers to rethink what it means to be free or equal what it means to have power or property what it means for a political system to be just or democratic and proposes ways in which we can and must regain control
